1 . Overview

Retail sales volumes (quantity bought) are estimated to have fallen by 0.7% in October 2024, following a rise of 0.1% in September 2024 (revised down from 0.3% in our last publication).

Non-food stores sales volumes fell on the month as retailers reported that Budget uncertainty affected sales.

More broadly, sales volumes rose by 0.8% in the three months to October 2024, when compared with the three months to July 2024.

2 . Retail sales in October

Monthly sales volumes fell in October 2024 following three months of growth

Volume sales, seasonally adjusted, Great Britain, October 2021 to October 2024

Monthly sales volumes fell in October 2024 following three months of growth

Volume sales, seasonally adjusted, Great Britain, October 2021 to October 2024

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

The chart shows the quantity bought in retail sales over time, for both the rolling three-month-on-three-month and the month-on-month movement.

Sales volumes fell by 0.7% during October 2024 following a revised 0.1% rise in September 2024. However, over the year to October 2024, sales volumes rose by 2.4%.

When compared with their pre-coronavirus (COVID-19) pandemic level in February 2020, volumes were down by 1.5%.

More broadly, there was a 0.8% rise across the three months to October 2024 when compared with the three months to July 2024. When comparing with the same period last year, there was a 2.5% rise, the largest since March 2022. This was after the 2.6% recent high in September 2024 was revised down to 2.1%. These data are available in our [Retail Sales Index datasets](#).

The reporting period for this bulletin covers 29 September 2024 to 26 October 2024. Historically, school half term for England and Wales typically falls within the October reporting period but did not for October 2024. This is not adjusted for in our seasonal adjustment.

3 . Retail sector volumes

Clothing stores fell back, following three months of growth

Volume sales, monthly percentage change, seasonally adjusted, Great Britain, October 2024

Clothing stores fell back, following three months of growth

Volume sales, monthly percentage change, seasonally adjusted, Great Britain, October 2024

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

Notes:

1. Non-store retailing refers to retailers that do not have a store presence. While the majority is made up of online retailers, it also includes other retailers, such as stalls and markets.
2. More data are available in our [Retail Sales Index datasets](#).

Non-food stores sales volumes – the total of department, clothing, household and other non-food stores – fell by 1.4% in October 2024, following a rise of 2.3% in September. Retailers across a range of industries suggested that low consumer confidence and uncertainty around the Budget announcement (which took place on 30 October 2024) affected sales.

The strongest subsector fall was within clothing stores, which fell by 3.1% over the month to October 2024. This fall follows growth in previous months attributed to end of season sales and improved weather, see [Retail sales. Great Britain August 2024](#).

Other non-food stores also fell by 1.4% over the month following strong growth in September 2024. Within this subsector, the strongest downward contribution was from other retail sales (not elsewhere specified), which includes activities of commercial art galleries.

4 . Online retail values

Online sales fell across all main sectors, highest within non-food retailers

Value sales, monthly percentage change, seasonally adjusted, Great Britain, October 2024

Online sales fell across all main sectors, highest within non-food retailers

Value sales, monthly percentage change, seasonally adjusted, Great Britain, October 2024

Source: Monthly Business Survey, Retail Sales Inquiry from the Office for National Statistics

Notes:

1. Non-store retailing refers to retailers that do not have a store presence. While the majority is made up of online retailers, it also includes other retailers, such as stalls and markets.
2. More data, such as the proportion of sales made online, are available in our [Retail Sales Index internet sales datasets](#).

The amount spent online, known as "online spending values", fell by 1.2% during October 2024, but rose by 5.0% when compared with October 2023.

Total spend – the sum of in-store and online sales – fell by 0.6% over the month. As a result, the proportion of sales made online decreased from 27.8% in September 2024 to 27.7% in October 2024.

5 . Data on retail sales

Estimates in this table have been produced by combining a breakdown of commodity sales from 54 large retailers with total sales from other retailers.

The monthly periods consist of 4 weeks except for March, June, September and December which are 5 weeks. January 2020 is also a 5 week period.

The quarterly indices are the weighted averages of the monthly indices for the months within the quarter, the weights being the number of weeks in each monthly period.

¹ The Food, drink and tobacco category, Household goods category and Other non-food category include revisions to the commodity classifications provided by respondents.

In July 2018, we increased our sample for the commodity breakdown from 31 to 54 retailers to improve coverage and better represent the commodities sold. Growth rates may not be comparable as a result. This does not impact the main retail sales data.
