1 . Main points

- In May 2018, the quantity bought in the retail industry increased by 1.3% when compared with April 2018 with growth across all main sectors.
- Feedback from retailers suggested that a sustained period of good weather and Royal Wedding celebrations encouraged spending in food and household goods stores in May.
- The quantity bought saw a sharp increase to year-on-year growth in May at 3.9% when compared with April at 1.4%; due possibly to a combination of warm weather and slow year-on-year growth in May 2017 at 0.8%.
- Non-store retailing showed strong growth in the quantity bought when compared with the previous year at 16.2%, the previous month at 4.5% and in the three months to May at 4.9%.
- Online spending for food, department and clothing stores continued to increase, achieving new record proportions of online retailing in May at 5.8%, 17.4% and 17.6% respectively.
- The proportion of online spending in clothing stores has grown at a much faster rate in the last 14 months, from 14.7% in March 2017 to 17.6% in May 2018.

2 . Things you need to know about this release

This bulletin presents estimates of the quantity bought (volume) and amount spent (value) in the retail industry for the period 29 April 2018 to 26 May 2018.

Unless otherwise stated, the estimates in this release are seasonally adjusted.

The Retail Sales Index (RSI) measures the value and volume of retail sales in Great Britain on a monthly basis. Data are collected from businesses in the retail industry and the survey's results are used to produce seasonally adjusted monthly, quarterly and annual estimates of output in the retail industry at current price and at chained volume measures (removing the effect of inflation). Unless otherwise stated, all estimates included in this release are based on seasonally adjusted data.

The RSI is an important economic indicator and one of the earliest short-term measures of economic activity. It is used in the compilation of the national accounts and widely used by private and public sector institutions, particularly by the Bank of England and Her Majesty's Treasury to assist in informed decision- and policy-making.

Summary information can be found in the [RSI Quality and Methodology Information report](#).

3 . Main figures for total retail sales

Table 1: Main figures: May 2018

Seasonally adjusted, percentage change, Great Britain

	Most recent month on a year earlier	Most recent 3 months on a year earlier	Most recent month on previous month	Most recent 3 months on previous 3 months
Value (amount spent)	6.3	4.2	1.6	1.3
Volume (quantity bought)	3.9	2.1	1.3	0.9
Value (excluding automotive fuel)	6.1	4.2	1.5	1.5
Volume (excluding automotive fuel)	4.4	2.2	1.3	1.2

Source: Office for National Statistics

In May 2018, both the amount spent (value) and quantity bought (volume) showed growth across all measures (Table 1). When compared with the previous month, the amount spent increased by 1.6% and the quantity bought by 1.3%.

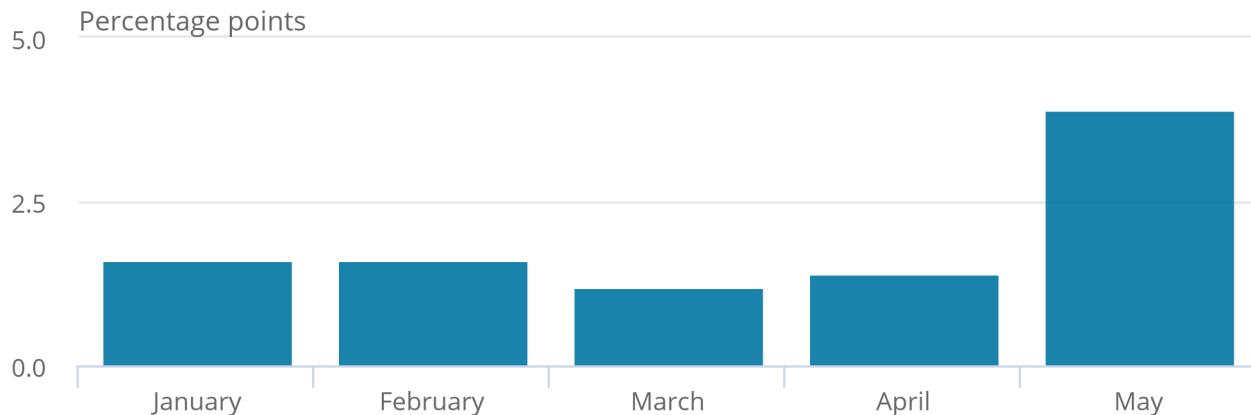

When compared with a year earlier, the amount spent and quantity bought in May both increased at a faster rate at 6.3% and 3.9% respectively. Figure 1 shows the sharp increase to the year-on-year growth rate for the quantity bought when compared with earlier months.

Figure 1: Year-on-year growth rates in the quantity bought in all retailing, seasonally adjusted

Great Britain, January 2018 to May 2018

Figure 1: Year-on-year growth rates in the quantity bought in all retailing, seasonally adjusted

Great Britain, January 2018 to May 2018

Source: Monthly Business Survey - Retail Sales Inquiry - Office for National Statistics

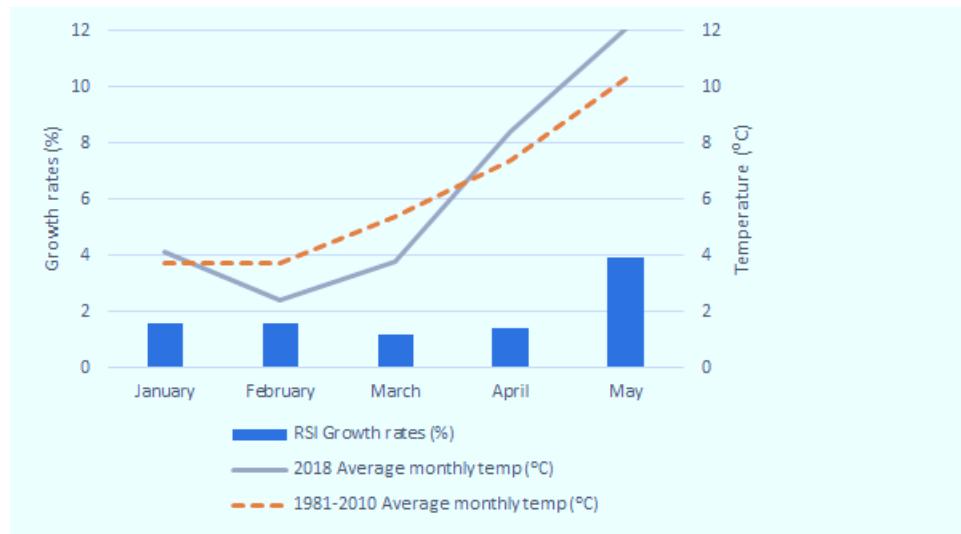

Figure 1 shows that the year-on-year growth rate for the quantity bought was relatively stable each month from January to April 2018, remaining under 2%. In May, we see stronger growth at 3.9%; a sharp year-on-year increase when compared with April at 1.4%.

Whilst the growth in May 2018 is strong, this is compared with a weak year-on-year growth of 0.8% in May 2017 as prices started to increase across all sectors.

Feedback from retailers suggests that a change to sustained warm weather following the adverse weather seen earlier in the year has seen increases in consumer spending in the current month. The Met Office also reported [above average temperatures](#) (Figure 2), stating that May was “provisionally the equal second-warmest May in a series from 1910”.

Figure 2: Year-on-year growth rates in the quantity bought in all retailing, seasonally adjusted, along with the average temperature

Great Britain, January 2018 to May 2018

Source: Monthly Business Survey - Retail Sales Inquiry - Office for National Statistics. Source 2: The Met Office

Figure 2 shows the year-on-year growth rates from January 2018 to May 2018 along with the average temperatures reported by the Met Office. As we began to experience warmer weather in April, temperatures rose to above average in May, which contrasts with the lower than average temperatures experienced in February and March. This shift to warmer weather may have encouraged consumers to spend later in the year.

Looking at the main store types, growth in May was seen across all retail sectors (Figure 3).

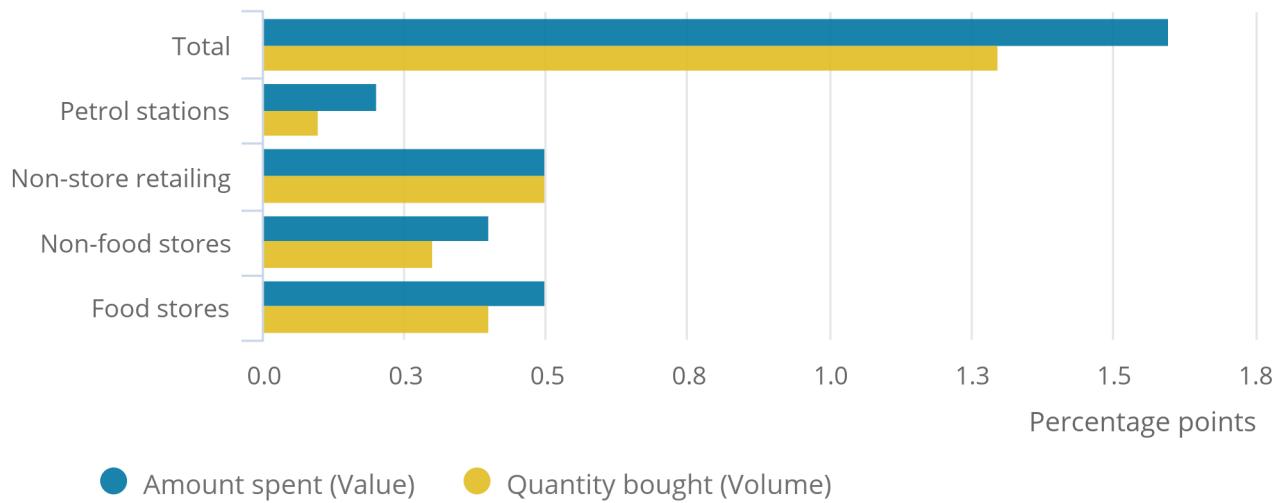

4 . Month-on-month contributions to growth

Figure 3: Contributions to month-on-month growth for the quantity bought and amount spent in the four main retail sectors, seasonally adjusted

Great Britain, May 2018 compared with April 2018

Figure 3: Contributions to month-on-month growth for the quantity bought and amount spent in the four main retail sectors, seasonally adjusted

Great Britain, May 2018 compared with April 2018

Source: Monthly Business Survey - Retail Sales Inquiry - Office for National Statistics

All main sectors contributed positively to the growth in retail sales in May 2018 when compared with April. Non-store retailing contributed most to the growth in the quantity bought at 0.5 percentage points.

Food stores provided a positive contribution to growth with supermarkets commenting on good sales in celebration of the Royal Wedding during good weather.

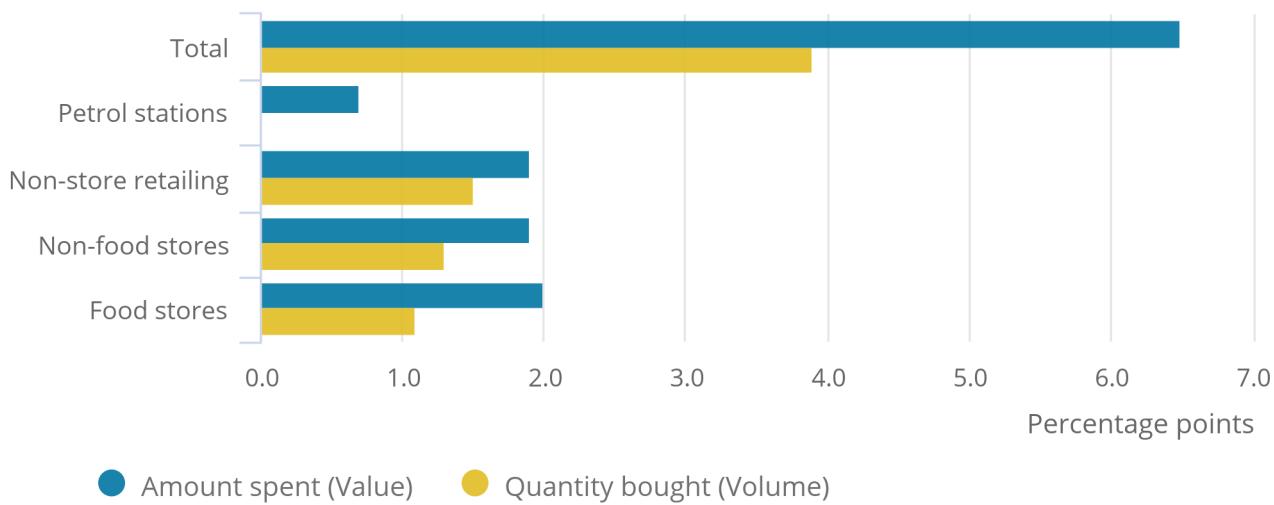

5 . Year-on-year contributions to growth

Figure 4: Contributions to year-on-year growth in the quantity bought and amount spent in the four main retail sectors, seasonally adjusted

Great Britain, May 2018 compared with May 2017

Figure 4: Contributions to year-on-year growth in the quantity bought and amount spent in the four main retail sectors, seasonally adjusted

Great Britain, May 2018 compared with May 2017

Source: Monthly Business Survey - Retail Sales Inquiry - Office for National Statistics

When compared with the same month a year earlier, the main contribution to the quantity of goods bought came from non-store retailing at 1.5 percentage points in May. Non-food stores provided positive contributions to both the quantity bought and amount spent at 1.3 and 1.9 percentage points respectively. Within non-food stores, household goods stores saw the strongest growth (Table 2).

As the only sector to show no contribution to growth, petrol stations remained flat for the quantity bought, where the rising cost of fuel in May was the largest rise since April 2017 at 7.8%.

Table 2: Sector summary for non-food stores: May 2018

Seasonally adjusted, Great Britain

	Percentage change over 12 months		
	Quantity bought (volume)	Amount spent (value)	Index categories and their percentage weights
Department stores	2.9	3.7	8.6
Textile, clothing and footwear stores	0.5	2.0	12.0
Household goods stores	7.9	9.3	8.2
Other stores	3.0	4.2	12.8
Total non-food stores	3.2	4.5	41.6

Source: Office for National Statistics

Household goods stores increased for both the quantity bought and amount spent by 7.9% and 9.3% respectively. DIY stores cover a range of garden and household goods and feedback from retailers suggested the warm weather had boosted sales in these areas.

6 . What's the story in online sales?

Table 3: Summary of internet statistics: May 2018

Value seasonally adjusted, percentage rates, Great Britain

Category	Year-on-year growth	Month-on-month growth	Online sales as a proportion of retailing	Index categories and their percentage weights
All retailing ¹	19.9	5.2	18.0	100
All food	20.7	2.5	5.8	13.9
All non-food	23.7	3.2	14.0	34.9
Department stores	36.0	4.3	17.4	8.1
Textile, clothing and footwear stores	24.0	4.5	17.6	12.3
Household goods stores	12.8	4.3	11.6	6.3
Other stores	19.8	-0.8	10.0	8.2
Non-store retailing	17.2	7.5	80.2	51.2

Source: Office for National Statistics

Notes:

1. All retailing refers to sales as a proportion of total retail sales.

Internet sales increased by 19.9% for the amount spent in May 2018 when compared with May 2017, with all sectors showing strong year-on-year growth (Table 3).

Department stores continued to show strong online sales on the year, with an increase of 36.0%. This follows strong year-on-year growth in April 2018 at 26.2%.

The month-on-month picture was also one of growth across each sector except other stores, which saw a decline of 0.8%.

Online sales as a total of all retailing continued to increase at 18.0%. Online spending for food, department stores, and clothing and footwear stores continued to achieve new record proportions of online retailing at 5.8%, 17.4% and 17.6% respectively.

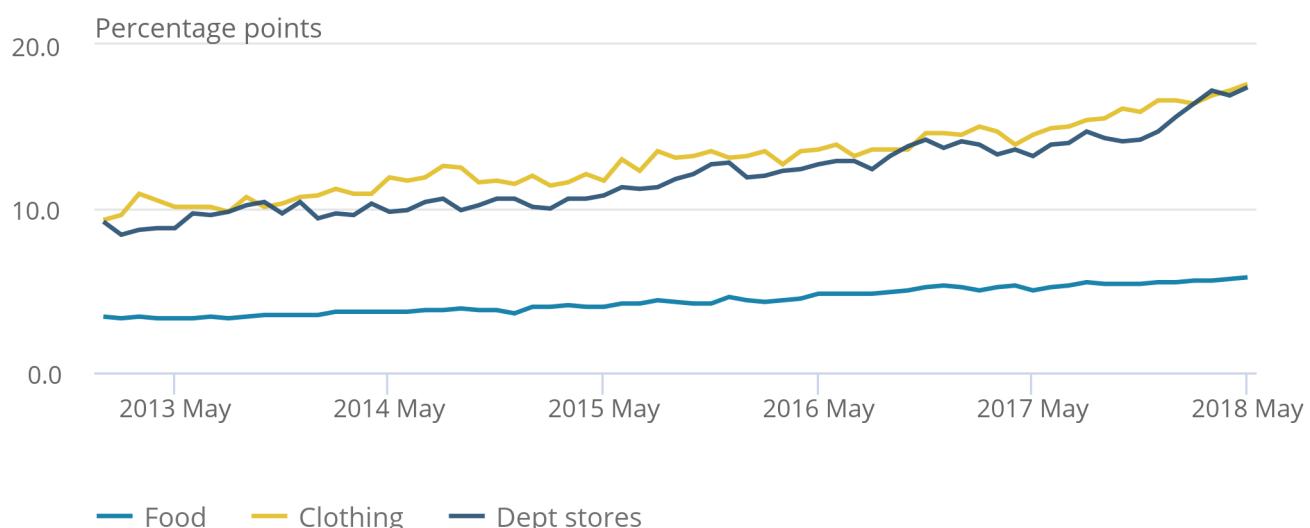

Figure 5 looks at online spending for food, department stores and clothing stores over time.

Figure 5: Internet sales as a proportion of all retailing, seasonally adjusted

Great Britain, January 2013 to May 2018

Figure 5: Internet sales as a proportion of all retailing,
seasonally adjusted

Great Britain, January 2013 to May 2018

Source: Monthly Business Survey - Retail Sales Inquiry - Office for National Statistics

As shown in Figure 5, the proportion of online spending within food stores has remained relatively flat, with a slight and steady increase from 3.9% in 2013 to its current high of 5.8% in May 2018.

The proportion of online spending within department and clothing stores shows a more volatile series but with a similar trend of steady growth throughout 2013 to May 2017.

From mid-2017, the proportion of online spending within clothing stores has grown at a much faster rate, from 14.7% in March 2017 to 17.6% in May 2018, showing that consumers are purchasing more of their clothing items online in recent months.

To note, Figure 5 includes sales from stores in the food, department stores and clothing sector that trade online. Retailers in the non-store sector, that may also sell food and clothing, without a store presence, are not included here as they are captured in the non-store retailing sector.

7 . Links to related statistics

The only international estimate of retail sales available for April 2018 was published by the US Census Bureau on 15 May 2018. In its [advanced monthly sales for retail and food services, April 2018 \(PDF, 752KB\)](#) they include the amount spent in the US retail industry, including motor vehicles and parts and food services.

Eurostat also published their latest estimates of the [volume of retail trade \(PDF, 456KB\)](#) across the European Union on 5 June 2018 for April 2018. This shows the seasonally adjusted volume of retail trade in both the euro area (EA19) and EU28 when compared with March 2018.

[Data for Northern Ireland](#) are published by the Northern Ireland Statistics and Research Agency (NISRA).

It should be noted that accurate comparisons cannot be made against these or other international statistics due to a variety of reasons, including differences in methodology.

We have published an article alongside this release relating to the methodological differences with our main external source for comparison, the [British Retail Consortium \(BRC\)](#).

8 . Quality and methodology

Our Monthly Business Survey (MBS) for retail sales measures output from the retail industry in Great Britain. It samples 5,000 businesses, with all businesses employing over 100 people or with an annual turnover of more than £60 million receiving an online questionnaire every month.

Further qualitative data or information and summary tables can be found in the attached [datasets](#). This includes data on:

- response rates
- standard errors
- revision triangle
- distribution analysis

The Retail sales [Quality and Methodology Information](#) report contains important information on:

- the strengths and limitations of the data and how it compares with related data
- uses and users of the data
- how the output was created
- the quality of the output including the accuracy of the data

Estimates in this table have been produced by combining a breakdown of commodity sales from 31 large retailers with total sales from other retailers.

The monthly periods consist of 4 weeks except for March, June, September and December which are 5 weeks. January 2014 is also a 5 week period.

The quarterly indices are the weighted averages of the monthly indices for the months within the quarter, the weights being the number of weeks in each monthly period.

1 The Food, drink and tobacco category, Household goods category and Other non-food category include revisions to the commodity classifications provided by respondents.

Historical data have been revised due to classification changes introduced from the January 2010 release due to the removal of repair from the classification.
