1 . Main points

- The seasonally adjusted total Direct Debit failure rate decreased by 1% in September 2025, compared with the previous month, but was 7% higher than September 2024 (Vocalink).
- In our latest Opinions and Lifestyle Survey (OPN), 65% of adults reported that their cost of living had increased over the past month, this was 3 percentage points higher than in August 2025 (62%), and 13 percentage points higher than in September 2024 (52%) (initial findings for September 2025 from our OPN, publishing on 17 October 2025).
- The total number of ship visits to major UK ports decreased by 9% in the week to 5 October 2025, compared with the previous week and decreased by 13% when compared with the equivalent week of 2024; ports in Northern Ireland saw the largest decrease, potentially suggesting a regional variation in the impact of Storm Amy (exactEarth).
- The seasonally adjusted number of daily UK flights decreased by 1% in the week to 5 October 2025, compared with the previous week, but remained broadly unchanged when compared with the equivalent week of 2024 (EUROCONTROL).
- The System Average Price (SAP) of gas decreased by 5% in the week to 5 October 2025, compared with the previous week, from 2.737 pence per kilowatt hour (p/kWh) to 2.613p/kWh, and decreased by 20% compared with the equivalent week of 2024 (National Gas Transmission).
- The number of Energy Performance Building Certificates (EPCs) lodged for new dwellings in England and Wales decreased by 9% in the week to 5 October 2025, compared with the previous week, but increased by 2% when compared with the equivalent week of 2024 (Ministry of Housing, Communities and Local Government).

These are official statistics in development, and we advise caution when using the data. The data sources used to compile these indicators are regularly reviewed to ensure they are representative and relevant, which may mean indicators change at short notice. 2 . Latest indicators at a glance

Notes:

1. Card spending over time increased because of the impacts of both inflation on value of transactions and cash-to-card conversion.
2. Indicators with “SA” in the title have been seasonally adjusted.
3. Existing weekly EPC data can show sudden spikes when housing associations lodge multiple expired EPCs at once.

4 . Glossary

Real-time indicator

A real-time indicator provides insights into economic activity using close-to-real-time big data, administrative data sources, rapid response surveys or experimental estimates, which represent useful economic and social concepts.

Seasonal adjustment

Seasonal adjustment is the identification and removal of consistent and systematic variation in time series associated with the time of year. For more information on seasonal variation, and how we implement seasonal adjustment, see Section 2 of our [Economic activity and social change in the UK, real-time indicators methodology article](#).

5 . Data sources and quality

Official statistics in development

These statistics are labelled as [official statistics in development](#). Until September 2023, these were called "experimental statistics". Read more about the change in our [Guide to official statistics in development](#).

We are developing how we collect and produce the data to improve the quality of these statistics. Find out more in our [Economic activity and social change in the UK, real-time indicators methodology article](#).

Once the developments are complete, we will review the statistics with the Statistics Head of Profession. We will decide if the statistics are of sufficient quality and value to be published as official statistics, or if further development is needed. Production may be stopped if they are not of sufficient quality or value. Users will be informed of the outcome and any changes.

We value your feedback on these statistics. If you would like to get in touch, please email realtime.indicators@ons.gov.uk.

Dataset release dates and intended release frequency

Strengths and limitations

These statistics have been produced to provide timely indicators of the effect of developing world events on the UK economy and society. We use close-to-real-time big data, administrative data sources, rapid response surveys, or official statistics in development.

The data presented in this bulletin are reviewed and refreshed on a regular basis. Indicators are swapped in and out of the publication based on their suitability and availability.

Seasonality

Seasonal fluctuations are likely to be present in many of these indicators, so caution must be applied when interpreting changes in series that are not seasonally adjusted.
