1 . Main points

- Initial estimates show that the public sector recorded a £30.4 billion surplus in January 2026, £15.9 billion higher than, or double that of January 2025, and £6.3 billion above the Office for Budget Responsibility's November 2025 forecast; the highest surplus in any month since records began in 1993 (not adjusted for inflation).
- In January, tax receipts are always higher than in other months, because of receipts from self-assessed taxes; combined self-assessed Income and Capital Gains Tax receipts were provisionally estimated at £46.4 billion in January 2026, £10.5 billion more than January 2025.
- Borrowing in the financial year to January 2026 was £112.1 billion; this was £14.6 billion or 11.5% less than in the same 10-month period a year ago, but still the fifth-highest April to January borrowing on record (not adjusted for inflation).
- Borrowing in the financial year to January 2026 was provisionally estimated at 3.7% of gross domestic product (GDP); this was 0.7 percentage points less than in the same 10-month period a year ago.
- The current budget - borrowing to fund day-to-day public sector activities - was in surplus by £40.9 billion in January 2026; this brings the total current budget deficit in the financial year to January 2026 to £55.9 billion, which is £18.0 billion or 24.3% less than in the same 10-month period a year ago.
- Public sector net debt excluding public sector banks - a measure of the amount of money owed to the UK private sector and overseas less any liquid assets held - was provisionally estimated at 92.9% of GDP at the end of January 2026 and remains at levels last seen in the early 1960s.
- Public sector net financial liabilities excluding public sector banks - which considers a wider range of financial assets and liabilities than net debt - were provisionally estimated at 82.4% of GDP at the end of January 2026, 10.5 percentage points less than for public sector net debt.
- Central government net cash requirement (excluding UK Asset Resolution Ltd and Network Rail) - the additional cash needed to be raised from the financial markets to finance activities - was in surplus by £39.8 billion in January 2026; this was a £24.6 billion or 161.4% larger surplus than in January 2025.

2 . January 2026 indicators at a glance

3 . Borrowing in January 2026

Initial estimates show that the public sector recorded a £30.4 billion surplus in January 2026, £15.9 billion higher than in January 2025, and £6.3 billion above the Office for Budget Responsibility’s forecast.

Figure 1: This month’s surplus was more than double that of January last year

2. Positive numbers indicate a deficit; negative numbers a surplus.

Table 1: Public sector monthly net borrowing summary
Public sector net borrowing by subsector January 2026 compared with January 2025, £ billion, UK

Sub-sector	January 2026 (£ billion)	January 2025 (£ billion)	Difference (£ billion)	Difference (%)
Central government net borrowing	-31.2	-13.7	-17.4	-126.9
Local government net borrowing	3.3	3.9	-0.6	-16.2
Total public corporations net borrowing	-2.5	-4.6	2.2	46.6
Of which: non-financial public corporations	-0.6	-0.6	0.0	-6.4
Of which: funded public sector pensions	-0.2	-0.1	-0.1	-36.7
Of which: Bank of England	-1.7	-3.9	2.2	57.5
Public sector net borrowing	-30.4	-14.5	-15.9	-110.0
Memo item: Public sector current budget deficit	-40.9	-22.9	-18.0	-78.5
Memo item: Central government net cast requirement [note 3]	-39.8	-15.2	-24.6	-161.4

Source: Public sector finances from the Office for National Statistics

Notes

1. Figures exclude public sector banks: with effect from June 2024, there are no institutions classified to this subsector.
2. Figures may not sum because of rounding.
3. Excludes Network Rail Limited and UK Asset Resolution Limited.
4. A breakdown of net borrowing by subsector and a summary of central government receipts and expenditure data are presented in Tables 1 to 3 in our Public sector finances summary tables: Appendix M dataset.

Our [Public sector finances borrowing by subsector: Appendix R dataset](#) provides further detail on data presented in Table 1, including transactions related to borrowing by each subsector and their contribution to total public sector borrowing in a matrix table format. The time period presented in the matrix table can be changed using the dropdown box feature.

Central government borrowing

Central government forms the largest part of the public sector and includes government departments such as HM Revenue and Customs, the Department of Health and Social Care, the Department for Work and Pensions, the Department for Education, the Ministry of Defence, and other government agencies.

The relationship between central government's receipts and expenditure is an important determinant of public sector net borrowing. Of the £30.4 billion public sector surplus in January 2026, central government surplus was £31.2 billion. Each of the other subsectors showed a small surplus except for local government which borrowed £3.3 billion.

Central government current receipts

In January, tax revenue is always higher than in other months because of receipts from self-assessed (SA) taxes. This often leads to a surplus, with income exceeding expenditure, rather than borrowing.

Central government's current receipts were £133.3 billion in January 2026, which is £16.2 billion or 13.8% more than in January 2025. Of this £16.2 billion increase in income:

- central government tax receipts increased by £13.3 billion to £109.7 billion; this included increases of £12.3 billion in Income Tax receipts (including PAYE and self-assessed Income Tax), £0.7 billion in Corporation Tax receipts, and a £0.1 billion decrease in Value Added Tax (VAT) receipts
- compulsory social contributions increased by £2.9 billion to £17.7 billion, as [changes to the rate of National Insurance contributions](#) paid by employers came into effect on 6 April 2025

A detailed breakdown of central government income is presented in our [Public sector current receipts: Appendix D dataset](#).

In the most recent months, tax receipts recorded on an accrued basis are subject to some uncertainty. This is because many taxes, such as VAT, PAYE, and Corporation Tax, contain some forecast cash receipts data. These data are liable to revision when actual cash receipts data are received.

The forecasts underlying our current tax estimates reflect the expectations published in the [Economic and fiscal outlook - November 2025 report](#) from the Office for Budget Responsibility (OBR).

In January 2026, SA Income Tax receipts were provisionally estimated at £29.4 billion, £3.6 billion more than in January 2025, and £1.7 billion more than the £27.7 billion forecast by the OBR in November 2025.

SA Capital Gains Tax receipts were provisionally estimated at £17.0 billion, £7.0 billion more than in January 2025, and £1.1 billion more than the £15.9 billion forecast by the OBR.

Tax payments made close to the deadline of 31 January each year, and the time taken for those to then appear in administrative data, mean that the proportion of self-assessed taxes recorded in January and February can vary year-on-year. Therefore, it is advisable to consider these two months together when making annual comparisons.

Central government current expenditure

Central government spending data for January 2026 are provisional. There is uncertainty around these estimates until more detailed departmental information becomes available over time.

Central government's current expenditure - spending to fund its day-to-day activities - was provisionally estimated as £86.1 billion in January 2026, which is £0.6 billion, or 0.7%, less than in January 2025. Of this £0.6 billion reduction in spending:

- central government debt interest payable decreased by £5.0 billion to £1.5 billion, with movements in the Retail Prices Index (RPI) adding volatility to the monthly debt interest costs

- current grants paid to the rest of the world decreased by £0.6 billion to £0.5 billion, reflecting both a reduction in payments to the EU and a change in the monthly pattern of ongoing payments
- central government departmental spending on goods and services increased by £2.3 billion to £39.5 billion, as pay rises and inflation increased running costs
- net social benefits paid by central government increased by £1.8 billion to £27.9 billion; this was largely caused by inflation-linked increases in many benefits and earnings-linked increases to state pension payments
- payments to support the day-to-day running of local government increased by £0.8 billion to £12.2 billion; these intra-government transfers are both central government spending and a local government receipt, so they have no effect on overall public sector borrowing

Central government debt interest costs

Borrowing is largely financed by the issuance of central government gilts by the Debt Management Office, on which interest is paid to investors.

Central government debt interest payable in January 2026 was £1.5 billion, £5.0 billion less than in January last year.

The interest payable on index-linked gilts rises and falls with the RPI, adding volatility to central government debt interest costs. This additional RPI inflation-linked component of interest is described as “capital uplift” and affects the value of the gilt principal.

In January 2026, the capital uplift reduced the total central government interest payable by £2.8 billion. This largely reflects the 0.4% decrease in the RPI between October and November 2025.

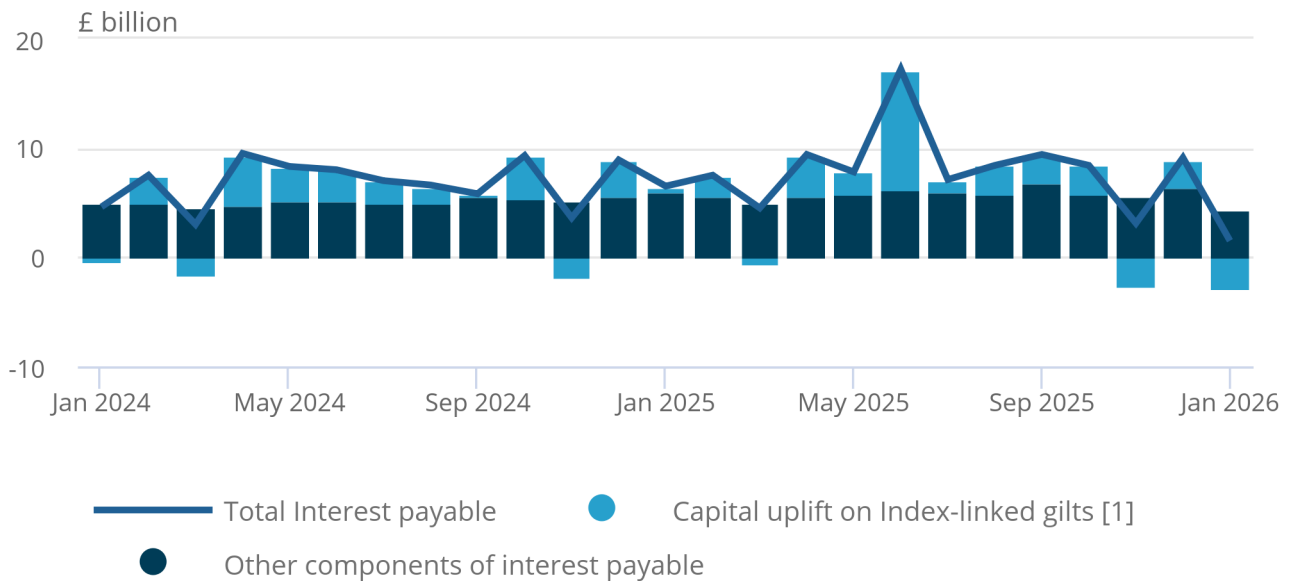

Capital uplift is accrued throughout the life of each index-linked gilt but is paid to gilt holders as interest at redemption. Accrued capital uplift is shown as the light blue portion of each stacked bar in Figure 2.

Figure 2: Recent movements in the Retail Prices Index reduced the overall central government debt interest payable in January 2026 by £2.8 billion

Central government debt interest payable, £ billion, UK, January 2024 to January 2026

Figure 2: Recent movements in the Retail Prices Index reduced the overall central government debt interest payable in January 2026 by £2.8 billion

Central government debt interest payable, £ billion, UK, January 2024 to January 2026

Source: Public sector finances from the Office for National Statistics

Notes:

1. Net of redemption proceeds.
2. Dataset identifier codes: NMFx, JNYY and JNYX.

Central government net investment

Central government net investment was £12.4 billion in January 2026, £0.7 billion less than in January 2025.

This decrease was largely because of a £3.0 billion reduction in the quarterly payment from HM Treasury to the Bank of England (BoE) Asset Purchase Facility (APF) Fund compared with a year earlier.

These intra-public sector transfers have no impact on overall public sector borrowing because they are recorded as both central government spending and Bank of England receipts.

Comparing our January 2026 borrowing estimates with official forecasts

The independent Office for Budget Responsibility (OBR) is responsible for the production of official forecasts for the UK government. These forecasts are usually produced twice a year, in spring and autumn.

The latest forecast was published in the OBR's [Economic and fiscal outlook - November 2025 report](#).

Table 2: Borrowing was £6.3 billion lower than forecast, mainly because central government received more income than expected while spending was lower than anticipated
Latest public sector finance estimates compared with the corresponding Office for Budget Responsibility forecast, UK, £ billion

January 2026	OBR forecast	ONS estimate	Difference [note 4]
Central government total current receipts	131.4	133.3	1.9
Central government total expenditure	105.4	102.1	-3.2
Central government net borrowing	-26.0	-31.2	-5.1
Local government net borrowing	3.3	3.3	0.0

Notes

1. This table uses the Economic and fiscal outlook - November 2025 and the corresponding monthly profiles published in January 2026.
2. Figures exclude public sector banks: with effect from June 2024, there are no institutions classified to this subsector.
3. Figures may not sum because of rounding.
4. Year-to-date comparisons offer a more reliable view of overall trends, while monthly figures can be more prone to short-term forecast inaccuracies.
5. Includes non-financial public corporation, funded public sector pensions, and the Bank of England.

The UK government has announced that the [Spring forecast will be published on 3 March 2026](#).

4 . Borrowing in the financial year to January 2026

The public sector spent more than it received in taxes and other income in the financial year (FY) to January 2026.

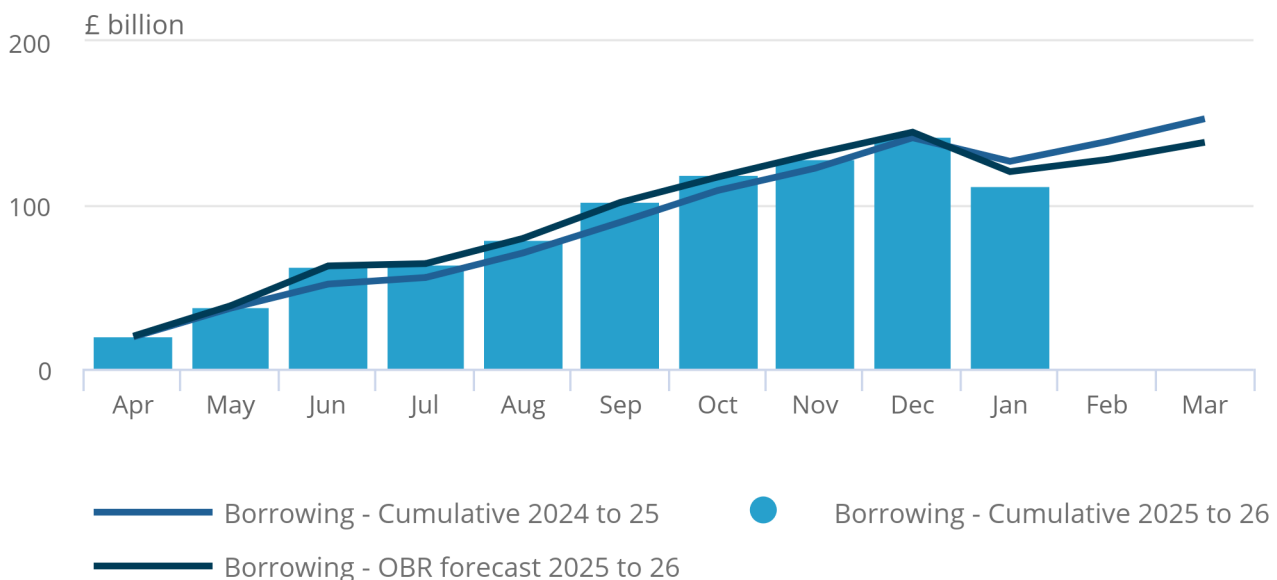

Provisional estimates show borrowing is £112.1 billion over the 10-month period. This is £14.6 billion, or 11.5% less than in the FY to January 2025, and £8.3 billion less than the £120.4 billion forecast by the Office for Budget Responsibility.

Figure 3: Borrowing in the financial year to date is lower than both the OBR forecast and in the same 10-month period a year ago

Cumulative public sector net borrowing excluding public sector banks, £ billion, UK, financial year (FY) to March 2025 and FY to March 2026

Figure 3: Borrowing in the financial year to date is lower than both the OBR forecast and in the same 10-month period a year ago

Notes

1. Figures exclude public sector banks: with effect from June 2024 there are no institutions classified to this subsector.
2. Figures may not sum because of rounding.
3. Excludes Network Rail Limited and UK Asset Resolution Limited.
4. A breakdown of net borrowing by subsector and a summary of central government receipts and expenditure data are presented in Tables 1 to 3 in our Public sector finances summary tables: Appendix M dataset.

Our [Public sector finances borrowing by subsector: Appendix R dataset](#) provides further detail on data presented in Table 3, including transactions related to borrowing by each subsector and their contribution to total public sector borrowing in a matrix table format. The time period presented in the matrix table can be changed using the dropdown box feature.

Central government net borrowing

Central government forms the largest part of the public sector and the relationship between its receipts and expenditure is an important determinant of public sector net borrowing. Of the £112.1 billion borrowed by the public sector in the FY to January 2026, central government borrowed £111.0 billion, with amounts borrowed by other smaller subsectors largely offsetting each other.

Central government current receipts

Central government's current receipts were £922.0 billion in the FY to January 2026, which is £71.4 billion or 8.4% more than in the same 10-month period a year ago. Of this £71.4 billion increase in income:

- central government tax receipts increased by £46.2 billion to £698.4 billion; this included increases of £28.0 billion in Income Tax, £7.8 billion in Value Added Tax (VAT), and £4.7 billion in Corporation Tax receipts
- compulsory social contributions increased by £26.1 billion to £166.4 billion, as [changes to the rate of National Insurance contributions](#) paid by employers came into effect on 6 April 2025

A detailed breakdown of central government income is presented in our [Public sector current receipts: Appendix D dataset](#).

Central government current expenditure

Central government's current expenditure, spending to fund its day-to-day activities, was provisionally estimated at £915.7 billion in the FY to January 2026, which is £58.4 billion or 6.8% more than in the same 10-month period a year ago. Of this £58.4 billion increase in spending:

- central government departmental spending on goods and services increased by £26.9 billion to £384.9 billion, as pay rises and inflation increased running costs
- net social benefits paid by central government increased by £18.7 billion to £275.0 billion, largely caused by inflation-linked increases in many benefits (including Universal Credit), and earnings-linked increases to state pension payments
- interest payable on central government debt increased by £8.0 billion to £81.4 billion, largely because the interest payable on index-linked gilts rises and falls with the Retail Prices Index
- payments to support the day-to-day running of local government increased by £2.3 billion to £123.5 billion; these intra-government transfers have no impact on overall public sector borrowing

Central government net investment

Central government net investment was £81.3 billion in the FY to January 2026, which is £12.4 billion less than in the same 10-month period a year ago.

Over this period, central government made payments totalling £16.7 billion to the Bank of England (BoE) Asset Purchase Facility Fund, which is £19.7 billion less than in the same 10-month period of 2024.

These payments are recorded as both central government net investment expenditure and BoE receipts, so have no impact on overall public sector borrowing.

Local government borrowing

Initial estimates show that local government borrowing was £11.6 billion in the FY to January 2026. This was £0.7 billion less than in the same 10-month period a year ago.

Local government data for the financial year to January 2026 are provisional estimates for the UK. They are largely based on budget data for England, Scotland, and Wales, with estimates included for Northern Ireland. Further information on the quality of our local government data is discussed in [Section 11: Data sources and quality](#).

Public corporations' borrowing

Initial estimates show that public corporations were in surplus by £2.9 billion in the FY to January 2026. This was a £1.7 billion larger surplus than in the same 10-month period a year ago.

Borrowing figures for public corporations in the current financial year are highly provisional and primarily based on the OBR's [Economic and fiscal outlook - November 2025 report](#).

Estimates for FYE March2024 and FYE March2025 use the [Economic and fiscal outlook - October 2024 report](#), supplemented by in year data for train operating companies, the Housing Revenue Account, and surveyed public corporations.

Comparing our financial year to January 2026 estimates with official forecasts

Financial year-to-date comparisons offer a more reliable view of overall trends, while monthly figures can be more prone to short-term forecast volatility.

Table 4: Borrowing was £8.3 billion lower than forecast, largely because central government spending was further below expectation than income
Latest public sector finance estimates compared with the corresponding Office for Budget Responsibility forecast, UK, £ billion

Financial year to January 2026	OBR forecast	ONS estimate	Difference [note 4]
Central government total current receipts	923.8	922.0	-1.8
Central government total expenditure	1,040.8	1,033.0	-7.8
Central government net borrowing	116.9	111.0	-5.9
Local government net borrowing	13.0	11.6	-1.4
Total public corporations net borrowing [note 5]	-9.5	-10.5	-1.0
Public sector net borrowing	120.4	112.1	-8.3
Memo item: Public sector current budget deficit	59.3	55.9	-3.4

Source: Public sector finances from the Office for National Statistics

Notes

1. This table uses the Economic and fiscal outlook - November 2025 and the corresponding monthly profiles published in January 2026.
2. Figures exclude public sector banks: with effect from June 2024, there are no institutions classified to this subsector.
3. Figures may not sum because of rounding.
4. Year-to-date comparisons offer a more reliable view of overall trends, while monthly figures can be more prone to short-term forecast inaccuracies.
5. Includes non-financial public corporation, funded public sector pensions and the Bank of England.

5 . Expressing borrowing as a percentage of GDP

Provisional estimates show the public sector borrowed £152.7 billion in the financial year ending (FYE) March 2025. This was the third-highest amount borrowed in any financial year since records began in FYE March 1947. However, these estimates have not been adjusted for inflation.

Expressing borrowing as a ratio of gross domestic product (GDP), the value of everything produced in the UK economy in a 12-month period, gives an estimate of its affordability and provides a more consistent measure for comparison of the UK's fiscal position over time.

Figure 4: Financial year borrowing as a percentage of GDP has been stable at around 5% since the coronavirus (COVID-19) pandemic period

Public sector net borrowing excluding public sector banks, percentage of gross domestic product (GDP), UK, financial year ending (FYE) March 1901 to FYE March 2025

Figure 4: Financial year borrowing as a percentage of GDP has been stable at around 5% since the coronavirus (COVID-19) pandemic period

Public sector net borrowing excluding public sector banks, percentage of gross domestic product (GDP), UK, financial year ending (FYE) March 1901 to FYE March 2025

Source: Public sector finances from the Office for National Statistics and Office for Budget Responsibility

Notes:

1. Dataset identifier code: -J5IJ.
2. This chart uses historical data published in the [Public finances databank 2025 to 2026](#).

In the financial year to January 2026, borrowing has been provisionally estimated at 3.7% of GDP. This was 0.7 percentage points less than during the same 10-month period a year ago and was the fifteenth-highest borrowing ratio in any April to January period since monthly records began in 1993.

The Office for Budget Responsibility forecasts that borrowing will reach 4.5% of GDP in the financial year to March 2026.

6 . The public sector balance sheet

The public sector balance sheet describes its financial position at a point in time. It shows its liabilities (amounts owed) and its assets (amounts owned). There are several measures of the public sector balance sheet that we discuss in our [What the UK government owns and what it owes blog](#).

Table 5: The public sector balance sheet
Balance sheet measures as at the end of January 2026, £ billion, UK

Classification of assets and liabilities [note 1] [note 2] [note 10]	Central government gilts	General government gross debt	PSND excluding both BoE and public sector banks (PSND ex BoE)	PSND excluding public sector banks (PSND ex)	PSNFL excluding public sector banks	Public sector net worth excluding public sector banks

Other financial liabilities [note 7]					725.7	725.7

Source: Public sector finances from the Office for National Statistics and Debt Management Office

Notes

1. All aggregates are presented on a 2010 European system of national and regional accounts (ESA 2010) (PDF 6.4MB) basis unless indicated.
2. Consolidation between subsectors mean that the size of assets and liabilities (such as gilts) impacting on the measure can change as the coverage increases.
3. Total equals liabilities less assets except public sector net worth, where total equals assets less liabilities.
4. Non-financial account data based on the UK national balance sheet.
5. "Liquid financial assets" mainly consists of foreign exchange reserves and cash deposits. "Illiquid financial assets" includes assets such as loans, financial derivatives, and other accounts receivable.
6. Gilt liabilities have been adjusted to remove those held by Pool Re which is classified as a central government body.
7. "Other financial liabilities" includes monetary gold and special drawing rights, standardised guarantees, financial derivatives, funded pension liabilities, and other accounts payable.
8. Figures may not sum because of rounding.
9. We publish an additional presentation of the UK public sector balance sheet following International Monetary Fund's Government Finance Statistics framework in the public sector finances: Appendix E.
10. PSND - Public sector net debt and PSNFL - public sector net financial liabilities.

As a part of the quantitative easing activities of the Bank of England (BoE), it purchased central government gilts from the market through the Asset Purchase Facility (APF) fund. These gilt holdings consolidate within the public sector balance sheet, leaving only the difference between their purchase price and their redemption value.

Subsequent movements in the market value of these consolidated gilt holdings have no impact on the public sector balance sheet.

The reserves created by the BoE and subsequently loaned to the APF to purchase these gilts remain on the public sector balance sheet as a liability in currency and deposits until the loan is repaid.

Our [Public sector balance sheet tables: Appendix N dataset](#) presents a detailed reconciliation between the balance sheet measures summarised in Table 5.

Public sector net debt

Public sector net debt excluding public sector banks (PSND ex) is a widely quoted balance sheet measure.

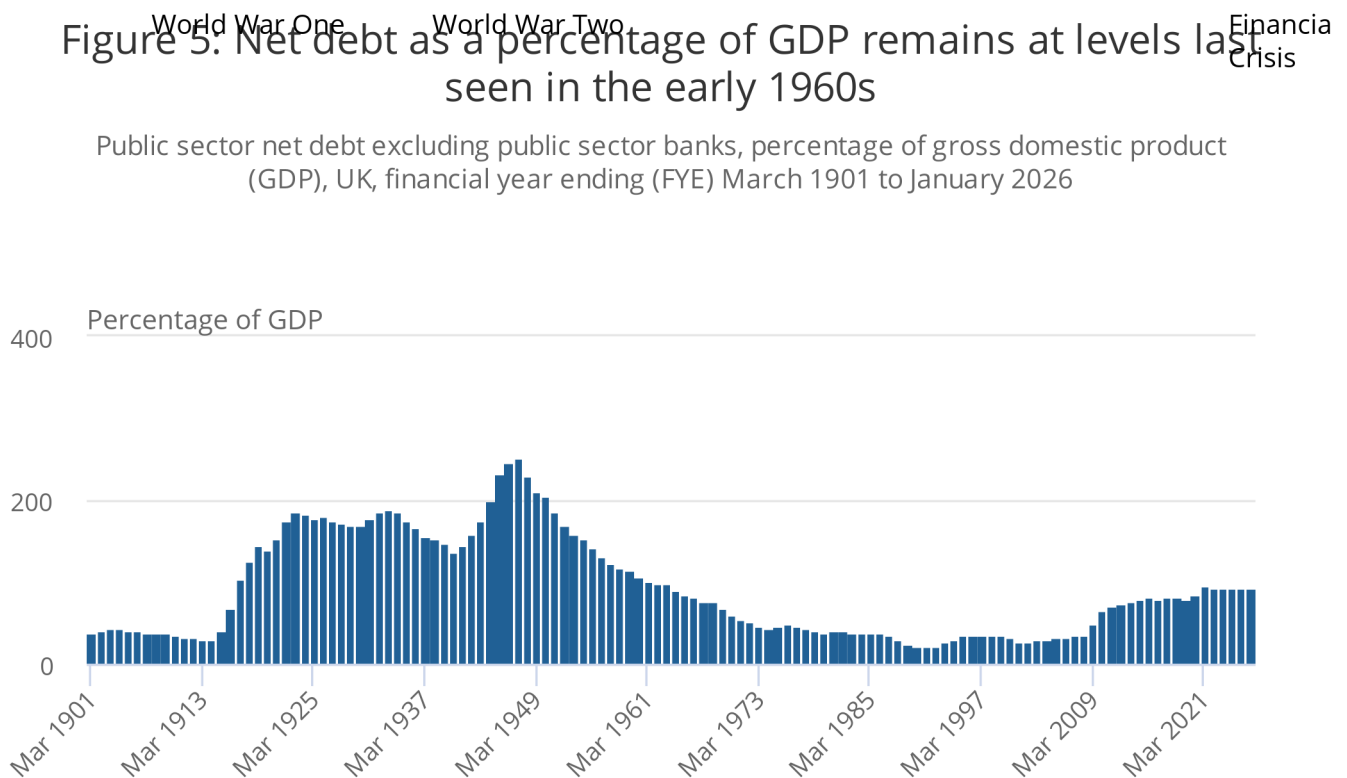

Expressing net debt as a ratio of gross domestic product (GDP) gives an estimate of its affordability and provides a more consistent measure for comparison of the UK's fiscal position over time.

The net debt-to-GDP ratio at the end of January 2026 was provisionally estimated at 92.9%, which is equal to that of 12-months ago. This was 2.4 percentage points below the Office for Budget Responsibility's November 2025 forecast; however, this is a highly provisional estimate.

Our [How the ONS estimates UK debt to GDP figures blog](#) explains why our estimates of the debt to GDP ratio are susceptible to revision.

Figure 5: Net debt as a percentage of GDP remains at levels last seen in the early 1960s

Public sector net debt excluding public sector banks, percentage of gross domestic product (GDP), UK, financial year ending (FYE) March 1901 to January 2026

Source: Public sector finances from the Office for National Statistics and Office for Budget Responsibility

Notes:

1. Dataset identifier code: HF6X.
2. This chart uses historical data published in the [Public finances databank 2025 to 2026](#).

Public sector net financial liabilities

Public sector net financial liabilities (PSNFL ex) were 82.4% of GDP at the end of January 2026, 1.7 percentage points more than at the end of January 2025.

PSNFL ex adds further financial assets and financial liabilities to those recorded in debt (PSND ex).

These extra financial assets are currently valued at more than the extra financial liabilities. This means that at 82.4% of GDP, PSNFL ex was 10.5 percentage points of GDP less than PSND ex at the end of January 2026.

We explain the financial assets and liabilities captured in PSNFL ex in our [Public sector net financial liabilities \(PSNFL\) methodology](#).

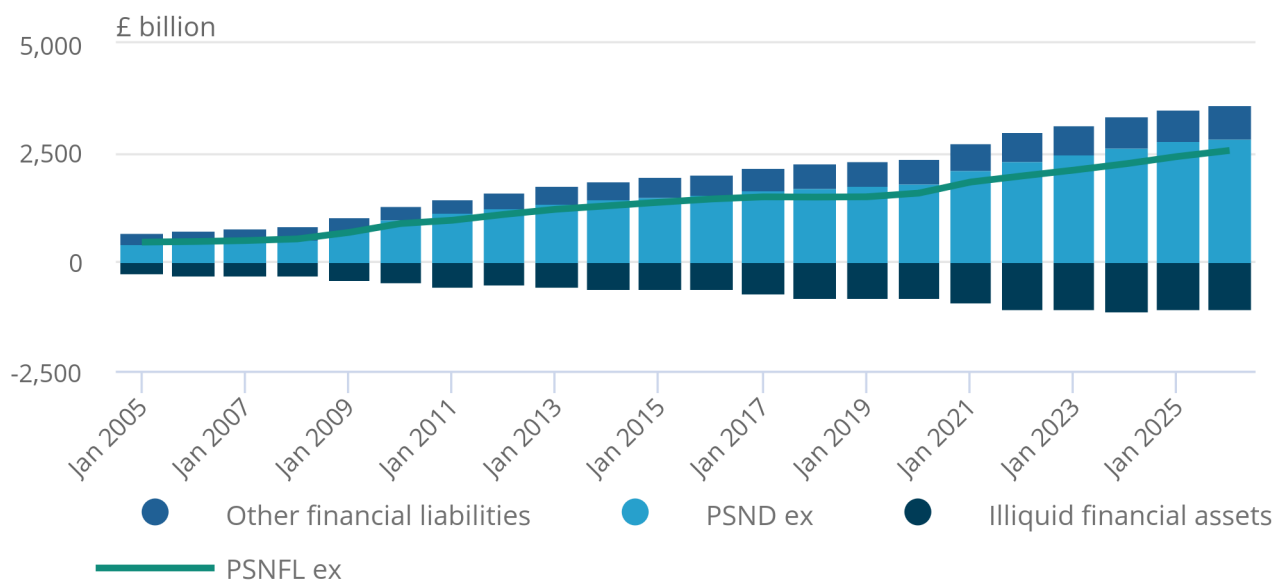

Additionally, we published [a blog explaining the PSNFL measure](#), because it has been selected by the UK government as the reference for a balance sheet fiscal rule.

Figure 6: The upward trend in public sector net financial liabilities is largely because of increases in net debt

Notes:

1. Dataset identifier codes: KSE6, JMET, JMEU and CPNF.
2. PSND ex abbreviates public sector net debt excluding public sector banks.
3. PSNFL ex abbreviates public sector net financial liabilities excluding public sector banks.

The additional financial assets and liabilities included in PSNFL ex that fall outside of the PSND ex boundary are not updated monthly. Instead, they are updated quarterly, or when data become available. These data were last updated on 19 December 2025 and will next be updated on 20 March 2026.

A more detailed presentation of the public sector balance sheet is available in our [Public sector net worth: Appendix O dataset](#), released on 19 December 2025.

7 . UK fiscal targets

The [UK government has legislated for fiscal targets](#) to constrain its management of the public finances. The Autumn Budget 2024 announced that from January 2025, these fiscal targets focus on the public sector current budget deficit and public sector net financial liabilities.

The targets are that by the end of the financial year ending (FYE) 2030, the current budget should be brought into surplus, and that public sector financial liabilities should be falling relative to the size of the economy (or gross domestic product - GDP) compared with the previous year.

Our latest figures show that:

- the public sector current budget deficit was £76.7 billion in the FYE March 2025; this was £10.2 billion more than in the FYE March 2024
- public sector net financial liabilities were provisionally estimated at 81.1% of GDP at the end of March 2025; this was 1.6 percentage points more than at the end of March 2024

8 . Revisions

The data for the latest months of every release contain a degree of forecasts. These are then replaced by improved estimates, as further data are made available, and finally by outturn data.

Our initial estimates of borrowing for the most recent months are prone to revisions in later months. This is because some tax receipts contain a degree of Office for Budget Responsibility-based forecast data. Both central government and local government spending profiles are provisional.

Table 6: Revisions to public sector net borrowing by subsector
Public sector net borrowing by subsector compared with the previous publication, UK, £ billion

Sub-sector	Financial year to December 2025 (£ billion)	Change since January 2026 publication [note 3] (£ billion)	Financial year ending March 2025 (£ billion)	Change since January 2026 publication [note 3] (£ billion)
Central government net borrowing	142.2	2.0	154.5	0.5
Local government net borrowing	8.3	0.0	17.0	0.0
Total public corporations net borrowing	-8.0	0.1	-18.8	0.0
Of which: non-financial public corporations	-2.3	0.1	-2.6	0.0
Of which: funded public sector pensions	-1.8	0.0	-1.7	0.0
Of which: Bank of England	-3.9	0.0	-14.5	0.0
Public sector net borrowing	142.4	2.0	152.7	0.5
Memo item: Public sector current budget deficit	96.8	1.9	76.7	0.5

Source: Public sector finances from Office for National Statistics

Notes

1. Figures may not sum because of rounding.
2. Figures exclude public sector banks: with effect from June 2024, there are no institutions classified to this subsector.
3. A positive figure indicates that we have increased our previously published estimate; conversely, a negative figure indicates that we have reduced our previous estimate.
4. Public sector finances summary tables: Appendix M dataset compares our latest public sector finances data with those in our Public sector finances, UK: December 2025 bulletin, published on 22 January 2026 in more detail.

Our [Public sector finance revisions analysis: Appendix P dataset](#) records monthly borrowing data, as at first and at subsequent publications, graphically illustrating any potential bias to our early estimates.

Revisions to public sector net borrowing in the financial year to December 2025

Since publishing our [Public sector finances, UK: December 2025 bulletin](#), we have increased our estimate of public sector net borrowing (PSNB ex) in the first nine months of the financial year by £2.0 billion to £142.4 billion.

This increase was because of regular monthly updates to our central government data, with our previous estimate of receipts reduced by £1.2 billion, and spending increased by £0.8 billion.

More specifically, we reduced each of our estimates for both total central government tax receipts and National Insurance contributions by £0.6 billion. Meanwhile we increased our estimate of expenditure on goods and services by £0.4 billion and our estimate of current grants (excluding those paid to local government) by £0.5 billion.

Revisions to public sector net borrowing in the financial year ending March 2025

We have reduced our estimate of borrowing in FYE March 2025 by £0.5 billion to £152.7 billion. This reduction was because of updated source data, specifically a reduction of £0.5 billion to our previous estimate of Corporation Tax receipts.

Revisions to public sector net debt at the end of December 2025

We have reduced our estimate of public sector net debt (PSND ex) at the end of December 2025 by £12.1 billion to £2,923.7 billion. This is because of regular monthly updates to data used to estimate the Bank of England's contribution to debt, which are published one month in arrears.

Revisions to gross domestic product

This month we have updated our previous estimates of nominal gross domestic product (GDP) with those published in our release [GDP first quarterly estimate, UK: October to December 2025](#) statistical bulletin on 12 February 2026.

Published GDP in the latest quarter was slightly higher than previously estimated, meaning that our headline balance sheet figures expressed as a ratio of GDP reduced by 0.1 percentage points in recent periods because of this update.

Combined with the reduction to our previous estimate of net debt, we have lowered our estimate of debt as a percentage of GDP at the end of December 2025 from 95.5% to 95.0%.

Our [How the ONS estimates UK debt to GDP figures blog post](#) explains why our estimates of the debt-to-GDP ratio are susceptible to revision.

9 . Data on public sector finances

[Public sector finances tables 1 to 10: Appendix A](#)

Dataset | Released 20 February 2026

The data underlying the public sector finances statistical bulletin are presented in the tables PSA 1 to 10.

[Public sector current receipts: Appendix D](#)

Dataset | Released 20 February 2026

A breakdown of UK public sector income by latest month, financial year-to-date and full financial year, with comparisons with the same period in the previous financial year.

[Public sector finances summary tables: Appendix M](#)

Dataset | Released 20 February 2026

The latest public sector net borrowing by subsector and a summary of central government receipts and expenditure data.

[Public sector balances sheet tables: Appendix N](#)

Dataset | Released 20 February 2026

A reconciliation of the latest public sector balance sheet measures.

[Public sector finances borrowing by subsector: Appendix R](#)

Dataset | Released 20 February 2026

Public sector finances analytical tables (PSAT) showing transactions related to borrowing by subsector. Total Managed Expenditure (TME) is also provided.

[International Monetary Fund's Government Finance Statistics framework in the public sector finances: Appendix E](#)

Dataset | Released 19 January 2026

Presents the balance sheet, statement of operations and statement of other economic flows for the public sector, compliant with the Government Finance Statistics Manual 2014: GFSM 2014 presentation. Updated quarterly, depending on the availability of data.

[Public sector net worth: Appendix O](#)

Dataset | Released 19 January 2026

Presents the balance sheet for the public sector, consistent with the 2010 European system of national and regional accounts (ESA 2010) and Eurostat's Manual on Government Deficit and Debt (MGDD). Updated quarterly, depending on the availability of data.

10 . Glossary

Public sector

The UK public sector comprises of six subsectors: central government, local government, public non-financial corporations, public-sector-funded pensions, the Bank of England, and public financial corporations.

Figures in this release exclude public sector banks, following the reclassification of NatWest Group to the private sector in June 2024.

Public sector net borrowing

Public sector net borrowing (often referred to as the deficit) is the gap between total expenditure and current receipts. A surplus is shown as a negative figure.

Public sector current budget deficit

Public sector current budget deficit is the difference between current expenditure and current receipts, after accounting for depreciation. It measures the borrowing needed to fund day-to-day activities and is the reference statistic for a UK government fiscal rule. A negative value indicates a surplus.

Both current budget deficit and borrowing are recorded on an accrual basis, that is income when earned and spending when incurred, rather than when cash is paid.

Central government net cash requirement

The central government net cash requirement is the cash the government must raise from financial markets to finance its activities. It reflects the timing of payments and receipts rather than when liabilities arise.

Public sector net debt

Public sector net debt (often referred to as the national debt) measures the public sector's liabilities to the private sector and overseas, net of its liquid financial assets.

Public sector net financial liabilities

Public sector net financial liabilities (often referred to as PSNFL) is a broader balance sheet measure than net debt, capturing all financial assets and liabilities recognised in the national accounts. PSNFL is the reference statistic for a UK government fiscal rule.

Adding non-financial assets to PSNFL results in public sector net worth, the widest measure of the public sector balance sheet.

11 . Data sources and quality

About the statistics

[Economic statistics classifications and developments in public sector finances: January 2026](#)

Article | Released 20 February 2026

Includes the latest economic statistics classification updates and information on future developments to the public sector finance statistics.

[Pensions in the public sector finances: a methodological guide](#)

Guide | Released 4 December 2024

Explains the methods and data sources we use to record pensions in fiscal statistics.

[Monthly statistics on the public sector finances: a methodological guide](#)

Guide | Released 4 October 2023

[Calculation of interest payable on government gilts methodology](#)

Article | Released 18 July 2022

Explains the recording of interest payable to holders of UK government gilts in the UK public sector finances.

[Use of gross domestic product \(GDP\) in public sector fiscal ratio statistics methodology](#)

Article | Released 21 September 2016

Explains the methodology used for the presentation of GDP ratios in the UK PSF publication.

HM Revenue and Customs data quality review

On 8 October 2025, [HM Revenue and Customs \(HMRC\) reported an under-estimation in its VAT cash receipts data for the period April to August 2025](#). HMRC has implemented immediate improvements to quality assurance processes, including comparisons with independent data sources, working with HM Treasury and the Office for National Statistics (ONS). HMRC will also carry out a robust review across all receipts to consider the underlying issue and to identify actions to minimise the risk of similar incidents in future.

We are working with HM Treasury to support this process. The Office for Statistics Regulation will provide an independent perspective on HMRC's review to ensure compliance with the Code of Practice for Statistics.

We reported on progress with work to improve the quality of public sector finance statistics as part of the first quarterly update on the Economic Statistics Plan in our [ONS strategic improvement update: December 2025](#), published on 4 December 2025.

We discuss our plans to deliver further improvements to the quality of our core statistics in our [Driving Forward: Our Plans for 2026 and Beyond blog](#), published on 12 January 2026.

Local government data quality

Local government data for the financial year ending (FYE) March 2026 are provisional estimates for the UK. They are largely based on budget data for England, Scotland, and Wales, and with estimates included for Northern Ireland.

For FYE March 2025, estimates of the current expenditure of local authorities in England are based on published first release data, while capital expenditure and receipts are based on published final outturn data.

Estimates for the devolved administrations for FYE March 2025 are based on published outturn data for Wales, published provisional outturn data for Scotland, and estimates for Northern Ireland.

In recent years, planned local government expenditure initially reported in local authority budgets has been systematically lower than final outturn current expenditure reported in the audited accounts, and generally higher than that reported in final outturn capital expenditure. Therefore, we may include adjustments to increase or decrease the amounts reported at the budget stage.

For FYE March 2025, these adjustments include:

- a £2.4 billion upward adjustment to Scotland's current expenditure

For FYE March 2026, these adjustments include:

- a £2.0 billion upward adjustment to England's current expenditure
- a £0.5 billion upward adjustment to England's capital expenditure
- a £2.4 billion upward adjustment to Scotland's current expenditure

To reflect the most recently available data for housing benefits, we have applied a further £3.0 billion downward adjustment to current expenditure in the FYE March 2026.

Statistical designation

The Office for Statistics Regulation (OSR) independently reviewed the public sector net borrowing, cash requirement and debt accredited official statistics in June 2017. They comply with the standards of trustworthiness, quality, and value in the [Code of Practice for Statistics](#) and should be labelled “accredited official statistics”.

The public sector net financial liabilities and public sector net financial worth statistics are both official statistics. These measures were introduced after June 2017, so have not yet been reviewed by the OSR.

The public sector net worth statistics are labelled as “official statistics in development”. They are based on information from public sector finance and data but in ONS’ non-financial accounts. We are developing how we collect the data and produce the statistics to improve their quality.

1 GDP denominator 12 month moving total to period

2 GDP denominator 12 month centred moving total around period

3 BoE abbreviates Bank of England

4 Time series only available back to 2000 Q1 with "-" denoting no data

5 "-" denotes zero value for that period

Worksheet PS6A: Net borrowing summary, UK, not seasonally adjusted

This worksheet contains one table. Some cells refer to notes which can be found on the notes worksheet tab.

This table contains monthly and financial year to date data

Relationship between columns 11=1+3+6+7+8+10 ; 15=12+13+14

1 Includes capital gains tax paid by households. Includes income tax and capital gains tax paid by corporations.

2 Mainly comprises corporation tax and petroleum revenue tax.

Relationship between columns 18=(15-11)+17 ; 20=18+19 ; 21=15+17+19

3 Mainly national insurance contributions (NICs).

4 Consists largely of gross operating surplus, equates to depreciation for government. Also includes rent receipts.

5 Includes investment income attributable to insurance policy holders

Relationships between columns 1+3+4=5 ; 2+3+4=6 ; 6+7+8=5

1 NRAM = Northern Rock Asset Management, B&B = Bradford and Bingley.

2 NCR = Net Cash Requirement

3 Does not include Net Cash Requirement to Central Government

4 Negative NCR reflects change in financing as from 2014/15 new financing requirements of Network Rail were met through core central government borrowing and are therefore included in main CGNCR.

PSA7D Central Government Net Cash Requirement on own account (receipts and outlays on a cash basis)

Relationships between columns 1+6+7=8; 9+10+11=12; 12-8=13

1 Comprises payments into the Consolidated Fund and all payovers of NICS excluding those for Northern Ireland.

2 Income tax includes capital gains tax and is gross of any tax credits treated by HM Revenue and Customs (HMRC) as tax deductions.

3 UK receipts net of personal pension rebates; gross of Statutory Maternity Pay and Statutory Sick Pay.

4 Payments into Consolidated Fund.

5 Including some elements of expenditure not separately identified.

6 Mainly comprises privatisation proceeds.

7 Net of certain receipts, and excluding on-lending to local authorities and public corporations.

8 A much more detailed breakdown of tax receipts is available from HMRC at www.gov.uk/government/organisations/hm-revenue-customs

9 NCR = Net Cash Requirement. Without Northern Rock Asset Management & Bradford and Bingley.

10 Gross of tax credits. Includes diverted profit tax.

REC3 Reconciliation of Central Government Net Cash Requirement and Changes in Net Debt

£ million

Relationship between columns 14=1+2+3+4+5+6+7+8+9+10+11+12+13

1 Excluding Northern Rock Asset Management (NRAM), Bradford & Bingley (B&B) and Network Rail (NR) - although cash flows relating to NRAM and B&B are included from October 2014 and for NR from April 2015

2 All adjustments reflect differences between when, and at what value, liabilities and assets are scored in net debt and their related cash flows

3 Includes gilts that are transferred to central government (such as those previously held by the Royal Mail Pension Plan) as well as timing differences where cash flows and debt movements were recorded in adjacent months

4 Includes the impact of imputed finance leases as well as the reclassifications of London Continental Railway and the reorganisation of the Housing Revenue Account

5 When an index-linked gilt is redeemed, the impact will always be negative which can cause MW7L to be negative.

Column relationships 1+2+3+4+5+6+7-8-9=10

1 Bank of England comprises Banking Department and Issue Department. Banking Department plus Issue Department assets and liabilities measured after consolidation of Issue Department deposit held at Banking Department.

2 From September 2021 this is calculated using APF purchase of gilts (YWWB9T9) plus APF purchase of corporate bonds (YWWZJ5J).

3 From September 2021 APF gilt purchases are sourced directly from BoE website (YWWB9T9).

4 Includes BoE's temporary purchases of long-dated UK government conducted between 28 September and 14 October 2022.

5 Up to the 19th January 2019, Term Funding Scheme was within the APF. From 19th January 2019, TFS was transferred to the BoE balance sheet.

6 These series can be derived from the BoE Annual Report and Accounts covering both the Banking and Issue Department liabilities and assets.

7 Includes: insurance, pension, standardised guarantee schemes and other accounts receivable/payable.

8 Gilts are recorded at face (or redemption) value in this presentation.

9 Consolidation of gilts issued by central government but held by Banking & Issue Department of BoE.

10 Consolidation of the loan to the BoE Asset Purchase Facility Fund (BEAPFF).

11 Comprised of Ways and Means advance to the National Loans Fund and the loan to the CCFE granted in April 2020 and fully repaid in March 2022.

12 HM Treasury estimates based on management information. Estimates for February 2015 to February 2016 based on annual report data only.

13 Term Funding Scheme (SME) is the TFS with additional incentives for small and medium-sized enterprises which started 15th April 2020.

1 ONS estimates of the interest received by APF from central government, largely on its gilt holdings.

2 ONS estimates of the interest paid by APF to Bank of England on the loan. Calculated using the Bank of England base rate. From December 2025 the base rate has been set at 3.75 percent.

3 Dividends paid to HM Treasury consolidate between the central government and Bank of England and so are public sector borrowing neutral.

4 The full cash transfers (series MT6A and MF7A) will impact the net cash requirement measure by the total amounts.

Worksheet PSA10: Public sector transactions by sub-sector and economic category, UK, not seasonally adjusted

This worksheet contains one table.

Some cells in this table are black indicating that some transactions do not exist in all subsectors

Time period covered by this presentation April 2024 to March 2025

Transactions	Central government (£ million)	Local government (£ million)	General government (£ million)	Public corporations (£ million)	Public sector funded pension schemes (£ million)	Bank of England (£ million) [note 6]	Public sector excluding public sector banks (£ million)	Public sector banks (£ million) [note 129]	Public sector including public sector banks (£ million)
