1 . Main points

- The household saving ratio increased to 9.3% in Quarter 4 (Oct to Dec) 2022, from 8.9% in the previous quarter.
- Driving the 9.3% headline saving ratio is the rise in household income of £12.6 billion; this is itself driven by miscellaneous current transfers, which reached the highest level on record at £8.8 billion, increasing by £6.7 billion compared with the previous quarter.
- Real household disposable income increased by 1.3% this quarter after four consecutive quarters of negative growth; nominal gross disposable income saw strong growth at 3.6%, which is the largest quarter-on-quarter growth since Quarter 2 (Apr to June) 1999.
- The UK's borrowing position with the rest of the world as a percentage of gross domestic product (GDP) decreased to 0.6% in Quarter 4 2022 from 2.1% in Quarter 3 (July to Sept) 2022.
- Financial corporations increased their net lending position to 3.7% of GDP in Quarter 4 2022 from 1.9% of GDP in the previous quarter; this was driven by a fall in gross capital formation of £5.3 billion, which was driven by the acquisition less disposal of non-monetary gold.
- Non-financial corporations switched to net lending of 2.6% of GDP in Quarter 4 2022, following a net borrowing position of 0.1% in Quarter 3 2022; within non-financial corporations, private non-financial corporations saw a rise of £10.9 billion in their gross operating surplus, reflecting the energy price guarantee schemes.
- General government saw an increase in their net borrowing position to 7.0% of GDP in Quarter 4 2022, from net borrowing of 4.1% as a percentage of GDP in Quarter 3 2022.

2 . Quarterly sector accounts data

[Quarterly sector accounts](#)

Dataset | Released 31 March 2023

Quarterly aggregate economic indicators and summary estimates for the private non-financial corporations and households sectors of the UK economy, and revisions.

[UK Economic Accounts time series](#)

Dataset | Released 31 March 2023

Quarterly estimates of national product, income and expenditure, sector accounts and balance of payments.

[UK Economic Accounts: main aggregates](#)

Dataset | Released 31 March 2023

Quarterly national accounts aggregates, per head data. These include gross domestic product by income and expenditure, gross value added, gross fixed capital formation, change in inventories, gross operating surplus and revisions.

[UK Economic Accounts: flow of funds](#)

Dataset | Released 31 March 2023

Quarterly flow of funds, financial account and balance sheet data for the UK economy by institutional sector.

[UK Economic Accounts: institutional sector – general government](#)

Dataset | Released 31 March 2023

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for general government.

[UK Economic Accounts: institutional sector – households and non-profit institutions serving households](#)

Dataset | Released 31 March 2023

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for households and non-profit institutions serving households.

[UK Economic Accounts: financial and non-financial corporations sector](#)

Dataset | Released 31 March 2023

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for financial and non-financial corporations and their sub-sectors.

[UK Economic Accounts: institutional sector – rest of the world](#)

Dataset | Released 31 March 2023

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for the rest of the world.

[UK Economic Accounts: total economy](#)

Dataset | Released 22 December 2021

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for the UK total economy.

[UK Economic Accounts: balance of payments – current account](#)

Dataset | Released 22 December 2021

Quarterly transactions in trade in goods and services, primary, secondary and investment income, transactions with EU and non-EU countries and capital account.

[UK Economic Accounts: balance of payments – financial account](#)

Dataset | Released 22 December 2021

Quarterly transactions associated with changes of ownership of the UK's foreign financial assets and liabilities. These include direct, portfolio and other investment, sector analysis and government reserve assets.

[UK Economic Accounts: balance of payments – international investment position](#)

Dataset | Released 22 December 2021

Quarterly end-of-period balance sheet levels of UK external assets and liabilities, including direct, portfolio and other investment, sector analysis and government reserve assets.

3 . Glossary

Seasonal adjustment

All figures given in this bulletin are adjusted for seasonality unless the financial accounts are under discussion or otherwise stated. Seasonal adjustment removes seasonal or calendar effects from data to enable more meaningful comparisons over time.

Current price

Current price series are expressed in terms of the prices during the time period being estimated. These describe the prices recorded at the time of production or consumption and include the effect of price inflation over time.

Chained volume measures

Chained volume series (also known as real terms) have had the effects of inflation removed.

Gross disposable household income (GDHI) and real household disposable income (RHDI)

Gross disposable household income (GDHI) is the estimate of the total amount of income that households have available to either spend, save or invest including income received from wages (and the self-employed), social benefits, pensions and net property income (that is, earnings from interest on savings and dividends from shares) less taxes on income and wealth.

Adjusting GDHI to remove the effects of inflation gives real household disposable income (RHDI). This is a measure of the real purchasing power of households' income, in terms of the physical quantity of goods and services they would be able to purchase if prices remained constant over time.

The household saving ratio explained

The saving ratio estimates the amount of money households have available to save as a percentage of their gross disposable income plus pension accumulations.

Net lending or borrowing

The net lending of a sector represents the surplus resources that a sector makes available to other sectors. Net borrowing represents their financing of a deficit from other sectors.

Net lending means a sector has money left over after its spending and investment in a given period, whereas net borrowing means it has spent and invested more than it received and has a need for financing, which may be covered by borrowing, issuing shares or bonds, or by drawing on reserves.

4 . Measuring the data

Revisions within this release

This bulletin includes new data for the latest available quarter, Quarter 4 (Oct to Dec) 2022, and revisions to data from Quarter 1 (Jan to Mar) 2022 to Quarter 3 (July to Sep) 2022. This bulletin follows the [National Accounts Revisions Policy](#).

Understanding the sector and financial accounts

This release presents analysis on UK aggregate data for the main economic indicators and summary estimates from the institutional sectors of the UK economy that are presented in the UK Economic Accounts (UKEA) dataset, including:

- public corporations
- private non-financial corporations
- financial corporations
- households
- non-profit institutions serving households (NPISH)
- central government
- local government
- rest of the world

This release uses data from the UKEA and provides detailed estimates of national product, income and expenditure, UK sector, non-financial and financial accounts, and UK balance of payments. These accounts are the underlying data that produce a single estimate of gross domestic product (GDP) using income, production and expenditure data.

Quality and Methodology Information (QMI) report

The [Quarterly sector accounts QMI report](#) contains important information on:

- the strengths and limitations of the data and how they compare with related data
- uses and users of the data
- how the output was created
- the quality of the output including the accuracy of the data

System of National Accounts consultation

As part of an update to the System of National Accounts, the United Nations (UN) are in the process of consulting on several areas being considered for improvement. Previous and live consultations can be found on the [UN Statistics Division website](#). If you would like to discuss any of these consultations with the Office for National Statistics (ONS), please contact us at sna.consultations@ons.gov.uk. Bodies outside the UK national statistical system are also free to respond to the consultations themselves.

Economic statistics governance after EU exit

Following the UK's exit from the EU, new governance arrangements are being put in place that will support the adoption and implementation of high-quality standards for UK economic statistics. These governance arrangements will promote international comparability and add to the credibility and independence of the UK's statistical system.

At the centre of this new governance framework will be the new National Statistician's Committee for Advice on Standards for Economic Statistics (NSCASE). NSCASE will support the UK by ensuring its processes for influencing and adopting international statistical standards are world leading. The advice NSCASE provides to the National Statistician will span the full range of domains in economic statistics, including the national accounts, fiscal statistics, prices, trade and the balance of payments and labour market statistics.

5 . Related links

[GDP quarterly national accounts](#)

Bulletin | Released quarterly

Revised quarterly estimate of gross domestic product (GDP) for the UK. Uses additional data to provide a more precise indication of economic growth than the first estimate.

[GDP first quarterly estimate](#)

Bulletin | Released quarterly

First quarterly estimate of gross domestic product (GDP). Contains current and constant price data on the value of goods and services to indicate the economic performance of the UK.

1 This data uses the latest population estimates with the exception of the latest year where populations projections are used. The quarterly data in this table does not sum to annuals

2 This data uses the UK resident population mid-year estimates published and the population projections available

3 The private non-financial corporations self-investment ratio is calculated by taking the sectors gross saving (RPKZ) and dividing it by their gross fixed capital formation (ROAW)

4 Quarterly Households debt to income ratio is calculated by taking the balance of Household debt (NIWK) and dividing it by the four quarter rolling sum of gross disposable income (HABN).
