1 . Main points

- Average UK house prices increased by 10.3% in the year to November 2022, down from 12.4% in October 2022.
- The average UK house price was £295,000 in November 2022, which is £28,000 higher than this time last year but a slight decrease from last month's record high of £296,000.
- Average house prices increased over the year to £315,000 (10.9%) in England, to £220,000 in Wales (10.7%), to £191,000 in Scotland (5.5%) and to £176,000 in Northern Ireland (10.7%).
- Scotland's annual house price inflation has generally been slowing since April 2022, reaching 5.5% in the year to November 2022, down from 14.2% in the year to April 2022.
- The North West saw the highest annual percentage change in the year to November 2022 (13.5%), while London saw the lowest (6.3%) of all English regions.

2 . UK house prices

The [latest house price data published on GOV.UK by HM Land Registry \(HMLR\) for November 2022](#) show that average house prices in the UK increased by 10.3% in the year to November 2022. This was down from 12.4% in the year to October 2022.

The coronavirus (COVID-19) pandemic affected the supply of housing transactions for a period of time. Further information can be found in [Section 7. Measuring the data.](#)

Figure 1: Average UK house price annual percentage change was 10.3% in the year to November 2022

Annual house price rates of change for all dwellings, UK, January 2006 to November 2022

Figure 1: Average UK house price annual percentage change was 10.3% in the year to November 2022

Annual house price rates of change for all dwellings, UK, January 2006 to November 2022

Source: HM Land Registry, Registers of Scotland, Land and Property Services Northern Ireland, Office for National Statistics – UK House Price Index

Notes:

1. Not seasonally adjusted.
2. [HMLR's UK House Price Index \(HPI\) release on GOV.UK](#) is available to download.

The average UK house price was £295,000 in November 2022, which is £28,000 higher than this time last year, but down slightly from the previous month's record high of £296,000.

Recent annual percentage changes in house prices have been volatile because of volatility in prices in 2021. For example, the October 2022 annual percentage change was high, partly caused by a sharp fall in UK average house prices in October 2021, following changes to Stamp Duty Land Tax. This is known as a base effect, as explained in our [Beware base effects article](#).

The average UK house price annual percentage change was 10.3% in the year to November 2022, down from 12.4% in the year to October 2022.

The provisional seasonally adjusted estimate of UK residential transactions in November 2022 was 107,190, as shown in [HM Revenue and Customs' \(HMRC's\) Monthly property transactions statistics](#). This is 13.3% higher than November 2021 and 0.2% higher than October 2022.

Figure 2: The average UK house price was £295,000 in November 2022

Average house price, UK, January 2005 to November 2022

Figure 2: The average UK house price was £295,000 in November 2022

Average house price, UK, January 2005 to November 2022

Source: HM Land Registry, Registers of Scotland, Land and Property Services Northern Ireland, Office for National Statistics – UK House Price Index

Notes:

1. Not seasonally adjusted.
2. [HMLR's UK House Price Index \(HPI\) release on GOV.UK](#) is available to download.

The average UK house price was £295,000 in November 2022; this is £28,000 higher than in November 2021.

On a non-seasonally adjusted basis, the average UK house price decreased by 0.3% between October and November 2022. The average UK house price increased by 1.5% between October and November 2021.

On a seasonally adjusted basis, the average UK house price increased by 0.1% between October and November 2022, following an increase of 0.5% in the previous month.

Notes:

1. Not seasonally adjusted.
2. The [HMLR's UK House Price Index \(HPI\) release on GOV.UK](#) is available to download.
3. Northern Ireland (NI) data are only available on a quarterly basis; Northern Ireland data will be copied forward until next quarter's data is available, which will be in the December 2022 bulletin released 15 February 2022.
4. Further information on [Northern Ireland HPI publications and future release schedules](#) can be viewed.

The average house price annual percentage change slowed in each of England, Wales and Scotland in the year to November 2022, compared with the year to October 2022.

The average house price in Scotland increased by 5.5% over the year to November 2022, down from an increase of 7.9% in the year to October 2022. The average house price in Scotland was £191,000 in November 2022. Annual house price inflation in Scotland has generally been slowing since April 2022, slowing to 5.5% in the year to November 2022, down from 14.2% in the year to April 2022.

The average house price in Wales increased by 10.7% over the year to November 2022, down from an increase of 11.9% in the year to October 2022. The average house price in Wales was £220,000 in November 2022.

The average house price in England increased by 10.9% over the year to November 2022, down from an increase of 13.0% in the year to October 2022. The average house price in England was £315,000 in November 2022.

The average house price in Northern Ireland increased by 10.7% over the year to Quarter 3 (July to Sept) 2022. Northern Ireland remains the cheapest country in the UK in which to purchase a property, with the average house price at £176,000.

4 . House prices by region in England

Figure 4: London is the region with the lowest annual house price percentage change

All dwellings annual house price rates of change, by English region, year to November 2022

Figure 4: London is the region with the lowest annual house price percentage change

Notes:

1. Not seasonally adjusted.
2. [HMLR's UK House Price Index \(HPI\) release on GOV.UK](#) is available to download.

The North East continued to have the lowest average house price of all English regions, at £163,000 in November 2022.

The North West was the region with the highest annual house price inflation in November 2022. Average prices in the North West increased by 13.5% in the year to November 2022, down from an annual percentage change of 16.1% in October 2022.

London's average house prices remain the most expensive of any region in the UK, with an average price of £542,000 in November 2022.

London was the English region with the lowest annual house price inflation, with average prices increasing by 6.3% in the year to November 2022. This was down from an annual percentage change of 6.7% in October 2022.

Notes:

1. Data at the local authority level and other breakdowns can be found in the [HMLR's UK House Price Index \(HPI\) release on GOV.UK](#).
2. Because of the impact of the coronavirus (COVID-19) pandemic on the supply of housing transactions, we might continue to see larger revisions to the published UK House Price Index (HPI) estimates than usual, particularly at the lower geographical levels where transaction volumes are smaller.

5 . House Price Index data

[UK House Price Index](#)

Dataset | Released 18 January 2023

Monthly house price movements, including average price by property type, sales and cash mortgage sales, as well as information on first-time buyers, new builds and former owner occupiers. Data are collected by HM Land Registry and published on GOV.UK.

[House price data: quarterly tables](#)

Dataset | Released 16 November 2022

Quarterly house price data based on a sub-sample of the Regulated Mortgage Survey.

[House price data: annual tables 20 to 39](#)

Dataset | Released 20 July 2022

Annual house price data based on a sub-sample of the Regulated Mortgage Survey.

6 . Glossary

House Price Index (HPI)

The House Price Index (HPI) measures the price changes of residential housing as a percentage change from a specific time period (12 months before, or a base period where the HPI in 2015 equals 100).

House price inflation

House price inflation in the UK is the rate at which the prices of residential properties purchased in the UK rise and fall.

Non-seasonally adjusted

A non-seasonally adjusted series is one that includes seasonal or calendar effects.

Seasonally adjusted

A seasonally adjusted series is one that has been subject to a widely used technique for removing seasonal or calendar effects from time series data.

7 . Measuring the data

The UK House Price Index (HPI) is a joint production by HM Land Registry (HMLR), Registers of Scotland, Land and Property Services Northern Ireland, and the Office for National Statistics (ONS). HMLR publishes the [UK House Price Index reports on GOV.UK](#) (at 9:30am, 18 January 2023). The reports contain full details, including commentary, historical data tables and analytical tools.

Economic statistics governance after EU exit

More information regarding the new governance following the UK's exit from the EU is available in our [Index of private housing rental prices, UK: September 2022 bulletin](#).

HM Land Registry (HMLR) transactions

HMLR has increased the use of automation in application processing. This means that initial transaction numbers may be lower than pre-coronavirus (COVID-19) pandemic volumes; however, in the medium to long term, this will lead to higher volumes being processed.

We have temporarily changed the date we receive the transaction data from HMLR. As a result, we receive more transactions than those immediately seen in the published [HMLR's Price Paid Data datasets](#).

The processing of new build properties has been more affected than the processing of "old build" properties. So, to address this, we have pooled new build transactions for certain months in England and Wales, which means that:

- May 2022 includes new build transactions from April and May 2022
- June 2022 includes new build transactions from May and June 2022
- July 2022 includes new build transactions from June and July 2022
- August 2022 includes new build transactions from July and August 2022
- September 2022 includes new build transactions from August and September 2022
- October 2022 includes new build transactions from September and October 2022

November 2022 has not been affected as new builds are excluded from the model for the first estimate because of the nature of their processing.

These changes might lead to larger revisions to published estimates than usual as we reduce the reliance on pooling. Further information on how we usually process the new build properties can be found in [HMLR's Quality and methodology guidance](#).

Sales volumes

Sales only appear in the UK HPI once the purchases have been registered or submitted for registration in the case of sales in Scotland (based on completed sales rather than advertised or approved prices). Therefore, there can be a delay before transactions feed into the index. Estimates for the most recent months are provisional and likely to be updated as more data are incorporated into the index.

The latest estimates for November 2022 are based on approximately 28,000 records for England, which currently represent roughly 29% of monthly property transactions, as published by HM Revenue and Customs (HMRC). They are based on approximately 7,000 records for Scotland (69% of transactions) and approximately 2,000 records for Wales (32% of transactions). This represents the number of records that are available at the time of calculating the UK HPI and not the number of transactions that have taken place. As time progresses, more records will become available for November 2022, in line with our published revision policy.

However, it should be noted that there are some coverage differences between the sales volumes used in the UK HPI dataset and the monthly property transactions statistics data. This means that the two are not directly comparable, and sales volumes in the UK HPI are unlikely to ever reach the transaction levels published by HMRC. It is believed that the main reason for this difference is that residential properties where the buyer or seller is a corporate body, company or business are excluded from the HMLR data in the UK HPI, but included in HMRC property transaction statistics.

Data sources

The main sources of data used in the UK are HMLR for England and Wales, Registers of Scotland, and HMRC's Stamp Duty Land Tax data for the Northern Ireland HPI.

Methods

The method for calculating the UK HPI can be found in [HMLR's Quality and methodology guidance](#).

Quality

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in [HMLR's UK House Price Index guidance on GOV.UK](#).

8 . Strengths and limitations

Further information on strengths and limitations of the data can be found in Section 1.4 of [HM Land Registry's \(HMLR's\) Quality and methodology guidance](#).
