

Statistical bulletin

Index of Production, UK: October 2021

Movements in the volume of production for the UK production industries: manufacturing, mining and quarrying, energy supply, and water and waste management. Figures are seasonally adjusted.

Table of contents

1. [Main points](#)
2. [Index of Production data](#)
3. [Measuring the data](#)
4. [Related links](#)

1 . Main points

- Monthly production fell by 0.6% between September 2021 and October 2021, meaning output was 2.1% below its February 2020 level, the last month of “normal” trading conditions prior to the coronavirus (COVID-19) pandemic.
- The monthly decline in output was the result of falls in two of the four production sectors, with equal negative contributions from the electricity and gas sector, which fell by 2.9%; and the mining and quarrying sector, which fell by 5.0%.
- Of the four production sectors, monthly manufacturing output remained 2.5% below its February 2020 level, mining and quarrying was 8.5% below and electricity and gas was 1.6% below; in contrast, water supply and sewerage was 6.1% above its February 2020 level.
- Within manufacturing, output remained flat between September 2021 and October 2021, highlighting a mixed picture across the sector; most notably, the fall of 9.5% from the manufacture of machinery and equipment not elsewhere classified, which was partially offset by a rise of 8.6% in the manufacture of basic pharmaceutical products and pharmaceutical preparations.
- Production output for the three months to October 2021 increased by 0.5%, compared with the three months to July 2021, led by a 25.5% rise from mining and quarrying; the rise in mining and quarrying was led by a strong increase in extraction of crude petroleum and natural gas of 30.2%, following the reopening of oil fields after a period of maintenance during April to June 2021.
- For further and detailed analysis of the effect on our monthly Index of Production estimate, please see [GDP monthly estimate, UK: October 2021](#), published today (10 December 2021).

2 . Index of Production data

[Index of Production time series](#)

Dataset DIOP | Released 10 December 2021

Movements in the volume of production for the UK production industries: manufacturing, mining and quarrying, energy supply, and water and waste management. Figures are seasonally adjusted.

[Output of the production industries](#)

Dataset | Released 10 December 2021

Index values and growth rates for production, manufacturing and the main industrial groupings in the UK.

[Index of Production and industry sectors to four decimal places](#)

Dataset | Released 10 December 2021

Monthly index values for production and the main Index of Production (IoP) sectors in the UK to four decimal places.

[Monthly Business Survey turnover in production industries](#)

Dataset | Released 10 December 2021

Monthly Business Survey (MBS) production industries’ total turnover, domestic sales and exports in the UK. Figures are in current price and non-seasonally adjusted.

[Export proportions for manufacturing industries](#)

Dataset | Released 10 December 2021

Monthly, three-monthly and annual export data for the manufacturing industries, collected by the MBS at industry level in the UK.

All data related to the IoP are available on the [Related data page](#).

3 . Measuring the data

The Index of Production (IoP) uses data from a variety of sources and is calculated by taking turnover and removing the impact of price changes or by using direct volume estimates.

The majority of these data are collected as “turnover values” through the Monthly Business Survey (MBS). In addition, direct volume series are collected by the Department for Business, Energy and Industrial Strategy (BEIS) and the International Steel Statistics Bureau (ISSB) for steel industries.

From January 2018, Value Added Tax (VAT) data have also been included across 64 production industries for small and medium-sized businesses. For more information, see [VAT turnover data in national accounts: background and methodology](#).

A comprehensive list of the IoP source data can be found in the [Gross domestic product \(GDP\(O\)\) source catalogue \(XLS, 715KB\)](#).

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in the UK [IoP QMI](#).

Coronavirus (COVID-19)

The Office for National Statistics’ (ONS’) Monthly Business Survey (MBS) is fully online, meaning that business owners can logon from any location and submit their data at an appropriate time. Most other data in the IoP come from the BEIS and therefore will be less impacted than survey data.

Our latest data and analysis on the impact of coronavirus (COVID-19) on the UK economy and population is now available on a [new web page](#). This will be the hub for all special coronavirus-related publications, including the fortnightly Business Insights and Conditions Survey (BICS).

Consultation on the Code of Practice for Statistics – proposed change to 9:30am release practice

On behalf of the UK Statistics Authority, the Office for Statistics Regulation (OSR) is conducting a [consultation on the Code of Practice for Statistics, proposing changes to the 9.30am release practice](#). Please send comments by 21 December 2021 to: regulation@statistics.gov.uk.

Economic statistics governance after EU exit

Following the UK’s exit from the EU, new governance arrangements are being put in place that will support the adoption and implementation of high-quality standards for UK economic statistics. These governance arrangements will promote international comparability and add to the credibility and independence of the UK’s statistical system.

At the centre of this new governance framework will be the new National Statistician’s Committee for Advice on Standards for Economic Statistics (NSCASE). NSCASE will support the UK by ensuring its processes for influencing and adopting international statistical standards are world leading. The advice NSCASE provides to the National Statistician will span the full range of domains in economic statistics, including the National Accounts, fiscal statistics, prices, trade and the balance of payments and labour market statistics.

4 . Related links

[International comparisons of GDP during the coronavirus \(COVID-19\) pandemic](#)

Article | Released 1 February 2021

The coronavirus (COVID-19) pandemic has led to record declines in gross domestic product (GDP) in advanced economies in 2020. International comparisons show that the UK has experienced the largest contraction in volume GDP among the G7 countries. However, international comparisons have also been complicated by how National Statistical Institutes (NSIs) record non-market output.

[Comparison of motor vehicle manufacturing output statistics, UK: 1997 to 2019](#)

Article | Released 10 January 2020

A comparison of the methodologies used to estimate motor vehicle manufacturing outputs by the Office for National Statistics (ONS) and the Society of Motor Manufacturers and Traders (SMMT).

[A comparison between official estimates of UK output and diffusion indices](#)

Article | Released 21 October 2019

The level of correlation between ONS data and IHS Markit and Chartered Institute of Procurement and Supply Purchasing Managers' Indices.

[GDP monthly estimate, UK: October 2021](#)

Bulletin | Released 10 December 2021

GDP measures the value of goods and services produced in the UK. It estimates the size of and growth in the economy and includes the Index of Production (IoP), Index of Services (IoS) and construction output in Great Britain.

[Producer price inflation, UK: October 2021](#)

Bulletin | Released 17 November 2021

The corresponding price indices used to deflate the IoP are published in the monthly publication of UK producer price inflation.

[UK manufacturers' sales by product \(ProdCom\): 2020 results](#)

Bulletin | Released 11 August 2021

Product sales by manufacturers are published on an annual basis in ProdCom statistical bulletins; estimates are in current prices, unlike the chained volume measures published in the IoP release.

[Energy Trends: 28 October 2021](#)

Bulletin | Released 28 October 2021

The data published by the Department for Business, Energy and Industrial Strategy (BEIS) in Energy Trends are used to measure the mining and quarrying, electricity and gas, and manufacture of coke and refined petroleum products sectors within this release.
