5. [Cite this statistical bulletin](#)

1 . Main points

- Total public sector employment increased in June 2023 compared with the previous quarter and the previous year; central government is the main contributor to the rise with smaller increases in local government and public corporations.
- There were an estimated 5.87 million employees in the public sector in June 2023, which is 36,000 (0.6%) more than in March 2023 and 133,000 (2.3%) more than in June 2022.
- Employment in central government was an estimated 3.67 million in June 2023, a rise of 30,000 (0.8%) compared with March 2023 and 116,000 (3.3%) compared with June 2022; the main contributors to this increase were the NHS, the Civil Service, and local authority schools becoming academies.
- The NHS employed an estimated 1.96 million people in June 2023, an increase of 21,000 (1.1%) compared with March 2023 and an increase of 78,000 (4.1%) compared with June 2022.
- Employment in local government was an estimated 2.00 million for June 2023, an increase of 4,000 (0.2%) since March 2023 and 10,000 (0.5%) since June 2022; an increase in employment in the police has contributed to the increase from a year ago.
- There were 522,000 employees in the Civil Service in June 2023, up 1,000 (0.2%) compared with March 2023, and up 10,000 (2.0%) compared with June 2022.
- There were an estimated 27.01 million employees in the private sector in June 2023, which is 243,000 (0.9%) fewer than in March 2023 but 3,000 (0.0%) more than in June 2022.

2 . Public sector employment data

[Public sector employment](#)

Dataset | Released 12 September 2023

Quarterly estimates of UK and regional public sector employment made up of central government (including Civil Service), local government and public corporations. The estimates also include a breakdown by industry.

[Public sector employment time series](#)

Dataset | Dataset ID: PSE | Released 12 September 2023

Seasonally adjusted and non-seasonally adjusted quarterly time series of UK public sector employment, containing the latest estimates.

3 . Measuring the data

Reclassification of further education institutions in England

On 29 November 2022, we announced the reclassification of further education corporations, sixth form college corporations, and designated institutions in England from the non-profit institutions serving households (NPISH) sector to the central government sector. Our [Economic statistics sector classification -- classification update and forward work plan: November 2022 article](#) has more information on this classification decision.

This reclassification will be reflected in the September 2023 public sector employment statistics to be released on 12 December 2023.

Coronavirus (COVID-19)

Our [Coronavirus and the effects on UK labour market statistics article](#) has more information about how labour market sources have been affected by the coronavirus (COVID-19) pandemic.

View our [Comparison of labour market data sources and the main differences article](#).

Impact on production of public sector employment estimates

The collection of the data contained in this release was unaffected by the coronavirus pandemic. Comments provided by survey respondents suggested the estimates were partly affected by coronavirus planning and response.

Sources

The main source of public sector employment (PSE) data is the Quarterly Public Sector Employment Survey, which is supplemented by data from external sources. Further information can be found in our [PSE Quality and Methodology Information \(QMI\)](#).

Full-time equivalents

While this bulletin focuses on headcount estimates of PSE, full-time equivalent estimates (based on the number of hours worked divided by the standard full-time hours) are available in our [accompanying PSE datasets](#).

Seasonal adjustment

All [PSE data time series](#) in this release, with the exception of the regional series, are seasonally adjusted to aid interpretation. Relationships that hold in the unadjusted series do not necessarily hold for the seasonally adjusted series. For example, total PSE equals the total of all public sector industry estimates before seasonal adjustment, but this is not necessarily true after seasonal adjustment.

Reclassifications between the public and private sectors

Comparisons of public and private sector employment over time are complicated by several major reclassifications. This is where bodies employing large numbers of people have moved between the public and private sectors. We produce estimates of public and private sector employment excluding the effects of major reclassifications to help you understand underlying trends in employment. We publish these alongside estimates of total public and private sector employment in [Tables 5, 6a and 7a of the PSE datasets](#).

Quality

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in our [Public sector employment QMI](#).

4 . Related links

[Civil Service statistics](#)

Statistical release | Released 2 August 2023

Detailed information on the UK Civil Service workforce, including pay, diversity, and location. Responsibility for the collection and publication of this annual release was transferred from the Office for National Statistics (ONS) to the Cabinet Office with effect from 1 October 2018.

[Public sector employment in Scotland](#)

Statistical release | Released 12 September 2023

Estimates of public sector employment (PSE) in Scotland, published quarterly by the Scottish Government on the same day as this bulletin.

[Quarterly Employment Survey](#)

Statistical release | Released 12 September 2023

Estimates of short-term employee jobs in Northern Ireland, including public and private sector employment estimates, published by the Northern Ireland Statistics and Research Agency (NISRA) on the same day as this bulletin.

[Local government employment](#)

Dataset | Released quarterly

Estimates of employment for each local authority in England and Wales, sourced from the ONS Quarterly Public Sector Employment Survey (QPSES), and published quarterly by the Local Government Association.

¹ Numbers are rounded to the nearest ten, and numbers less than five are represented by "..". Data not available are represented by "-".

² Department totals include Executive Agencies, Ministerial and Non-Ministerial Departments.

³ On 7 February 2023, the Prime Minister announced Machinery of Government changes to create three new government departments: the Department for Energy Security and Net Zero, the Department for Science, Innovation and Technology, and the Department for Business and Trade; as well as a refocused Department for Culture, Media and Sport. The new departments are formed from the Department for Business, Energy and Industrial Strategy and the Department for International Trade, along with the Department for Digital, Culture, Media and Sport. Although the changes took effect immediately following the announcement, the full transition programme is yet to complete and consequently the new departments were not in a position to report per the new structure for the June 2023 statistics. All affected departments and their associated agencies will appear under existing hierarchies until the transition programme is complete.

1 Numbers are rounded to the nearest ten, and numbers less than five are represented by "..". Data not available are represented by "-".

2 Department totals include Executive Agencies, Ministerial and Non-Ministerial Departments.

3 On 7 February 2023, the Prime Minister announced Machinery of Government changes to create three new government departments: the Department for Energy Security and Net Zero, the Department for Science, Innovation and Technology, and the Department for Business and Trade; as well as a refocused Department for Culture, Media and Sport. The new departments are formed from the Department for Business, Energy and Industrial Strategy and the Department for International Trade, along with the Department for Digital, Culture, Media and Sport. Although the changes took effect immediately following the announcement, the full transition programme is yet to complete and consequently the new departments were not in a position to report per the new structure for the June 2023 statistics. All affected departments and their associated agencies will appear under existing hierarchies until the transition programme is complete.

² On 7 February 2023, the Prime Minister announced Machinery of Government changes to create three new government departments: the Department for Energy Security and Net Zero, the Department for Science, Innovation and Technology, and the Department for Business and Trade; as well as a refocused Department for Culture, Media and Sport. The new departments are formed from the Department for Business, Energy and Industrial Strategy and the Department for International Trade, along with the Department for Digital, Culture, Media and Sport. Although the changes took effect immediately following the announcement, the full transition programme is yet to complete and consequently the new departments were not in a position to report per the new structure for the June 2023 statistics. All affected departments and their associated agencies will appear under existing hierarchies until the transition programme is complete.

³ Due to internal organisational changes the Defence Nuclear Organisation is now included as part of the Ministry of Defence (excluding trading funds).

⁴ Royal Fleet Auxiliary (RFA) is now reported separately from the main department, the Ministry of Defence (excluding trading funds). This is to align with other official statistics which show RFA as a budgetary area.
