2. Main points

Our most timely estimate of payrolled employees indicates that in November 2021 there were 29.4 million employees in the UK: up 257,000 on the revised October 2021 level and up 424,000 on the pre-coronavirus (COVID-19) February 2020 level. It is possible that those made redundant at the end of the furlough scheme will be included in the Real Time Information (RTI) data for a few further months, while they work out their notice period. However, responses to our business survey suggest that the numbers made redundant were likely to be a small share of those still on furlough at the end of September 2021.

Our latest Labour Force Survey estimates for August to October 2021 show the employment rate increased by 0.2 percentage points on the quarter, to 75.5%. The number of part-time workers decreased strongly during the coronavirus pandemic, but has been increasing since April to June 2021, driving the quarterly increase in employment. The unemployment rate decreased by 0.4 percentage points on the quarter to 4.2% while the inactivity rate increased by 0.1 percentage points to 21.2%.

Young people (those aged 16 to 24 years) have been particularly affected by the pandemic, with the employment rate decreasing and the unemployment and economic inactivity rates increasing by more than for those aged 25 years and over. Over the last quarter, however, there was an increase in the employment rate and a decrease in the unemployment rate to below pre-coronavirus rates.

The number of job vacancies in September to November 2021 continued to rise to a new record of 1,219,000, an increase of 434,500 from the pre-coronavirus January to March 2020 level, with 13 of the 18 industry sectors showing record highs. However, on the quarter, the rate of growth in vacancies continued to slow down and the experimental single month vacancy estimates showed their first reduction in vacancy numbers since February 2021.

4. Labour market data

Summary of labour market statistics

Dataset A01 | Released 14 December 2021

Estimates of employment, unemployment and other employment-related statistics for the UK.

Real Time Information statistics

Dataset Real Time Information statistics | Released 14 December 2021

Earnings and employment statistics from Pay As You Earn (PAYE) Real Time Information (RTI) (Experimental Statistics) seasonally adjusted.

Labour Force Survey single month estimates

Dataset X01 | Released 14 December 2021

Labour Force Survey (LFS) experimental single-month estimates of employment, unemployment and economic inactivity.

Labour Force Survey weekly estimates

Dataset X07 | Released 14 December 2021

Labour Force Survey (LFS) experimental weekly estimates of employment, unemployment, economic inactivity and hours in the UK.

View all related data on the related data page.

Alternatively, NOMIS provides free access to the most detailed and up-to-date UK labour market statistics

5. Glossary

Average weekly earnings

<u>Average weekly earnings</u> measures money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises because they also reflect, for example, changes in the overall structure of the workforce. More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

Economic inactivity

People not in the labour force (also known as <u>economically inactive</u>) are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks and/or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and 64 years who are not in the labour force.

Employment

Employment measures the number of people in paid work or who had a job that they were temporarily away from (for example, because they were on holiday or off sick). This differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in employment. A more detailed explanation is available in A guide to labour market statistics.

Unemployment

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

Vacancies

<u>Vacancies</u> are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey; this is a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry and fishing (a small sector for which the collection of estimates would not be practical).

Pay As You Earn (PAYE) Real Time Information (RTI)

These data come from HM Revenue and Customs' (HMRC's) Pay As You Earn (PAYE) Real Time Information (RTI) system. They cover the whole population rather than a sample of people or companies, and they will allow for more detailed estimates of the population. The release is classed as Experimental Statistics as the methodologies used to produce the statistics are still in their development phase. As a result, the series are subject to revisions.

A more detailed glossary is available.

6. Measuring the data

Our bulletins will be shorter and more focused on the main messages and most important trends in response to user feedback. Read more on this and how to send us feedback on how our publications are evolving.

Coronavirus

For more information on how labour market data sources are affected by the coronavirus (COVID-19) pandemic, see the article published on 6 May 2020, which details some of the challenges that we have faced in producing estimates at this time.

An article published 11 December 2020 compares our labour market data sources and discusses some of the main differences.

Our latest data and analysis on the impact of coronavirus on the UK economy and population are available on our dedicated <u>coronavirus web page</u>. This is the hub for all special coronavirus-related publications, drawing on all available data. In response to the developing coronavirus pandemic, we are working to ensure that we continue to publish economic statistics. For more information, please see <u>COVID-19 and the production of statistics</u>.

Labour Force Survey reweighting

Labour Force Survey (LFS) responses published from 15 July 2021 have been <u>reweighted to new populations</u> using growth rates from HM Revenue and Customs (HMRC) Real Time Information (RTI), to allow for different trends during the coronavirus (COVID-19) pandemic. The reweighting gives improved estimates of both rates and levels.

When the recent weighting methodology for the Labour Force Survey (LFS) was applied, there was a small error in the implementation. When calculating three-month averages for the Pay As You Earn (PAYE) RTI the months used were the previous three-month average. For example, for the October to December period, the RTI data used were that for September to November. This led to a slight overestimation of the non-UK population by approximately 0.5%. This represents less than half the size of the sampling variability. The size is roughly the same over the quarters of 2020 and the impact on January to December 2020 Annual Population Survey (APS) estimates is about 14,000 for EU born, 25,000 for non-EU born and 39,000 for non-UK born. The impact on LFS economic activity estimates at national level is mostly below 0.1% and the impact on rates is less than 0.02 percentage points.

Consultation on the Code of Practice for Statistics - proposed change to 9: 30am release practice

On behalf of the UK Statistics Authority, the Office for Statistics Regulation (OSR) is conducting a <u>consultation on the Code of Practice for Statistics</u>, <u>proposing changes to the 9:30am release practice</u>. Please send comments by 21 December 2021 to: regulation@statistics.gov.uk

Economic statistics governance after EU exit

Following the UK's exit from the EU, new governance arrangements are being put in place that will support the adoption and implementation of high-quality standards for UK economic statistics. These governance arrangements will promote international comparability and add to the credibility and independence of the UK's statistical system.

At the centre of this new governance framework will be the new National Statistician's Committee for Advice on Standards for Economic Statistics (NSCASE).NSCASE will support the UK by ensuring its processes for influencing and adopting international statistical standards are world-leading. The advice NSCASE provides to the National Statistician will span the full range of domains in economic statistics, including the national accounts, fiscal statistics, prices, trade and the balance of payments, and labour market statistics.

Further information about NSCASE is available.

Pre-release data

The Bank of England were granted exceptional pre-release access to the "Labour market overview, UK: December 2021" bulletin and accompanying tables at 12:30pm on Friday 10 December 2021 so that the data were available for the Monetary Policy Committee (MPC) meeting held on that day. See exceptional pre-release access so that data are available for discussion at the MPC.

7. Strengths and limitations

The estimates presented in this bulletin contain <u>uncertainty</u>.

Further information is available in A guide to labour market statistics.

Information on revisions is available in the <u>Labour market statistics revisions policy</u>.

Information on the strengths and limitations of this bulletin is available in our previous release.

Summary of labour market statistics published on 14 December 2021

Series	Reference period	Latest estimate	Last time higher	Last time lower	Comparable data begins in
Employment level (aged 16 and over)	Aug-Oct 2021	32.506 million	Jul-Sep 2021 (32.523 million)	Jun-Aug 2021 (32.416 million)	Jan-Mar 1971
Employment rate (aged 16 to 64)	Aug-Oct 2021	75.5%	May-Jul 2020 (75.6%)	Jul-Sep 2021 (75.4%)	Jan-Mar 1971
Unemployment level (aged 16 and over)	Aug-Oct 2021	1.423 million	Jul-Sep 2021 (1.448 million)	Apr-Jun 2020 (1.407 million)	Jan-Mar 1971
Unemployment rate (aged 16 and over)	Aug-Oct 2021	4.2%	Jul-Sep 2021 (4.3%)	Apr-Jun 2020 (4.1%)	Jan-Mar 1971
Inactivity level (aged 16 to 64)	Aug-Oct 2021	8.746 million	Mar-May 2021 (8.806 million)	Jul-Sep 2021 (8.733 million)	Jan-Mar 1971
Inactivity rate (aged 16 to 64)	Aug-Oct 2021	21.2%	Mar-May 2021 (21.3%)	Jul-Sep 2020 (21.1%)	Jan-Mar 1971
Average Earnings (total pay - nominal)	Aug-Oct 2021	4.9%	Jul-Sep 2021 (5.9%)	Jan-Mar 2021 (4.3%)	Jan-Mar 2001
Average Earnings (regular pay - nominal)	Aug-Oct 2021	4.3%	Jul-Sep 2021 (5.0%)	Oct-Dec 2020 (4.0%)	Jan-Mar 2001
Average Earnings (total pay - real)	Aug-Oct 2021	1.7%	Jul-Sep 2021 (3.2%)	Jul-Sep 2020 (0.6%)	Jan-Mar 2001
Average Earnings (regular pay - real)	Aug-Oct 2021	1.0%	Jul-Sep 2021 (2.2%)	Jun-Aug 2020 (0.2%)	Jan-Mar 2001
Vacancies level	Sep-Nov 2021	1,219,000	Never	Aug-Oct 2021 (1,182,000)	Apr-Jun 2001

Index of Tables

The table below provides an index of the tables appearing in this Statistical Bulletin and it shows how these table numbers match up with the Excel spreadsheet datasets which are available on the website at:

 $\underline{https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/employmentandemployeetypes/bulletins/uklabourmarket/December 2021/related data}$

Table 17 (International comparisons of employment and unemployment) is temporarily suspended, the data presented is the latest data available on the ONS website however all the data can be found on the Eurostat, OECD, Statistics Canada and US Bureau of Statistics websites.

Table 18 (Labour Disputes) is also temporarily suspended as data collection has ceased for the foreseeable future. The data presented is the latest available.

Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64 However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

^{1.} The Labour Force Survey (LFS) is a survey of households in the UK.

^{2.} The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

^{3.} The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.

^{4.} The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg, compare Apr-Jun with Jan-Mar, not with Mar-May).

^{1.} The split between full-time and part-time employment is based on respondents' self-classification.

^{2.} This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.

3. These series cover Employees and Self-employed only. These series include some temporary employees.

4. The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of the other columns in this section of the table.

Explanatory Note: The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large numbers of people have moved between the public and private sectors. These major reclassifications are as follows

Further Education corporations and Sixth Form College corporations in England are included in the private sector from June 2012 but in the public sector for earlier time periods

Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods.

Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods.

Royal Bank of Scotland plc is included in the public sector from December 2008 but in the private sector for earlier time periods

Network Rail is included in the private sector before December 2002. From December 2002 onwards it is included in the public sector (except for the period from June 2003 to March 2004, when it is included in the private sector).

Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods.

Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods.

Welsh Further Education colleges are included in the private sector from March 2015 but in the public sector for earlier time periods

Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods.

Housing associations in Scotland are included in the public sector from September 2001 until June 2018; they are included in the private sector for earlier and later time periods.

Housing associations in Wales are included in the private sector from June 2018; they are included in the public sector for earlier time periods. Housing associations in Northern Ireland are included in the public sector from March 1999 to June 2020.

Train operating companies in England, Scotland and Wales operating under emergency measure agreements are included in the public sector from June 2020.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for assessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications.

- 1. Estimated as the difference between LFS total employment and the data from public sector organisations
- 2. LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.

 3. This series excludes locally engaged staff stationed outside the United Kingdom.

 4. This series excludes the Northern Ireland Civil Service.

- 5. This series may not exactly equal the sum of the components because each component is independently seasonally adjusted.

More detailed estimates are available in the Public Sector Employment Statistical Bulletin at

Workforce jobs enquiries 01633 456776 Sources: Employer surveys, Labour Force Survey and administrative sources

1. Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes shown at Table 3. The estimates for government supported trainees shown in this table exclude trainees with contracts of employment as such people are included in the estimates of employee jobs.

^{2.} The employee jobs data relate to the March 2020 period before reported cases of the coronavirus (COVID-19) in the UK. Self-employment jobs relate to the period February-April 2020 which includes self-employment jobs before and after COVID-19 measures were implemented.

^{3.} This series is not exclusively a public sector series as it includes some private sector jobs. See table 4 for estimates of public and private sector employment.

The estimates shown in this table relate to the number of people in employment and should not be used as a proxy for flows of foreign migrants into the UK.

^{1.} The total series includes people who do not state their country of brith or realizonally. The total levels series MOTM does not benefice equal the sum of the "UR" and "Non-UR" series.

2. This series consists of all ZE UI member states excluding the UE. This series equals the sum of EUM. EUIZ and Other EU.

3. Autum, Balgium, Domanik, Frister A Parce, Germany, Criscos, I select day, Lusentoury, Memberlands, Portugal, Span and Sweden.

4. Caccin Republic, Europea, Hargany, Lanks, Ultherist, Potent, Shrvak Republic and Shrvaria.

5. Romania and Bulgaria.

6. Romania and Cosalia

7. Total Non-EU equals the sum of Other Europe, Total Africa. Total Ania and Total America and Oceania.

^{1.} Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:

^{2.} People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

^{3.} Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

irces: EUROSTAT, OECD, national statistical offices

Labour market statistics enquiries: labour.market@ons.gov.uk

(*) Note: The UK rates shown in this table are as published by EUROSTAT (the EUs statistical office). See Table 1 for the latest rates for the UK as published by ONS.

Caution should be taken with international comparisons of labour markets during the COVID-19 pandemic, since definitional definitions of economic measures, such as furloughing, will vary between countries.

- 1. All employment rates shown in this table are for those aged from 15 to 64 except for the rate for the United States published by OECD which are for those aged from 16 to 64
- 2. The employment rates for the EU are published by EUROSTAT and are not seasonally adjusted. EUROSTAT do not publish seasonally adjusted (SA) employment rates but SA rates for some EU countries are published by OECD. These OECD employment rates are available on our website at dataset A10.

 3. Unemployment rates published by EUROSTAT for most EU countries (but not for the UK), are calculated by extrapolating from the most recent LFS data using monthly registered unemployment data.
- A standard population basis (16-74) is used by EUROSTAT except for Spain, Italy and the UK (16-74). The unemployment rate for the US is based on those aged 16 and over, but the rates for Canada and Japan are for those aged 15 and over. All unemployment rates shown in this table are seasonally adjusted.

 4. The "Total EU" series consist of all 27 EU countries. The Eurozone figures consist of the following EU countries: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy,
- 4. The Total CO series Sociated in all 2 for Counting Single Control in glore control in the Counting Co Counting Co

Relationship between columns 1=2+3; 4=5+6

Data source: ONS Labour Disputes Survey Labour disputes enquiries 01633 455400

- 1. Estimates of working days lost and workers involved are shown to the nearest thousand. Unrounded estimates of less than 500 therefore round to zero.
- 2. Due to rounding the working days lost for the public and private sectors may not add up to the total working days lost.

 3. The latest 12 month cumulative totals for the figures in these columns will not necessarily equal the sum of the 12 months as some disputes continue for over one month. These disputes appear in each month's data, but only once in the total.

^{*} Change on previous non-overlapping three month rolling average time period.

^{1.} Excludes Agriculture, Forestry and Fishing.

^{2.} Unemployment estimates are produced from the Labour Force Survey (LFS) and are always one period behind the ONS Vacancy Survey estimates. This table therefore shows estimates for the same periods as shown in table 1 (which shows LFS estimates).

Data source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

^{1.} The redundancy level is the number of people who were made redundant in the three months prior to interview. The figure is not seasonally adjusted

^{2.} The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.

The Labour Force Survey is tabulated by region of residence.

Labour market statistics enquiries: labour.market@ons.gov.uk

The Labour Force Survey is tabulated by region or residence.

1. Economically active = Employment plus Unemployment.

2. Denominator = all persons aged 16 to 64.

3. Denominator = total economically active

4. The estimates for Northern Ireland have not had the non-response bias adjustment from the recent reweighting fully applied. Early indications suggest the impact on UK headline rate estimates would be less than 0.1 percentage point. We will continue to investigate this and will keep users advised accordingly.

REGIONAL SUMMARY

23(2) Regional summary of Workforce Jobs

Thousands, seasonally adjusted

Area Codes	Area Names	September 2021	Change on June 2021
K02000001	United Kingdom	35,131	147
K03000001	Great Britain	34,239	132
E92000001	England	30,022	116
E12000001	North East	1,196	-3
E12000002	North West	3,847	30
E12000003	Yorkshire and The Humber	2,689	-7
E12000004	East Midlands	2,328	-6

E12000006	East	3,228	14
E12000007	London	5,946	40
E12000008	South East	4,867	30
E12000009	South West	2,953	33
W92000004	Wales	1,453	-33
S92000003	Scotland	2,765	49
N92000002	Northern Ireland ¹	884	15

Workforce jobs are mainly sourced from employer surveys and are tabulated by region of workplace.

HM Forces stationed abroad are included in the UK workforce jobs estimates but not in the regional estimates. The UK workforce jobs estimates therefore do not equal the sum of the regional estimates.

^{1.} The LFS components of the Workforce Jobs estimates for Northern Ireland have not had the non-response bias adjustment from the recent reweighting fully applied. Early indications suggest the impact on UK headline rate estimates would be less than 0.1 percentage points. We will continue to investigate this and will keep users advised accordingly.
