Release date:
22 December 2020

Next release:
31 March 2021

Table of contents

1. [Main points](#)
2. [Quarterly sector accounts data](#)
3. [Glossary](#)
4. [Measuring the data](#)
5. [Related links](#)

1 . Main points

- The households saving ratio decreased to 16.9% in Quarter 3 (July to Sept) 2020, a decrease from the record of 27.4% in Quarter 2 (Apr to June) 2020.
- Households consumption spending increased by £50.7 billion (19.6%) in Quarter 3 after the largest quarterly fall in nominal household spending ever recorded in the previous quarter; the increase in the latest quarter has been driven by a recovery in household spending in restaurants and hotels, and transport.
- The households net lending position continued to increase to £46.5 billion, down from a record net lending position of £88.7 billion in Quarter 2; this equates to 8.6% of gross domestic product (GDP) in Quarter 3 compared with 18.6% in Quarter 2.
- General government saw a decrease in its net borrowing position to £69.6 billion in Quarter 3 from £103.1 billion in the previous quarter, which equates to negative 12.9% of GDP in Quarter 3 compared with negative 21.6% in Quarter 2; the main drivers were the coronavirus (COVID-19) intervention job support schemes.
- Non-financial corporations net lending increased to £7.4 billion in Quarter 3 following net lending of £4.9 billion in the previous quarter; this equates to 1.4% of GDP in Quarter 3 compared with 1.0% of GDP in Quarter 2.
- In the financial account, general government, financial corporations and non-profit institutions serving households (NPISH) were net borrowers - all other sectors were net lenders.

2 . Quarterly sector accounts data

[Quarterly sector accounts time series](#)

Dataset | Released 22 December 2020

Quarterly aggregate economic indicators and summary estimates for private non-financial corporations and households' sectors of the UK economy, and revisions.

[UK Economic Accounts](#)

Dataset | Released 22 December 2020

Quarterly estimates of national product, income and expenditure, sector accounts and balance of payments.

[UK Economic Accounts: main aggregates](#)

Dataset | Released 22 December 2020

Quarterly national accounts aggregates, per capita data, including gross domestic product by income and expenditure, gross value added, gross fixed capital formation, change in inventories, gross operating surplus and revisions.

[UK Economic Accounts: total economy](#)

Dataset | Released 22 December 2020

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for the UK total economy.

[UK Economic Accounts: flow of funds](#)

Dataset | Released 22 December 2020

Quarterly flow of funds, financial account and balance sheet data for the UK economy by institutional sector.

[UK Economic Accounts: institutional sector - general government](#)

Dataset | Released 22 December 2020

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for general government.

[UK Economic Accounts: institutional sector - households and non-profit institutions serving households](#)

Dataset | Released 22 December 2020

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for households and non-profit institutions serving households. Includes the Experimental Statistics on the impact of removing "imputed" transactions from real household disposable income and the saving ratio to better represent the economic experience of UK households.

[UK Economic Accounts: institutional sector - non-financial corporations](#)

Dataset | Released 22 December 2020

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for non-financial corporations and sub-sectors.

[UK Economic Accounts: institutional sector -- Rest of the world](#)

Dataset | Released 22 December 2020

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for the Rest of the world.

[UK Economic Accounts: balance of payments - current account](#)

Dataset | Released 22 December 2020

Quarterly transactions in trade in goods and services, primary, secondary and investment income, transactions with EU and non-EU countries and capital account.

[UK Economic Accounts: balance of payments - financial account](#)

Dataset | Released 22 December 2020

Quarterly transactions associated with changes of ownership of the UK's foreign financial assets and liabilities, including direct, portfolio and other investment, sector analysis and government reserve assets.

[UK Economic Accounts: balance of payments -- international investment position](#)

Dataset | Released 22 December 2020

Quarterly end-of-period balance sheet levels of UK external assets and liabilities, including direct, portfolio and other investment, sector analysis and government reserve assets.

3 . Glossary

Chained volume measures

Chained volume series (also known as real terms) have had the effects of inflation removed.

Current price

Current price series are expressed in terms of the prices during the time period being estimated. These describe the prices recorded at the time of production or consumption and include the effect of price inflation over time.

Gross disposable household income (GDHI) and real household disposable income (RHDI)

Gross disposable household income (GDHI) is the estimate of the total amount of income that households have available to either spend, save or invest including income received from wages (and the self-employed), social benefits, pensions and net property income (that is, earnings from interest on savings and dividends from shares) less taxes on income and wealth.

Adjusting GDHI to remove the effects of inflation gives real household disposable income (RHDI). This is a measure of the real purchasing power of households' income, in terms of the physical quantity of goods and services they would be able to purchase if prices remained constant over time.

Households' saving ratio

The saving ratio estimates the amount of money households have available to save as a percentage of their gross disposable income plus pension accumulations.

Net lending or borrowing

The net lending of a sector represents the surplus resources that a sector makes available to other sectors, net borrowing represents their financing of a deficit from other sectors.

Net lending means a sector has money left over after its spending and investment in a given period, whereas net borrowing means it has spent and invested more than it received and has a need for financing, which may be covered by borrowing, issuing shares or bonds, or by drawing on reserves.

Seasonal adjustment

All figures given in this bulletin are adjusted for seasonality, unless the financial accounts are under discussion or otherwise stated. Seasonal adjustment removes seasonal or calendar effects from data to enable more meaningful comparisons over time.

4 . Measuring the data

Revisions within this release

This bulletin includes new data for the latest available quarter, Quarter 3 (July to Sept) 2020 and revisions to data from the start of a data time series to .

This bulletin follows the [National Accounts Revisions Policy](#).

More about economy, business and jobs

- All ONS analysis, summarised in our [economy, business and jobs roundup](#).
- Explore the latest trends in employment, prices and trade in our [economic dashboard](#).
- View [all economic data](#).

Understanding the sector and financial accounts

This release presents analysis on UK aggregate data for the main economic indicators and summary estimates from the institutional sectors of the UK economy that are presented in the [UK Economic Accounts \(UKEA\) dataset](#):

- public corporations
- private non-financial corporations
- financial corporations
- households
- non-profit institutions serving households (NPISH)
- central government
- local government
- Rest of the world

This release uses data from the UKEA and provides detailed estimates of national product, income and expenditure, UK sector, non-financial and financial accounts, and UK balance of payments. These accounts are the underlying data that produce a single estimate of gross domestic product (GDP) using income, production and expenditure data.

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in the [Quarterly sector accounts QMI](#).

5 . Related links

[GDP quarterly national accounts](#)

Publication | Released 22 December 2020

Revised quarterly estimate of gross domestic product (GDP) for the UK. Uses additional data to provide a more precise indication of economic growth than the first estimate.

[GDP first quarterly estimate](#)

Publication | Released 12 November 2020

First quarterly estimate of gross domestic product (GDP). Contains current and constant price data on the value of goods and services to indicate the economic performance of the UK.

[Balance of payments](#)

Publication | Released 22 December 2020

A measure of cross-border transactions between the UK and Rest of the world. Includes trade, income, capital transfers and foreign assets and liabilities.

[Flow of funds](#)

Article | Released 7 November 2019

Aid for users to visualise the from-whom-to-whom estimates by using Sankey diagrams and heatmaps to show the counterparty relationships between institutional sectors.

[Alternative measure of households' saving ratio \(experimental\)](#)

Article | Released 8 October 2018

Experimental Statistics on the impact of removing "imputed" transactions from real household disposable income and the saving ratio to better represent the economic experience of UK households.

1 This data uses the latest population estimates with the exception of the latest year where populations projections are used. The quarterly data in this table does not sum to annuals

2 This data uses the UK resident population mid-year estimates published on 22 June 2017 and the population projections used are those published on 26 October 2017

3 The private non-financial corporations self-investment ratio is calculated by taking the sectors gross saving (RPKZ) and dividing it by their gross fixed capital formation (ROAW)

4 Quarterly Households debt to income ratio is calculated by taking the balance of Household debt (NIWK) and dividing it by the four quarter rolling sum of gross disposable income (HABN).
