1 . Main points

- The Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 3.6% in the 12 months to December 2025, up from 3.5% in the 12 months to November.
- On a monthly basis, CPIH rose by 0.4% in December 2025, compared with a rise of 0.3% in December 2024.
- The Consumer Prices Index (CPI) rose by 3.4% in the 12 months to December 2025, up from 3.2% in the 12 months to November.
- On a monthly basis, CPI rose by 0.4% in December 2025, compared with a rise of 0.3% in December 2024.
- Alcohol and tobacco, and transport made the largest upward contributions to the monthly change in both CPIH and CPI annual rates.
- Core CPIH (CPIH excluding energy, food, alcohol and tobacco) rose by 3.5% in the 12 months to December 2025, the same rate as the 12 months to November; the CPIH goods annual rate rose from 2.1% to 2.2%, while the CPIH services annual rate remained at 4.5%.
- Core CPI (CPI excluding energy, food, alcohol and tobacco) rose by 3.2% in the 12 months to December 2025, the same rate as the 12 months to November; the CPI goods annual rate rose from 2.1% to 2.2%, while the CPI services annual rate rose from 4.4% to 4.5%.

2 . Consumer price inflation rates

Table 1: CPIH, OOH component and CPI index values, and annual and monthly rates
UK, December 2024 to December 2025

	CPIH Index (UK, 2015 = 100)	CPIH 12- month rate (%)	CPIH 1- month rate (%)	CPI Index (UK, 2015 = 100)	CPI 12- month rate (%)	CPI 1- month rate (%)	OOH Index (UK, 2015 = 100)	OOH 12- month rate (%)

Figure 1: CPIH and CPI annual inflation rates rose for the first time since July 2025

CPIH, owner occupiers' housing (OOH) costs component and CPI annual inflation rates, UK, December 2015 to December 2025

Figure 1: CPIH and CPI annual inflation rates rose for the first time since July 2025

CPIH, owner occupiers' housing (OOH) costs component and CPI annual inflation rates, UK, December 2015 to December 2025

Source: Consumer price inflation from the Office for National Statistics

The Consumer Prices Index including owner occupiers' housing costs (CPIH) rose by 3.6% in the 12 months to December 2025, up from 3.5% in the 12 months to November (Figure 1).

On a monthly basis, CPIH rose by 0.4% in December 2025, compared with a rise of 0.3% in December 2024.

The Consumer Prices Index (CPI) rose by 3.4% in the 12 months to December 2025, up from 3.2% in the 12 months to November.

On a monthly basis, CPI rose by 0.4% in December 2025, compared with a rise of 0.3% in December 2024.

The main drivers of the annual inflation rate for CPIH and CPI are the same where they are common to both measures. However, the owner occupiers' housing (OOH) costs component accounts for approximately 17% of the CPIH and is the main driver for differences between the CPIH and CPI inflation rates. This makes CPIH our most comprehensive measure of inflation. We cover this in more detail in [Section 4: Latest movements in CPIH inflation](#) and provide a commentary on the CPI in [Section 5: Latest movements in CPI inflation](#). We also cover both CPIH and CPI in [Section 3: Notable movements in prices](#), though the figures reflect CPIH.

3 . Notable movements in prices

Table 2: CPIH annual and monthly inflation rates by division UK, December 2024, November 2025, and December 2025

	CPIH 12-month rate (%)		CPIH 1-month rate (%)	
	November 2025	December 2025	December 2024	December 2025
CPIH All items	3.5	3.6	0.3	0.4
Food and non-alcoholic beverages	4.2	4.5	0.5	0.8
Alcohol and tobacco	4.0	5.2	-0.2	1.0
Clothing and footwear	-0.6	0.0	-0.5	0.1
Housing and household services	4.8	4.6	0.4	0.2
of which owner occupiers' housing costs	4.5	4.2	0.6	0.2
Furniture and household goods	-0.3	-0.6	1.5	1.2
Health	2.6	2.1	0.5	0.1
Transport	3.7	4.0	1.0	1.3
Communication	4.8	4.2	0.7	0.1
Recreation and culture	2.9	2.7	0.0	-0.2
Education	7.6	7.6	0.0	0.0
Restaurants and hotels	3.5	3.8	-0.1	0.2
Miscellaneous goods and services	2.1	2.2	0.2	0.3
All goods	2.1	2.2	0.3	0.4
All services	4.5	4.5	0.4	0.4

Figure 2: Alcohol and tobacco, and transport led the upward contributions to the change in CPIH annual inflation

Contributions to change in the CPIH annual inflation rate, UK, between November and December 2025

Figure 2: Alcohol and tobacco, and transport led the upward contributions to the change in CPIH annual inflation

Contributions to change in the CPIH annual inflation rate, UK, between November and December 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 3 of our accompanying [Consumer price inflation dataset](#).

Figure 2 shows the contributions from the 12 divisions to the change in the annual Consumer Prices Index including owner occupiers' housing costs (CPIH) inflation rate between November and December 2025. These sum to the change in the annual rate between the latest two months, that is, the rise from 3.5% to 3.6%.

The rise in the rate into December 2025 reflected upward contributions from six divisions, partially offset by downward contributions from five divisions. The largest upward contributions were from the alcohol and tobacco, and transport divisions.

Alcohol and tobacco

Prices in the alcohol and tobacco division rose by 5.2% in the 12 months to December 2025, up from 4.0% in the 12 months to November. On a monthly basis, prices rose by 1.0% in December 2025, compared with a fall of 0.2% a year ago.

The rise in the 12-month rate reflected an upward effect from tobacco. Tobacco duty was increased on 26 November 2025, whereas in 2024 it was increased on 30 October. This timing difference may help explain why prices fell by 0.1% in November 2025, compared with a rise of 3.3% a year before, and then subsequently rose by 3.0% in December 2025, compared with a rise of 0.7% a year before.

Transport

Prices in the transport division rose overall by 4.0% in the 12 months to December 2025, up from 3.7% in the 12 months to November. On a monthly basis, prices rose by 1.3% in December 2025, compared with a rise of 1.0% a year ago.

The largest upward effect came from air fares, which rose by 28.6% in December 2025. However, air fares rose by 16.2% last year, the third-lowest December rise since monthly price collection began in 2001. Part of the reason for the lower-than-usual growth in 2024 may have been because the return date for European flights in December 2024 was Christmas Eve and the return date for long-haul flights was New Year's Eve. In contrast, the return date for European flights in December 2025 was 23 December and the return date for long-haul flights was 30 December.

Motor fuels had a negligible effect. The average price of petrol rose by 1.3 pence per litre between November and December 2025, compared with a rise of 1.5 pence per litre between November and December 2024. The average price stood at 136.3 pence per litre in December 2025, the same price it was a year earlier.

Similarly, diesel prices rose by 1.9 pence per litre in December 2025, compared with a rise of 2.1 pence per litre in December 2024. The average price stood at 145.7 pence per litre in December 2025, up from 142.6 pence per litre a year earlier. These movements resulted in overall motor fuel prices rising by 0.9% in the 12 months to December 2025, compared with a rise of 1.0% in the 12 months to November.

Food and non-alcoholic beverages

Food and non-alcoholic beverages prices rose by 4.5% in the 12 months to December 2025, up from 4.2% in the 12 months to November (Figure 3). On a monthly basis, food and non-alcoholic beverages prices rose by 0.8% in December 2025, compared with a rise of 0.5% a year ago.

Figure 3: Food and non-alcoholic beverages inflation rate rose in December 2025

CPIH, and food and non-alcoholic beverages 12-month inflation rates, UK, December 2015 to December 2025

Figure 3: Food and non-alcoholic beverages inflation rate rose in December 2025

CPIH, and food and non-alcoholic beverages 12-month inflation rates, UK, December 2015 to December 2025

Source: Consumer price inflation from the Office for National Statistics

There were upward effects to the change in the rate from 3 of the 11 food and non-alcoholic beverages classes. These were:

- bread and cereals – up 0.03 percentage points
- vegetables, including potatoes – up 0.01 percentage points
- food products not elsewhere classified – up 0.01 percentage points

There was also a small downward effect of negative 0.01 percentage points from oils and fats.

Housing and household services

The 12-month inflation rate for housing and household services was 4.6% in December 2025, down from 4.8% in November. On a monthly basis, prices rose by 0.2% in December 2025, compared with a rise of 0.4% a year ago.

The easing in the 12-month rate between November and December 2025 mainly reflected a downward effect from owner occupiers' housing (OOH) costs. These rose by 4.2% in the 12 months to December 2025, compared with a rise of 4.5% in the 12 months to November. The rate has slowed for 11 consecutive months and is at its lowest since May 2023, when it was also 4.2%. Monthly OOH costs rose by 0.2% in December 2025, compared with a 0.6% increase a year ago.

4 . Latest movements in CPIH inflation

Figure 4: CPIH core annual inflation was the joint lowest since October 2021

CPIH goods, services and core annual inflation rates, UK, December 2015 to December 2025

Figure 4: CPIH core annual inflation was the joint lowest since October 2021

CPIH goods, services and core annual inflation rates, UK, December 2015 to December 2025

Source: Consumer price inflation from the Office for National Statistics

Figure 4 shows the 12-month inflation rates for the Consumer Prices Index including owner occupiers' housing costs (CPIH) series for all goods and all services, together with CPIH excluding energy, food, alcohol and tobacco (often referred to as core CPIH). The CPIH inflation rate is added for comparison.

The core CPIH annual inflation rate was 3.5% in December 2025, the same rate as in November. This is the joint-lowest rate since October 2021, when it was 3.1%.

The CPIH all-goods index rose by 2.2% in the 12 months to December 2025, up from 2.1% in the 12 months to November. The largest upward contribution to the change in the annual rate came from food, alcoholic beverages and tobacco, particularly from tobacco and from bread and cereals.

The CPIH all-services index rose by 4.5% in the 12 months to December 2025, the same rate as November. The rate was last lower in May 2022, when it was 4.3%. The largest downward contribution to the change in the annual rate came from housing services (particularly owner occupiers' housing costs). The largest upward contribution to the change in the annual rate came from recreation and personal services.

Figure 5: Housing and household services made the largest contribution to the CPIH annual inflation rate for the 18th consecutive month

Contributions to the CPIH annual inflation rate, UK, December 2023 to December 2025

Figure 5: Housing and household services made the largest contribution to the CPIH annual inflation rate for the 18th consecutive month

Contributions to the CPIH annual inflation rate, UK, December 2023 to December 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 3 of our accompanying [Consumer price inflation dataset](#).

Figure 5 shows the extent to which the distinct categories of goods and services have contributed to the overall annual CPIH inflation rate over the last two years. The contribution of each category to the annual rate depends on the price movement in that category and its weight, which is updated annually.

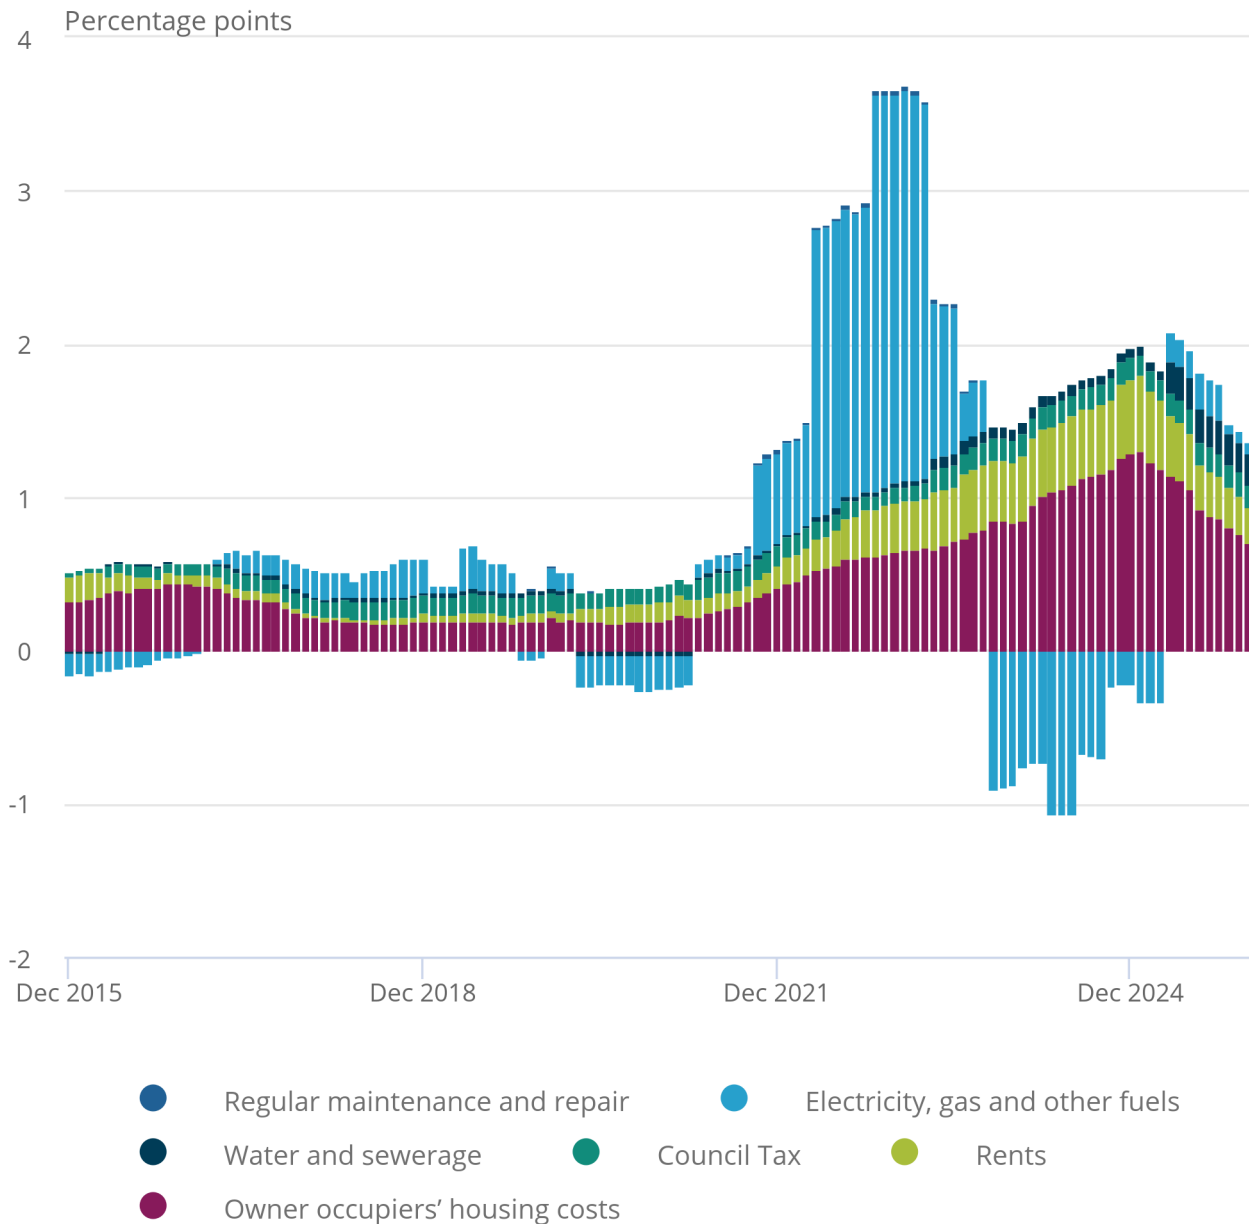

The largest positive contribution to the CPIH annual inflation rate came from housing and household services. This contributed 1.37 percentage points, down from 1.44 percentage points in November. The division has made the largest contribution for the last 18 months, starting from July 2024.

Figure 6: Annual contribution from rents was last lower in May 2022

Contributions of housing components to the CPIH annual inflation rate, UK, December 2015 to December 2025

Figure 6: Annual contribution from rents was last lower in May 2022

Contributions of housing components to the CPIH annual inflation rate, UK, December 2015 to December 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

- 1. Individual contributions may not sum to the total because of rounding.

Figure 6 shows the contributions from owner occupiers' housing (OOH) costs and Council Tax to the annual CPIH inflation rate in the context of wider housing-related costs. The Consumer Prices Index (CPI) differs from the CPIH because it does not include these two components.

The annual contribution from OOH costs continued to slow, and was 0.71 percentage points in December 2025. This contribution was the smallest since May 2023, having decreased for 11 consecutive months from a recent high of 1.31 percentage points in January 2025.

The annual contribution from rents also continued to slow, and was 0.23 percentage points in December 2025. This contribution was last lower in May 2022, having decreased from a recent high of 0.49 percentage points in January 2025.

The contributions from other classes within the housing and household services division were little changed between November and December 2025.

5 . Latest movements in CPI inflation

While the Consumer Prices Index including owner occupiers' housing costs (CPIH) is our lead and most comprehensive measure of consumer price inflation, the Consumer Prices Index (CPI) is based on a harmonised methodology developed by Eurostat. This enables international comparisons to be drawn. More information on the use cases for our consumer price inflation statistics can be found in our [Measuring changing prices and costs for consumers and households: December 2023 article](#).

Figure 7 shows annual CPI inflation for the UK compared with the EU average and selected G7 countries. While the UK CPI is produced on a comparable basis with EU countries, the United States Harmonised Index of Consumer Prices (HICP) differs in some respects. More information is available in Note 1 to Figure 7.

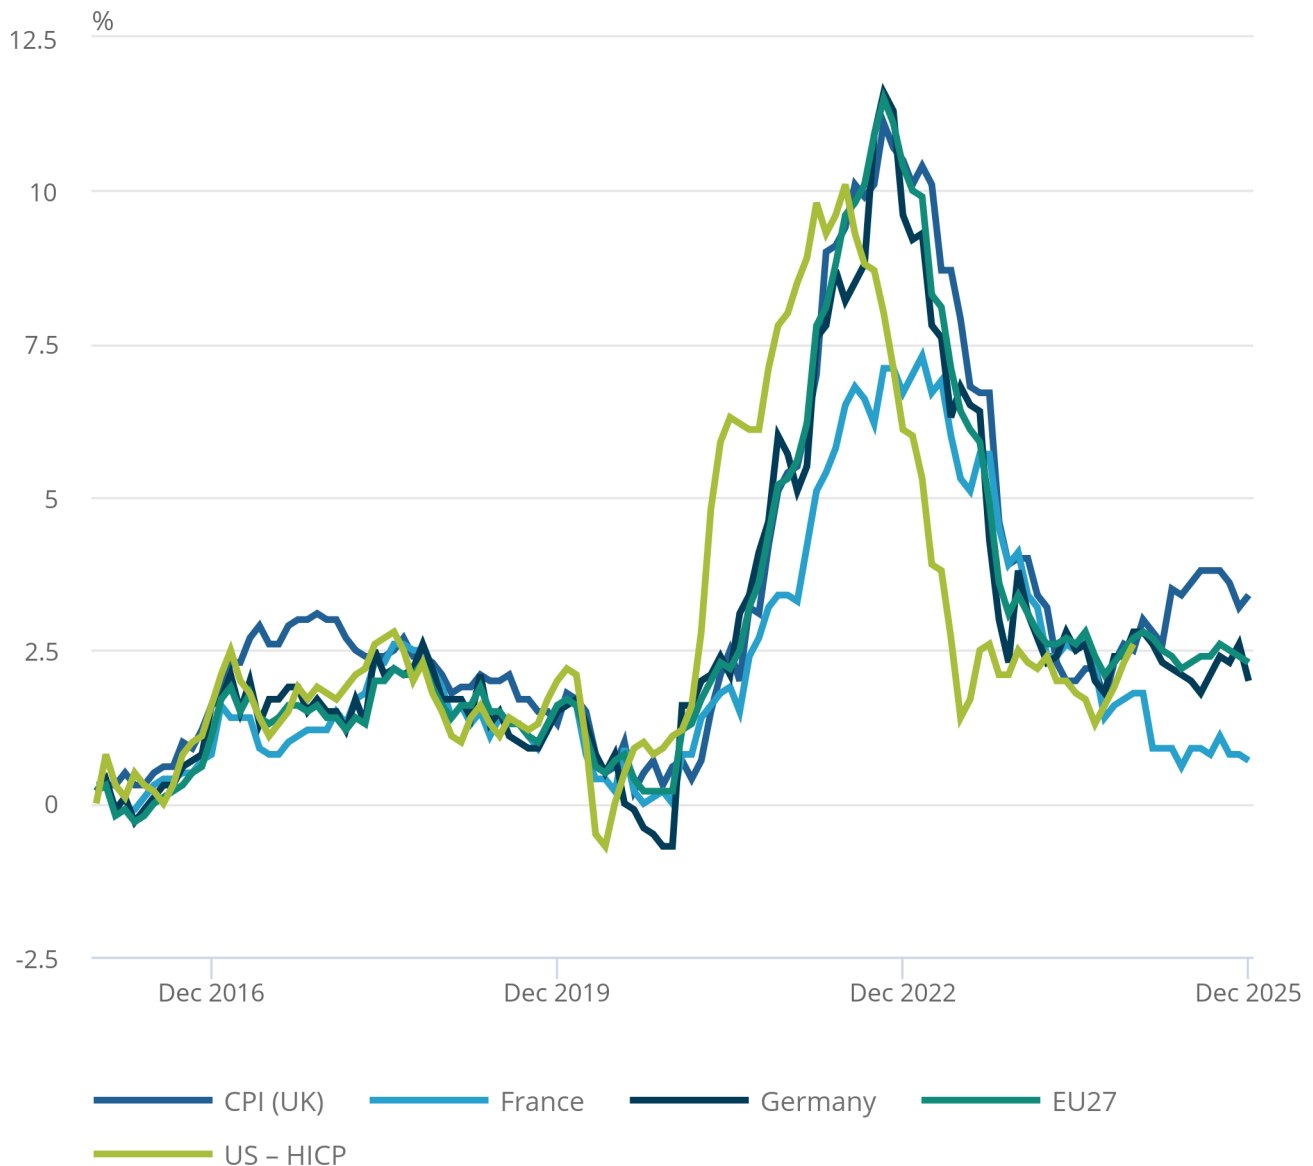

The UK's CPI inflation rate of 3.4% was higher than Germany's (2.0%) and France's (0.7%) in December. The last time the UK rate was lower than the rate in Germany was December 2024.

Figure 7: UK inflation rate was last lower than Germany in December 2024

CPI compared with selected G7 and EU annual inflation rates, December 2015 to December 2025

Figure 7: UK inflation rate was last lower than Germany in December 2024

CPI compared with selected G7 and EU annual inflation rates, December 2015 to December 2025

Source: Consumer price inflation from the Office for National Statistics, Eurostat, and the US Bureau of Labor Statistics

Notes:

1. There are some differences in the definition of the US Harmonised Index of Consumer Prices that may limit comparison. More information is available on the [US Bureau of Labor Statistics R-HICP homepage](#). The latest available figure is for December 2024. We are expecting it to be updated in early 2026.
2. The international data in this figure are sometimes revised.

Table 3: CPI annual and monthly inflation rates by division
UK, December 2024, November 2025, and December 2025

	CPI 12-month rate (%)		CPI 1-month rate (%)	
	November 2025	December 2025	December 2024	December 2025
CPI All items	3.2	3.4	0.3	0.4
Food and non-alcoholic beverages	4.2	4.5	0.5	0.8
Alcohol and tobacco	4.0	5.2	-0.2	1.0
Clothing and footwear	-0.6	0.0	-0.5	0.1
Housing and household services	5.1	4.9	0.2	0.1
Furniture and household goods	-0.3	-0.6	1.5	1.2
Health	2.6	2.1	0.5	0.1
Transport	3.7	4.0	1.0	1.3
Communication	4.8	4.2	0.7	0.1
Recreation and culture	2.9	2.7	0.0	-0.2
Education	7.6	7.6	0.0	0.0
Restaurants and hotels	3.5	3.8	-0.1	0.2
Miscellaneous goods and services	2.1	2.2	0.2	0.3
All goods	2.1	2.2	0.3	0.4
All services	4.4	4.5	0.3	0.4
CPI exc food, energy, alcohol and tobacco (core CPI)	3.2	3.2	0.3	0.3

Source: Consumer price inflation from the Office for National Statistics

Figure 8: Core CPI annual inflation rate was last lower in September 2021

CPI goods, services and core annual inflation rates, UK, December 2015 to December 2025

Figure 8: Core CPI annual inflation rate was last lower in September 2021

CPI goods, services and core annual inflation rates, UK, December 2015 to December 2025

Source: Consumer price inflation from the Office for National Statistics

Figure 8 shows the 12-month inflation rates for the CPI all-goods and all-services series, together with CPI excluding energy, food, alcohol and tobacco (often referred to as core CPI). The headline CPI inflation rate is added for comparison.

Core CPI rose by 3.2% in the 12 months to December 2025, the same rate as the 12 months to November. This is the joint-lowest rate since December 2024, when it was also 3.2%. It was last lower in September 2021, when it was 2.9%.

The CPI all-goods index rose by 2.2% in the 12 months to December 2025, up from 2.1% in the 12 months to November.

The CPI all-services index rose by 4.5% in the 12 months to December 2025, up from 4.4% in the 12 months to November.

As with the all-items annual inflation rates, the drivers of CPIH and CPI goods and services inflation are the same (except for owner occupiers' housing (OOH) costs and Council Tax, which are excluded from CPI). The drivers are discussed in more detail in [Section 4: Latest movements in CPIH inflation](#).

Figure 9: Alcohol and tobacco, restaurants and hotels, and transport led the upward contributions to the change in CPI annual inflation

Contributions to change in the CPI annual inflation rate, UK, between November and December 2025

Figure 9: Alcohol and tobacco, restaurants and hotels, and transport led the upward contributions to the change in CPI annual inflation

Contributions to change in the CPI annual inflation rate, UK, between November and December 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 4 of our accompanying [Consumer price inflation dataset](#).

Figure 9 shows how each of the main groups of goods and services contributed to the change in the CPI annual inflation rate between November and December 2025.

The rise in the rate into December 2025 reflected upward contributions from six divisions, partially offset by downward contributions from five divisions. The largest upward contributions came from the alcohol and tobacco, and transport divisions.

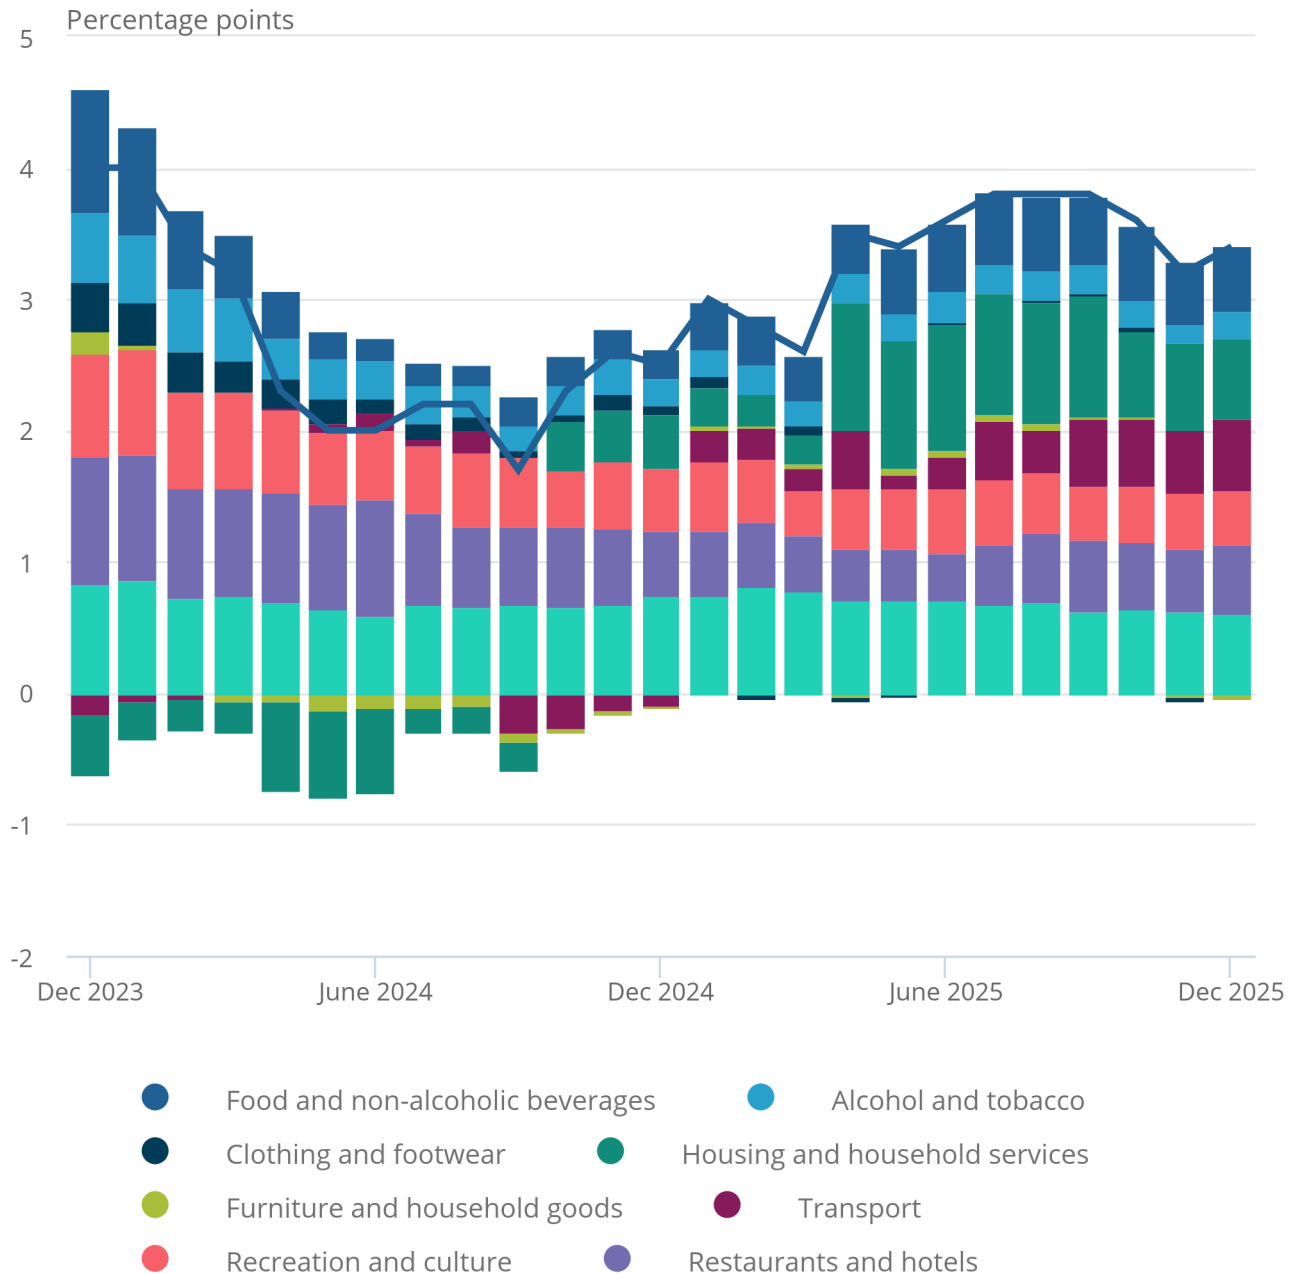

Though the sizes of the contributions differ from CPIH, the main drivers to the change are the same where they are common to both measures.

Figure 10: Housing and household services made the largest contribution to the CPI annual inflation rate for the ninth consecutive month

Contributions to the CPI annual inflation rate, UK, December 2023 to December 2025

Figure 10: Housing and household services made the largest contribution to the CPI annual inflation rate for the ninth consecutive month

Contributions to the CPI annual inflation rate, UK, December 2023 to December 2025

Source: Consumer price inflation from the Office for National Statistics

Notes:

1. Individual contributions may not sum to the total because of rounding.
2. More information on the contents of each division can be found in Table 4 of our accompanying [Consumer price inflation dataset](#).

Figure 10 shows the extent to which the distinct categories of goods and services have contributed to the overall annual CPI inflation rate over the last two years.

The CPIH includes extra housing components not included in the CPI. This can sometimes result in the largest contributions to the annual CPI and CPIH inflation rates coming from different divisions. However, the housing and household services division made the largest contribution to both measures in December 2025, with a 0.62 percentage point contribution to the CPI rate and a 1.37 percentage point contribution to the CPIH rate. OOH costs made a large upward contribution to housing and household services in the CPIH, but are excluded from the CPI.

6 . Data on consumer price inflation

[Consumer price inflation tables](#)

Dataset | Released 21 January 2026

Measures of monthly UK inflation data including the Consumer Prices Index including owner occupiers' housing costs (CPIH), Consumer Prices Index (CPI) and Retail Prices Index (RPI). These tables complement the consumer price inflation time series dataset. Please note that from publication on 26 March 2025, we have published fewer tables to avoid duplication and to remove discontinued series. Tables 39 and 40 detail which tables are no longer published and provide alternative sources for where the content in those tables can be found, if available.

[Consumer price inflation time series](#)

Dataset MM23 | Released 21 January 2026

Comprehensive database of time series covering measures of inflation data for the UK including CPIH, CPI and RPI.

[Consumer price inflation detailed briefing note](#)

Dataset | Released 21 January 2026

The consumer price inflation detailed briefing note contains details of the items contributing to the changes in the CPIH, details of any notable movements, a summary of the reconciliation of CPIH and RPI, and the outlook, which looks ahead to next month's release.

[Consumer price inflation consumption segment indices and price quotes](#)

Dataset | Released 21 January 2026

Price quote data (for locally collected data only) and consumption segment indices (that underpin consumer price inflation statistics), giving users access to the detailed data that are used in the construction of the UK's inflation figures. Please note that this dataset was previously called the Consumer price inflation item indices and price quotes dataset.

[Contributions to the 12-month rate of CPI\(H\) by import intensity](#)

Dataset | Released 21 January 2026

A time series of the contributions to the CPIH and CPI annual rates broken down by the import intensity of household purchases.

[Consumer price inflation, historical data, UK, 1950 to 1988](#)

Dataset | Released 18 May 2022

Data tables of historical estimates modelled for the CPIH and CPI over the period 1950 to 1988. Data in these tables are not accredited official statistics and are provided for indicative purposes only.

7 . Glossary

Annual inflation rate

The most common approach to measuring inflation is the 12-month or annual inflation rate, which compares prices for the latest month with the same month a year ago. In any given month, the annual rate is determined by the balance between upward and downward price movements across the range of goods and services included in the index.

Consumer price inflation

Consumer price inflation is the rate at which the prices of goods and services bought by households rise or fall. It is estimated by using price indices. For an overview of the range of indices available and their uses, please see our [Consumer price indices, a brief guide: 2017](#) and our [Measuring changing prices and costs for consumers and households: December 2023 article](#).

CPIH

The Consumer Prices Index including owner occupiers' housing costs (CPIH) is the most comprehensive measure of inflation. It extends the Consumer Prices Index (CPI) to include a measure of the costs associated with owning, maintaining and living in one's own home, known as owner occupiers' housing (OOH) costs, along with Council Tax. Both are substantial expenses for many households and are not included in the CPI.

CPI

The CPI is a measure of consumer price inflation produced to international standards, and is based on European regulations for the [Harmonised Index of Consumer Prices](#). The CPI is the inflation measure used in the government's target for inflation.

The CPI is produced at the same level of detail as the CPIH in our accompanying [Consumer price inflation dataset](#) and in our accompanying [Consumer price inflation time series](#).

Owner occupiers' housing costs

OOH costs are the costs of housing services associated with owning, maintaining and living in one's own home.

RPI

The Retail Prices Index (RPI) and its subcomponents do not meet the required standard for designation as [accredited official statistics](#). In recognition that the index continues to be widely used in contracts, we continue to publish the RPI, its subcomponents, and RPI excluding mortgage interest payments (RPIX). To view the all-items RPI, please see the [data time series section of the Inflation and price indices area of our website](#). The annual RPI inflation rate was 4.2% in December 2025.

The UK Statistics Authority (The Authority) and HM Treasury launched a consultation in 2020 on The Authority's proposal to address the shortcomings of the RPI. From 2030 (at the earliest), as outlined in [The Authority's response to the joint consultation on reforming the methodology of the Retail Prices Index](#), the CPIH methods and data sources will be introduced into the RPI. Additionally, the supplementary and lower-level indices of the RPI will be discontinued.

8 . Data sources and quality

Quality improvement

We are undertaking a programme of quality improvement across our consumer price statistics, including identifying new sources, improving methods and developing modern automated systems. More information about the project and our ongoing plans is in our [Transformation of consumer price statistics: August 2024 article](#). We also outline the rationale for our priorities and their potential impact in our [Consumer prices development plan: updated September 2025 article](#).

The next planned improvement is the introduction of grocery scanner data into our consumer price statistics from February 2026, with the first publication scheduled for March 2026. We outlined this change in our series of research articles, including our [Research and developments in the transformation of UK consumer price statistics: April 2025 article](#).

As usual, we welcome your feedback on our work. To contact us, please email cpi@ons.gov.uk.

Moving from sample items to broader consumption segments

The "All items" Consumer Prices Index (CPI) and Consumer Prices Index including owner occupiers' housing costs (CPIH) series incorporate price information from a wide range of goods and services. From publication in March 2025, the process for aggregating this detailed information has changed, as a necessary step towards incorporating larger and more granular datasets into the consumer price indices.

Goods and services are allocated into "consumption segments" for different categories of expenditure. In some cases, we have defined these consumption segments to correspond to one "item" for which we track prices over time. However, in cases where more comprehensive source data are available, or are expected to be available in the future, a consumption segment typically includes much more than just one item. For simplicity, we continue to refer to "items" in the statistical bulletin and detailed briefing note.

More detailed methodological information on the new aggregation process and consumption segments is available in our [Introducing alternative data into consumer price statistics: aggregation and weights article](#).

Please note that the move from sample items to broader consumption segments means there is an impact on the individual price quotes and lower-level indices published from March 2025 in our [Consumer price inflation consumption segment indices and price quotes dataset](#). These outputs have been updated and presented in an improved format to help users transition to the use of consumption segments and other methodological changes.

We have published an [updated glossary \(XLSX, 28KB\)](#), which sets out the changes made from March 2025.

Households and the cost of living

To assist individuals in understanding how the rise in inflation affects their expenditure, we have produced a [personal inflation calculator](#). The calculator allows users to enter the amount they spend across either a reduced or a wide range of categories, to produce an estimate of their personal inflation based on those spending patterns.

We have now updated the calculator to reflect the most recent available average expenditures for each category (based on household expenditure for 2022).

Our [Shopping prices comparison tool](#) shows how the average prices of items have changed over time. Please note that the newly introduced consumption segments for food, drink and tobacco will not have data before 2025 in the tool. However, the historical average prices for food, drink and tobacco items, that were on the tool before the update in 2025, can be found in our [Shopping prices comparison tool data download before the 2025 update](#).

Please also note that Table 55 in our historical [Consumer price inflation dataset](#), which provided time series of prices for petrol and diesel, has not been published since 19 February 2025 and the two series have been discontinued. Historical average prices are still available from the time series explorer function on our website, using the four-character identifiers CZMK for petrol and CZML for diesel.

On 28 November 2025, we published our quarterly [Household Costs Indices \(HCIs\) for UK household groups bulletin](#). The HCIs reflect how different types of households experience changing prices, and differ from CPIH and CPI. The CPIH and CPI are based on recognised economic principles, and provide an aggregate measure of inflation for household spending in the UK.

The HCIs are [official statistics in development](#) and this release included new estimates for July to September 2025. It was not possible for this latest release to update the weights for 2025 in line with the standard methodology for consumer prices. This is because of delays in processing the underlying survey data and the need for further, ongoing quality assurance. Instead, the most recent estimates have been compiled using the weights for February to December 2024. We aim to update the weights as soon as we can.

Passenger transport by air

We previously published a monthly index for passenger transport by air. We also began publishing [Domestic, European and long-haul fares consumer prices sub-indices and weights](#) on an annual basis from 26 March 2025. These are being released in [the user requested data section of our website](#).

Classification of Individual Consumption According to Purpose (COICOP)

The Classification of Individual Consumption According to Purpose (COICOP) is the classification that underpins some of the main statistics that we produce. The [classification saw a substantial update \(PDF, 1,286KB\)](#) in 2018, to reflect changes in household expenditure patterns since its inception in the late 1990s. The UK currently uses the version of COICOP introduced in 1999 but we plan to have implemented the updated COICOP 2018 by 2029.

For further information, please email cpi@ons.gov.uk.

Weights for 2025 consumer price inflation statistics

In line with usual practice at the start of each year, the expenditure weights used in compiling the CPIH and CPI were calculated using updated spending information. The first update of weights was implemented with the January indices. The second update was introduced, along with the usual basket update, with the February indices released in March. We published our [Consumer price inflation, updating weights: 2025 article](#) and our [Consumer price inflation basket of goods and services: 2025 article](#) on 18 March 2025.

The 2025 weights for CPIH and CPI were calculated using national accounts household final consumption expenditure (HHFCE) data for 2023. This is in line with our standard methodology of using data lagged by two years. It differs from the approach used in 2021, 2022 and 2023, when there were large changes seen in spending patterns because of the coronavirus (COVID-19) pandemic. Over those years, we adjusted the spending data so that, for example, the resulting weights for 2023 better reflected spending in 2022. More information is available in our [Consumer price inflation, updating weights articles](#).

The weights for the RPI were also updated for 2025, in line with the practice followed both before and during the coronavirus pandemic period.

In line with the improvements introduced last year, we now use unrounded weights in compiling CPIH and CPI. The weights before 2024 for the CPI and CPIH were rounded to integers as parts per thousand of the all-items indices at the class level (four-digit COICOP). The RPI continues to be based on integer weights.

Consumer price inflation historical estimates, UK, 1950 to 1988

On 18 May 2022, we published our [Consumer price inflation, historical estimates, UK, 1950 to 1988 - methodology](#) and our [Consumer price inflation, historical estimates and recent trends, UK: 1950 to 2022 article](#). These include new estimates of CPIH and improved estimates of CPI for 1950 to 1988. These estimates (published in response to user need for a longer series) are indicative and are for analytical purposes only. They are not intended for official use and do not constitute part of the [accredited official statistics](#) series.

Previously, in December 2018, we published our [Consumer Prices Index including owner occupiers' housing costs \(CPIH\) historical series: 1988 to 2004 article](#). These series are also not classed as accredited official statistics, reflecting the historical uncertainty around the backcasts.

Methodology information

The consumer price indices are normally based on prices collected from outlets around the country, supplemented by information collected centrally over the internet and by phone. The figures in this release use data collected on or around 9 December 2025.

An overview of consumer price statistics is given in our [Consumer price indices, a brief guide: 2017](#). The concepts and methodologies underpinning the indices in more detail are covered in our [Consumer Prices Indices Technical Manual, 2019](#).

A comprehensive source of information on the CPIH, focusing on the approach to measuring owner occupiers' housing costs, is provided in our [CPIH Compendium](#).

Information on the users and uses of these statistics, and the characteristics of the different measures of inflation related to potential use, is included in our [Users and uses of consumer price inflation statistics: July 2018 update methodology](#).

Strengths and limitations

In our [Measuring changing prices and costs for consumers and households article](#), we illustrated our approach to the process using three "use cases", and described how they relate to the measures published and under development.

The three cases refer firstly to the CPIH as our lead measure of inflation, based on economic principles. They also refer to the HCIs as a set of measures that reflect the change in costs and prices experienced by different households, and the RPI as a legacy measure that is required to meet existing user needs. The issues with the RPI are described in our [Shortcomings of the Retail Prices Index as a measure of inflation article](#).

Accredited official statistics

These [accredited official statistics](#) were independently reviewed by the Office for Statistics Regulation in July 2017. They comply with the standards of trustworthiness, quality and value in the [Code of Practice for Statistics](#) and should be labelled "accredited official statistics".

Revisions and correction of errors policy for consumer price inflation statistics

We have reviewed and updated the [revisions and correction of errors policy for consumer price inflation statistics](#). The Consumer Price Inflation Statistics Revisions Policy and Correction of Errors Policy are stated separately to clearly highlight the differences between them. Within each policy, there is information on how the policy is applied, in what circumstances users will be notified and how users will be notified.

This policy replaces and supersedes our previous [Revisions policy for consumer price inflation statistics](#), published in March 2017.

Transforming UK consumer price inflation statistics webinar

The Office for National Statistics (ONS) and the Prices Inflation User Group are hosting an online public webinar exploring the most ambitious transformation of UK consumer price inflation statistics in a generation. This session is designed for anyone interested in understanding how inflation statistics are evolving -- whether you are a policy professional, researcher, business, charity, or you simply want to know more about the changes that are being introduced. The webinar will take place from 11:00am to 12:30pm on Thursday 29 January 2026.

For more details, and to sign up to attend, please visit the webinar [Eventbrite page](#).

Key: - zero or negligible

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticsauthority.gov.uk/>.

3 The series CPIY, CPI-CT and CPIHY were discontinued in January 2022, with the final estimates referring to price change in the period December 2021.

¹ As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of quotes used in February 2020 (the most recent 'normal' collection). To identify which series are affected please consult

the latest Consumer price inflation tables which can be located here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumer-priceinflation>, which includes notation to reflect the reduced coverage.

¹ As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of quotes used in February 2020 (the most recent 'normal'

collection). To identify which series are affected, please consult the latest Consumer price inflation tables which can be located here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumer-priceinflation>, which includes notation to reflect the reduced coverage.

1 From the release of January consumer price inflation data on 16 February 2016, CPIH and CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gov.uk>.

1 From the release of January consumer price inflation data on 16 February 2016, CPIH & CPI indices have been re-referenced and published with 2015=100. Full historic series for each of the re-referenced indices are available for users to view or download. Regular re-referencing of indices is methodological good practice as it avoids rounding issues that can arise from small index values. Please note that re-referencing does not impact on published inflation rates, although when using the indices to calculate inflation rates, it is important to use indices that are referenced on the same year. Re-referencing does not impact on RPI. For more information, please contact cpi@ons.gsi.gov.uk.

2 More detailed CPIH, CPI and RPI data are available at: <http://www.ons.gsi.gov.uk>.

Key: - zero or negligible

1 Comprises 'Electricity, gas and other fuels' (group 04.5) and 'Fuels and lubricants' (class 07.2.2).

2 Comprises all other goods elements of the CPI.

3 For further information on all of these services components, see 'The Consumer Prices Index: Goods and Services Indices and Special Aggregates', which can be downloaded from: <http://webarchive.nationalarchives.gov.uk/20160105160709/http://ons.gov.uk/>

Key: - zero or negligible .. Not available

1 Published as the CPI in the UK.

2 Aggregate for European Union with 27 Member States.

Following user requests, on 10 April 2018 Eurostat began to publish in its database an aggregate for the EU with 27 Member States for around 50 most in-demand indicators, such as population, GDP growth rate and unemployment.

3 Data for the former EU28 aggregate.

For reference periods February 2020 or later, Eurostat no longer calculates or publishes the former EU 28 aggregate. This means that the final time periods for which the EU28 aggregate is published are January 2020, fourth quarter 2019 or the year 2019 depending on the frequency of the dataset. Eurostat will maintain historic data for EU28 in the database and will update as revisions are received.

4 The coverage of the Monetary Union Indices of Consumer Prices (MUICP) was extended to include Greece with effect from Jan 2001 and Slovakia from Jan 2009.

5 Following the end of the transition period, we have ceased to publish the Harmonised Index of Consumer Prices (HICP) international comparisons for EU countries in this table. The international comparisons will continue to be available on the Eurostat website. <https://ec.europa.eu/eurostat/web/main/data/database>

Key: - zero or negligible

1 An error was identified in the dataset underpinning the 2019 RPI weights covering the period February to June 2019. In line with the consumer price inflation statistics revision policy RPI was not revised. The corrected weights have been used for the July 2019 RPI onwards. Users should note there is a discontinuity between June's and July's index levels, which have been calculated using differing weights.

2 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at <http://www.statisticsauthority.gov.uk>.

3 As a direct result of the reduced availability of products due to the coronavirus (COVID-19) pandemic, some series are based on less than half of the number of price quotes used in February 2020 (the most recent 'normal' collection). To identify which series are affected, please the latest Consumer price inflation tables which can be found here: <https://www.ons.gov.uk/economy/inflationandpriceindices/datasets/consumerpriceinflation>, which includes notation to reflect the reduced coverage.

4 **Index date for December: 9 December 2025**

1 All components of the RPI are included in the above breakdown with the exception of mortgage interest payments, council tax and depreciation.

2 Including fuel oil.

3 The 'other goods' category comprises DIY materials, coal & solid fuels, household goods, clothing & footwear, personal articles, chemists goods, purchase of motor vehicles and leisure goods.

4 The 'utilities' category comprises water, electricity, gas, postage, telephone charges and rail fares.

5 The 'shop services' category comprises catering, repairs & maintenance charges, domestic services, personal services, maintenance of motor vehicles, TV licence & rentals and entertainment & recreation charges.

6 The 'non-shop services' category comprises dwelling insurance & ground rent, fees and subscriptions, vehicle tax and insurance, bus & coach fares, other travel costs, foreign holidays and UK holidays.

7 The Retail Prices Index and its derivatives do not meet the required standards for designation as National Statistics. A full report can be found at: <http://www.statisticsauthority.gov.uk/>.

8 An error was identified in the dataset underpinning the 2019 RPI weights covering the period February to June 2019. In line with the consumer price inflation statistics revision policy RPI was not revised. The corrected weights have been used for the July 2019 RPI onwards. Users should note there is a discontinuity between June's and July's index levels, which have been calculated using differing weights.
