

Statistical bulletin

Index of Production, UK: April 2021

Movements in the volume of production for the UK production industries: manufacturing, mining and quarrying, energy supply, and water and waste management. Figures are seasonally adjusted.

Release date:
11 June 2021

Next release:
9 July 2021

Table of contents

1. [Main points](#)
2. [Index of Production data](#)
3. [Measuring the data](#)
4. [Related links](#)

1 . Main points

- Monthly production fell by 1.3% between March 2021 and April 2021 meaning output was 3.1% below its February 2020 level, the last month of "normal" trading conditions prior to the coronavirus (COVID-19) pandemic.
- The fall in production was driven by decreases of 15.0% in mining and quarrying, 0.3% in manufacturing, and 0.9% in water supply and sewerage; these were offset partially by a rise in electricity and gas of 0.5%.
- The 0.3% fall in manufacturing over the month was driven by lower output in 5 of the 13 manufacturing subsectors and was led by a fall of 16.0% in the manufacture of basic pharmaceutical products and pharmaceutical preparations.
- Despite the fall from March to April, production output for the three months to April 2021 increased by 0.5% compared with the three months to January 2021.
- The coronavirus pandemic has had a generally negative impact on production output, although each sector has been affected differently; manufacturing output remains 2.4% below its February 2020 level, and mining and quarrying is 23.7% below. However, electricity and gas is 2.4% above its February 2020 level, and water supply and sewerage is 2.7% above; for further and detailed analysis of the effect on our monthly Index of Production (IoP) estimate, please see our article [Coronavirus and the impact on output in the UK economy, UK: April 2021](#), published today (11 June 2021).

2 . Index of Production data

[Index of Production time series](#)

Dataset DIOP | Released 11 June 2021

Movements in the volume of production for the UK production industries: manufacturing, mining and quarrying, energy supply, and water and waste management. Figures are seasonally adjusted.

[Output of the production industries](#)

Dataset | Released 11 June 2021

Index values and growth rates for production, manufacturing and the main industrial groupings in the UK.

[Index of Production and industry sectors to four decimal places](#)

Dataset | Released 11 June 2021

Monthly index values for production and the main Index of Production (IoP) sectors in the UK to four decimal places.

[Monthly Business Survey turnover in production industries](#)

Dataset | Released 11 June 2021

Monthly Business Survey (MBS) production industries' total turnover, domestic sales and exports in the UK. Figures are in current price and non-seasonally adjusted.

[Export proportions for manufacturing industries](#)

Dataset | Released 11 June 2021

Monthly, three-monthly and annual export data for the manufacturing industries, collected by the MBS at industry level in the UK.

All data related to the IoP are available on the [Related data page](#).

3 . Measuring the data

The Index of Production (IoP) uses data from a variety of sources and is calculated by taking turnover and removing the impact of price changes or by using direct volume estimates.

The majority of these data are collected as "turnover values" through the Monthly Business Survey (MBS). In addition, direct volume series are collected by the Department for Business, Energy and Industrial Strategy (BEIS) and the International Steel Statistics Bureau (ISSB) for steel industries.

From January 2018, Value Added Tax (VAT) data have also been included across 64 production industries for small and medium-sized businesses. For more information, see [VAT turnover data in national accounts: background and methodology](#).

A comprehensive list of the IoP source data can be found in the [Gross domestic product \(GDP\(O\)\) source catalogue \(XLS, 715KB\)](#).

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in the [UK IoP QMI](#).

Blue Book 2021

In Blue Book 2021 [a new framework](#) will be introduced to improve how we produce volume estimates of gross domestic product (GDP) for balanced years as part of the supply use process. This framework includes the implementation of double-deflated industry-level gross value added for the first time. This improvement will be reflected in the September quarterly national accounts and October monthly GDP estimates. On 28 June we will publish [Blue Book 2021 indicative impacts](#) of this change to industry level gross value added volume.

Consultation to the release time

The Office for Statistics Regulation (OSR) is currently holding a [consultation](#) to get feedback as to the release time of these statistics. This consultation closes on 25 June 2021. If you have any comments about the release time of official statistics, please [contact the OSR](#).

Coronavirus (COVID-19)

The Office for National Statistics' (ONS') Monthly Business Survey (MBS) is fully online, meaning that business owners can log on from any location and submit their data at an appropriate time. Most other data in the Index of Production (IoP) come from the BEIS and therefore will be less impacted than survey data.

Our latest data and analysis on the [impact of the coronavirus \(COVID-19\) on the UK economy and population](#) is now available on a new web page. This will be the hub for all special coronavirus-related publications, including the fortnightly Business Impact of Coronavirus (COVID-19) Survey (BICS).

The ONS has released a [public statement](#) on COVID-19 and the production of statistics. Specific queries must be directed to the [Media Relations Office](#).

4 . Related links

[Coronavirus and the impact on output in the UK economy, UK: April 2021](#)

Article | Released 11 June 2021

Analysis of monthly growth for the production, services and construction industries in the UK economy between March 2021 and April 2021, highlighting the early impact from the coronavirus (COVID-19) pandemic.

[International comparisons of GDP during the coronavirus \(COVID-19\) pandemic](#)

Article | Released 1 February 2021

The coronavirus (COVID-19) pandemic has led to record declines in gross domestic product (GDP) in advanced economies in 2020. International comparisons show that the UK has experienced the largest contraction in volume GDP amongst the G7 countries. However, international comparisons have also been complicated by how National Statistical Institutes (NSIs) record non-market output.

[Comparison of motor vehicle manufacturing output statistics, UK: 1997 to 2019](#)

Article | Released 10 January 2020

A comparison of the methodologies used to estimate motor vehicle manufacturing outputs by the Office for National Statistics (ONS) and the Society of Motor Manufacturers and Traders (SMMT).

[A comparison between official estimates of UK output and diffusion indices](#)

Article | Released 21 October 2019

The level of correlation between ONS data and IHS Markit and Chartered Institute of Procurement and Supply Purchasing Managers' Indices.

[GDP monthly estimate, UK: April 2021](#)

Bulletin | Released 11 June 2021

Gross domestic product (GDP) measures the value of goods and services produced in the UK. It estimates the size of and growth in the economy and includes the Index of Production (IoP), Index of Services (IoS) and construction output in Great Britain.

[Producer price inflation, UK: March 2021](#)

Bulletin | Released 19 May 2021

The corresponding price indices used to deflate the IoP are published in the monthly publication of [UK producer price inflation](#).

[UK manufacturers' sales by product \(ProdCom\): 2019 results](#)

Bulletin | Released 01 July 2020

Product sales by manufacturers are published on an annual basis in [ProdCom](#) statistical bulletins; estimates are in current prices, unlike the chained volume measures published in the IoP release.

[Energy Trends: April 2021](#)

Bulletin | Released 27 May 2021

The data published by the Department for Business, Energy and Industrial Strategy (BEIS) in [Energy Trends](#) are used to measure the mining and quarrying, electricity and gas, and manufacture of coke and refined petroleum products sectors within this release.
