## 2 . Main points

### Trends and considerations around comparisons.

This month's figures continue to show signs that the labour market may be cooling, with the number of vacancies still falling and unemployment rising, though earnings growth remains relatively strong.

Short-term movements varied across our different measures of employment. There were decreases in estimates of employment from the Labour Force Survey and in estimates of payrolled employees from HMRC's Real Time Information data in recent months. Today, we have also published our quarterly workforce jobs provisional estimate for March 2024, which suggests employment has increased since December 2023. These different series measure slightly different concepts and cover different time periods, with divergent trends possible for individual data points. In these instances we advise making longer term comparisons that offer more stability.

[Dataset X12](#) sets out the annual growth rates for these measures in recent periods and suggests that the medium-term trend for employment growth is steadily weakening.

## Latest data

Payrolled employees in the UK decreased by 36,000 (0.1%) between March and April 2024, but rose by 201,000 (0.7%) between April 2023 and April 2024.

The early estimate of payrolled employees for May 2024 decreased by 3,000 (0.0%) on the month but increased by 167,000 (0.6%) on the year, to 30.3 million. The May 2024 estimate should be treated as a provisional estimate and is likely to be revised when more data are received next month.

Increased volatility of Labour Force Survey (LFS) estimates, resulting from smaller achieved sample sizes, means that estimates of quarterly change should be treated with additional caution, and we recommend using them as part of our suite of labour market indicators, alongside Workforce Jobs, Claimant Count data, and Pay As You Earn (PAYE) Real Time Information (RTI) estimates.

The UK employment rate (for people aged 16 to 64 years) was estimated at 74.3% in February to April 2024, below estimates of a year ago, and decreased in the latest quarter.

In March 2024, the total Workforce Jobs (WFJ) in the UK estimate rose by 431,000 on the year to 37.2 million, with increases in both employee jobs and self-employment jobs.

The UK unemployment rate (for people aged 16 years and over) was estimated at 4.4% in February to April 2024, above estimates of a year ago, and increased in the latest quarter.

We also publish the [Claimant Count](#), a measure of the number of people who are receiving a benefit principally for the reason of being unemployed. The UK Claimant Count for May 2024 increased on the month and on the year, to 1.629 million.

The UK economic inactivity rate for people aged 16 to 64 years was estimated at 22.3% in February to April 2024, above estimates of a year ago, and increased in the latest quarter.

In March to May 2024, the estimated number of vacancies in the UK decreased by 12,000 on the quarter to 904,000. Vacancies decreased on the quarter for the 23rd consecutive period but are still above pre-coronavirus (COVID-19) pandemic levels.

Annual growth in employees' average regular earnings (excluding bonuses) in Great Britain was 6.0% in February to April 2024, and annual growth in total earnings (including bonuses) was 5.9%.

Annual growth in real terms (adjusted for inflation using the Consumer Prices Index including owner occupiers' housing costs (CPIH)) for regular pay was 2.3% in February to April 2024, and for total pay was 2.2%.

There were an estimated 17,000 working days lost because of labour disputes across the UK in April 2024.

This bulletin includes data from business and social surveys, as well as data from administrative sources. It includes a combination of accredited official statistics and official statistics in development and, therefore, we advise the consideration of this when using.

## 3 . Latest indicators at a glance

## 4 . Labour market data

### [Summary of labour market statistics](#)

Dataset A01 | Released 11 June 2024

Labour market statistics summary data table, including earnings, employment, unemployment, redundancies and vacancies, Great Britain and UK, published monthly.

### [Earnings and employment from Pay As You Earn Real Time Information, seasonally adjusted](#)

Dataset | Released 11 June 2024

Earnings and employment statistics from Pay As You Earn (PAYE) Real Time Information (RTI), seasonally adjusted. These are official statistics in development.

### [A guide to labour market data](#)

Methodology | Updated 21 April 2023

Summary of labour market datasets, providing estimates of employment, unemployment, average weekly earnings, and the number of vacancies. Tables are listed alphabetically and by topic.

View all related data on our [related data page](#).

Alternatively, [Nomis](#) provides free access to the most detailed and up-to-date UK labour market statistics.

## 5 . Glossary

### Average weekly earnings

Average weekly earnings measure money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises, because they also reflect, for example, changes in the overall structure of the workforce.

More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

### Economic inactivity

People not in the labour force are not in employment but do not meet the internationally accepted definition of unemployment. This is because they have not been seeking work within the last four weeks or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and 64 years who are not in the labour force.

### Employment

Employment measures the number of people in paid work or who had a job that they were temporarily away from (for example, because they were on holiday or off sick). This differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in employment.

### Unemployment

Unemployment measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (people in work and those seeking and available to work) who are unemployed.

### Claimant Count

The Claimant Count is an [official statistic in development](#) that measures the number of people who are receiving a benefit principally for the reason of being unemployed. Currently, the Claimant Count consists of those receiving Jobseekers' Allowance and Universal Credit claimants in the "searching for work" conditionality group.

## Vacancies

Vacancies are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey. This is a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry, and fishing (a small sector for which the collection of estimates would not be practical).

## Pay As You Earn Real Time Information

These data come from HM Revenue and Customs' (HMRC's) Pay As You Earn (PAYE) Real Time Information (RTI) system. They cover the whole population, rather than a sample of people or companies, and they will allow for more detailed estimates of the population. The PAYE RTI statistics are [official statistics in development](#) (previously called experimental statistics) because the methodologies used to produce the statistics are still in their development phase.

In June 2023, the Office for Statistics Regulation (OSR) published an assessment report of HM Revenue and Customs (HMRC) and Office for National Statistics (ONS) statistics on earnings and employment from Pay as You Earn Real Time Information (PAYE RTI). HMRC and the ONS welcome OSR's assessment report and have developed an [action plan focusing on the six requirements](#).

A more detailed glossary is available in our [Guide to labour market statistics methodology](#).

## 6 . Measuring the data

### Official statistics

On 7 June 2024, the Office for Statistics Regulation (OSR) introduced the new accredited official statistics badge, to denote official statistics that have been independently review by OSR and judged to meet the standards in the [Code of Practice for Statistics](#).

This UK labour market bulletin includes a combination of [accredited official statistics](#) and [official statistics in development](#).

The following labour market outputs are accredited official statistics:

- average weekly earnings
- labour disputes
- Office for National Statistics (ONS) vacancy statistics
- Workforce Jobs

The following labour market outputs are official statistics in development:

- Pay As You Earn (PAYE) Real Time Information (RTI) estimates
- Labour Force Survey estimates
- ONS Claimant Count

## Labour Force Survey

We have been facing the challenge of falling response rates for household surveys, as have other comparable countries. This issue became more acute in the Labour Force Survey (LFS) data collected for August 2023. The LFS estimates due to be published in October 2023 were suspended because of quality concerns. We developed a comprehensive plan to address these concerns and reintroduce LFS, as described in our [Labour Force Survey: planned improvements and its reintroduction estimates methodology](#).

As stated on 5 February 2024 in our [Impact of reweighting on Labour Force Survey key indicators: 2024 article](#), from 13 February we have reinstated reweighted LFS estimates into our monthly publication. These LFS estimates are [official statistics in development](#).

Reweighting does not address the volatility we have seen in recent periods and which we expect to see to some extent in the future, so we would advise caution when interpreting short-term changes in headline rates and recommend using them as part of our suite of labour market indicators, alongside Workforce Jobs, Claimant Count data and Pay As You Earn (PAYE) Real Time Information (RTI) estimates.

Further information on response rates and other quality-related issues for the LFS can be found in our quarterly [Labour Force Survey performance and quality monitoring reports](#).

Our [Comparison of labour market data sources methodology](#) compares data sources and discusses some of the main differences.

## Coronavirus

For more information on how labour market data sources were affected by the coronavirus (COVID-19) pandemic, see our [Coronavirus and the effects on UK labour market statistics article](#).

## Making our published spreadsheets accessible

Following the [Government Statistical Service \(GSS\) guidance on releasing statistics in spreadsheets](#), we will be amending our published tables over the coming months to improve usability, accessibility and machine readability of our published statistics. To help users change to the new formats, we will be publishing sample versions of a selection of our tables and, where practical, initially publish the tables in both the new and current formats. If you have any questions or comments, please email us at [labour.market@ons.gov.uk](mailto:labour.market@ons.gov.uk).

## Labour market transformation

We have published a [Labour market transformation article](#) and a [blog](#) providing an update on the transformation of labour market statistics.

We welcome your feedback on this latest update and our plans. Please email us at [labour.market.transformation@ons.gov.uk](mailto:labour.market.transformation@ons.gov.uk) to tell us what you think

## 7 . Strengths and limitations

The estimates presented in this bulletin contain uncertainty. For more information, see our [Uncertainty and how we measure it methodology](#).

Information on revisions is available in our [Labour market statistics revisions policy](#).

Information on the strengths and limitations of this bulletin is available in our [Labour market overview, UK: April 2021 bulletin](#).

Further information is available in our [Guide to labour market statistics methodology](#).

Source: Labour Force Survey  
Labour market statistics enquiries: [labour.market@ons.gov.uk](mailto:labour.market@ons.gov.uk)

1. The Labour Force Survey (LFS) is a survey of households in the UK.

2. The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

3. The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.

4. The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

5. Data from Jun-Aug 2011 to Jun-Aug 2022 have been modelled to make them consistent with the new populations introduced in Jul-Sep 2022

### Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

### Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

# SUMMARY

## 2(1) Labour market status by age group

United Kingdom (thousands) seasonally adjusted

	Aged 16 and over						Aged 16-64

Labour market statistics enquiries:labour.market@ons.gov.uk

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg, compare Apr-Jun with Jan-Mar, not with Mar-May).

- The split between full-time and part-time employment is based on respondents' self-classification.
- This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.
- These series cover Employees and Self-employed only. These series include some temporary employees.
- The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of the other columns in this section of the table.
- Data for this period has not been reweighted and so is inconsistent with data from Jul-Sep 2022 onwards.

Source: returns from public sector organisations

**Explanatory Note:** The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large numbers of people have moved between the public and private sectors. These major reclassifications are as follows:

- Further Education corporations and Sixth Form College corporations in England are included in the private sector from June 2012 but in the public sector for earlier time periods.
- Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods.
- Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods.
- Royal Bank of Scotland plc is included in the public sector from December 2008 but in the private sector for earlier time periods.
- Network Rail is included in the private sector before December 2002. From December 2002 onwards it is included in the public sector (except for the period from June 2003 to March 2004, when it is included in the private sector).
- Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods.
- Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods.
- Welsh Further Education colleges are included in the private sector from March 2015 but in the public sector for earlier time periods.
- Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods.
- Housing associations in Scotland are included in the public sector from September 2001 until June 2018; they are included in the private sector for earlier and later time periods.
- Housing associations in Wales are included in the private sector from June 2018; they are included in the public sector for earlier time periods.
- Housing associations in Northern Ireland are included in the public sector from March 1999 to June 2020.
- Train operating companies in England, Scotland and Wales operating under emergency measure agreements are included in the public sector from June 2020.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for assessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications.

1. Estimated as the difference between LFS total employment and the data from public sector organisations.
2. LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.
3. This series excludes locally engaged staff stationed outside the United Kingdom.
4. This series excludes the Northern Ireland Civil Service.
5. This series may not exactly equal the sum of the components because each component is independently seasonally adjusted.

More detailed estimates are available in the Public Sector Employment Statistical Bulletin at: <https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/publicsectorpersonnel/bulletins/publicsectoremployment/latest>

Workforce jobs enquiries 01633 456776

Sources: Employer surveys, Labour Force Survey and administrative sources

1. Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes shown at Table 3. The estimates for government supported trainees shown in this table exclude trainees with contracts of employment as such people are included in the estimates of employee jobs.

2. This series is not exclusively a public sector series as it includes some private sector jobs. See table 4 for estimates of public and private sector employment.

Source: Labour Force Survey

1. The total series includes people who do not state their country of birth or nationality. The total levels series MGTM does not therefore equal the sum of the "UK" and "Non-UK" series.

2. This series consists of all 27 EU member states. This series equals the sum of EU14, EU8, EU2 and Other EU.

3. Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden.

4. Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovak Republic and Slovenia.

5. Romania and Bulgaria.

6. Cyprus, Malta and Croatia.

7. Total Non-EU equals the sum of Other Europe, Total Africa, Total Asia and Total America and Oceania.

8. Data for this period has not been reweighted and so is inconsistent with data from Jul-Sep 2022 onwards.

The estimates shown in this table relate to the number of people in employment and should not be used as a proxy for flows of foreign migrants into the UK.

Data Source: Labour Force Survey.

Labour market statistics enquiries: labour.market@ons.gov.uk

- Discouraged workers are those who are not looking for work because they believe no jobs are available.
- Other reasons include people who (i) are waiting the results of a job application, (ii) have not yet started looking for work, (iii) do not need or want employment, (iv) have given an unclassified reason for being economically inactive, or (v) have not given a reason for being economically inactive.
- Data for this period has not been reweighted and so is inconsistent with data from Jul-Sep 2022 onwards.

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

1. Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:

<https://www.ons.gov.uk/employmentandlabourmarket/peoplenotinwork/unemployment/bulletins/youngpeoplenotineducationemploymentortrainingneet>

2. People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

3. Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

4. Data from July to September 2022 onward has been reweighted, causing a step change discontinuity.

Email: [earnings@ons.gov.uk](mailto:earnings@ons.gov.uk)

1. Estimates of total pay include bonuses but exclude arrears of pay.

2. The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

3. Estimates of real earnings are calculated by deflating the nominal earnings estimates by the Consumer Prices Index including owner occupiers' housing costs (CPIH), our preferred measure of consumer price inflation.

Labour market statistics enquiries: labour.market@ons.gov.uk

- As figures are taken from OECD they will not match ONS published figures for the United Kingdom.
- Employment rate data is for ages 15 to 64. For the United Kingdom and the United States, the lower age limit is 16 years old.
- Unemployment rate data is for ages 15 and over. For the United Kingdom and the United States, the lower age limit is 16 years old.
- Estimated values are highlighted with shaded cells.

Data source: ONS Labour Disputes Survey  
Labour disputes enquiries 01633 455400

- In April 2020, collection and publication of labour disputes data were temporarily suspended to protect and prioritise our outputs in response to the coronavirus (COVID-19) pandemic. In June 2022, collection of the Labour Disputes Inquiry restarted, but only for the period from January 2022 onwards.
  - Although collection of labour disputes statistics restarted for the period from January 2022 onwards, collection for June 2022 onwards was prioritised. Data for the period January 2022 to May 2022 will be made available shortly.
  - Data for number of workers involved are only available from January 1986 onwards.
- [p] - provisional, [r] - revised, [x] - not available

### Change on quarter (change since November - January 2024)

Note: Changes on quarter at regional level are particularly subject to sampling variability and should be interpreted in the context of changes over several quarters rather than in isolation.

Area Codes	Area Names	Economically active <sup>1</sup>		Employment		Unemployment		Economically inactive

The Labour Force Survey is tabulated by region of residence.

1. Economically active = Employment plus Unemployment.

2. Denominator = all persons aged 16 to 64.

3. Denominator = total economically active

4. Data from July to September 2022 onward has been reweighted, causing a step change discontinuity.

Change %	5.5		4.8		6.7	

Data source: Labour Force Survey

Labour market statistics enquiries: [labour.market@ons.gov.uk](mailto:labour.market@ons.gov.uk)

1. The redundancy level is the number of people who were made redundant in the three months prior to interview. The figure is not seasonally adjusted.
2. The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.
3. Data for this period has not been reweighted and so is inconsistent with data from Jul-Sep 2022 onwards.

# REGIONAL SUMMARY

## 23(2) Regional summary of Workforce Jobs

Thousands,  
seasonally adjusted

Area Codes	Area Names	March 2024	Change on December 2023
K02000001	United Kingdom	37,162	297
K03000001	Great Britain	36,215	286
E92000001	England	31,760	173
E12000001	North East	1,230	-5
E12000002	North West	3,916	20
E12000003	Yorkshire and The Humber	2,863	29
E12000004	East Midlands	2,513	-7
E12000005	West Midlands	3,081	22
E12000006	East	3,229	7
E12000007	London	6,612	65
E12000008	South East	5,164	20
E12000009	South West	3,152	21
W92000004	Wales	1,537	32
S92000003	Scotland	2,918	81
N92000002	Northern Ireland	940	11

Workforce jobs are mainly sourced from employer surveys and are tabulated by region of workplace.

HM Forces stationed abroad are included in the UK workforce jobs estimates but not in the regional estimates. The UK workforce jobs estimates therefore do not equal the sum of the regional estimates.

Workforce Jobs data for September 2022 onwards has been affected by the reweighting of the LFS, causing a step change discontinuity.
