

Nomis navigation instructions

www.nomisweb.co.uk is a service run by Durham University on behalf of the Office for National Statistics. Census data is available to view from the 1981, 1991, 2001 and 2011 censuses. These instructions provide an overview of how to navigate the website to explore data for each census year.

To explore 2011 data

If you're looking at one particular area, the Local Area Report is the easiest way to find key statistics for one area.

From the Nomis homepage www.nomisweb.co.uk, enter the name of the area you're looking for into the Local Area Report box.

The screenshot shows a search box titled "Local Area Report". Below the title is a description: "View a report for a local area such as a parish, ward, village or town. Includes information on the characteristics of people and households in the area." The search box contains the text "Titchfield" and a green "Search" button.

Hit **Search** and you'll be able to choose from a list of areas that match what you've entered

The screenshot shows the search results for "Titchfield". The title is "Local Area Report for areas in England and Wales" and the subtitle is "Search for your area". The search box contains "Titchfield" and a green "Search" button. Below the search box, the results are listed under "2011 Census Wards":

- Titchfield (Fareham)
- Titchfield Common (Fareham)

Below the results, there is an "Options" section with a checkbox and the text: "When I choose an area, include its parent areas (for example the local authority and country that it is within)."

You can also search by postcode and it will give you different geography options to explore

Local Area Report

Summary

This report covers the characteristics of people and households in Titchfield 2011 Census Ward in Fareham (GSS code E05004528). Figures are sourced from the 2011 Census key statistics.

There were 7,280 usual residents as at Census day 2011. Of these, 98.2% lived in households and 1.8% lived in communal establishments. The average (mean) age of residents was 41.4 years.

In total there were 3,064 household spaces. Of these, 2,965 (96.8%) had at least one usual resident and 99 (3.2%) had no usual residents.

Contents

⇒ Who we are

Information about the personal characteristics of people who usually live in an area including: Resident population, Age, Marital status, Living arrangements, Ethnic group, National identity, Country of birth, Passports held, Household language, Religion and Unpaid care.

⇒ How we live

The characteristics of the households we live in including: Number of households and type of accommodation, Whether owned or rented, Number of rooms and central heating, Number of cars, Household composition, Households with no adults in employment, Lone parent households and Communal establishments.

⇒ What we do

This section covers work-related topics including: Number of people in employment and unemployed, Qualifications and students, Hours worked, and the Industries and Occupations we work in.

⇒ Definitions

It gives an overview, as well as some key statistic tables and links to those tables so that you can explore further.

If you want to explore different areas, or broader topics, you can use the **Table Finder** tool.

From the homepage, select **2011 Select by topic (table finder)**

The screenshot shows a purple header with the text "Census Statistics". Below the header, there are four menu items. The second item, "2011 Search by topic (table finder)", is circled in red. To the right of the menu items is the Census logo, which consists of a stylized 'C' made of purple and white geometric shapes, with the word "Census" written below it.

Statistical Disclosure Control
In order to protect against disclosure of personal information from the 2011 Census, there has been swapping of records in the Census database between different geographic areas, and so some counts will be affected. In the main, the greatest effects will be at the lowest geographies, since the record swapping is targeted towards those households with unusual characteristics in small areas.
More details on the ONS Census disclosure control strategy may be found on the [Statistical Disclosure Control](#) page on the ONS web site.

Now you can work your way through the selections on the left hand side to explore the data.

Make sure that a tick is in the **Guide my step-by-step** box to the left which will provide you with instructions.

Start with Geography

Step 1 of 6 - geography selection

You need make a selection for geography before you can continue to the next step.

You can find areas by postcode or place name with the **Search** selection method.

Geography

Select Using List

Category selection

commonly used

- [2011 output areas](#)
- [2011 super output areas - lower layer](#)
- [2011 super output areas - mid layer](#)
- [2011 wards](#)
- [built-up areas ⁱ](#)
- [built-up areas including subdivisions ⁱ](#)
- [countries](#)
- [english parishes / welsh communities](#)
- [local authorities: county / unitary \(prior to April 2015\)](#)

To look at a specific area, you can search for it by postcode or place name with the **Search** selection method.

You can also use the **map** method to identify what area you can drill down to

You can select **All** if you would like to look at all of a certain geography (for example all Local Authorities) or you can select **Some** to explore and cross reference specific geography areas. This will take you to a screen where you can select which specific areas you would like.

Once you've chosen your geography areas, you need to select which variable groupings you want to see on your table

Step 2 of 6 - language selection

[< Back](#) [Next >](#)

Choose your language then continue to the next step.

Language

Tick to select columns

All categories: English as a household language

- All people aged 16 and over in household have English as a main language (English or Welsh in Wales)
- At least one but not all people aged 16 and over in household have English as a main language (English or Welsh in Wales)
- No people aged 16 and over in household but at least one person aged 3 to 15 has English as a main language (English or Welsh in Wales)
- No people in household have English as a main language (English or Welsh in Wales)

You will need to do this for each variable you have selected

When you have completed this for each variable, you can select what format you'd like the data downloaded in.

Step 5 of 6 - Format / Layout selection

[< Back](#) [Next >](#)

Choose the format for your data and any other options, then click the **Download** button.

Choose Data Format And Layout

Format

- Microsoft Excel (.xlsx or .xls)
- Comma separated values (.csv)
- Web browser
- Map [i](#)
- Database - Tab separated values (.tsv)
- Nomis API [i](#)

Layout

Table layout (the default selection for columns and rows produces least number of tables)

Columns

Rows

Your query will produce 2 cells of data in 1 table

Other options

Filename (optional)

- Include area codes (useful if you need to match up results with GIS systems etc)
- Automatically define Excel Named Ranges
- One table per Worksheet

[Download Data](#)

Once you've selected your format, click **Download Data** to download your table.

To explore 2001 data

From the Nomis homepage, select **2001 Search by topic (table finder)** from inside the purple box that says **Census Statistics** as shown below:

The screenshot shows a purple header bar with the text "Census Statistics". Below the header, there are four main sections:

- 2011 Data catalogue**: Browse by table type and number, or view by release.
- 2011 Search by topic (table finder)**: Search by keyword and geography type.
- 2001 catalogue**: Browse by table type and number.
- 2001 Search by topic (table finder)**: Search by keyword and geography type.

The "2001 Search by topic (table finder)" link is circled in red. A "Census" logo is visible in the top right corner of the content area.

This will take you to a page with all the tables available from 2001. Across the top of this page you'll see this:

The screenshot shows the "Census 2001 Tables" page. At the top left is the title "Census 2001 Tables". To its right is a search bar with the placeholder text "Search table titles...". Below the search bar, there is a section titled "Show tables available at: **National (all tables)** level." followed by a series of radio buttons for different geography levels: National (all tables), Regional, Local Authority, Ward, MSOA, LSOA, and Output Area. The "National (all tables)" radio button is selected.

If you select the geography level you want to explore, it will show just tables available at that level.

Keyword filter options

Select one or more keywords to identify tables containing those topics. After selecting a keyword only those keywords which appear in combination with it will remain visible.

- Accommodation Type
- Adult
- Age
- Amenities
- Approximated Social Grade
- Armed forces
- Bath
- Care/Provision of unpaid care
- Cars or Vans
- Central Heating
- Civil partnership status
- Cohabiting couple
- Communal establishment
- Country of Birth
- Couples
- Dependent child(ren)

Alternatively, you can use the **keyword filter** options on the left hand side to see the tables that will provide the data you would like.

Once you've selected a keyword, only keywords which appear in combination with your first selection will appear to help you narrow down your search.

Once you've selected your keywords a list of possible tables will appear to the right

The screenshot shows the 'Table Finder' interface. On the left, there are 'Keyword filter options' with a search box and a list of filters: Age, **Approximated Social Grade** (checked), Dependent child(ren), Household Reference Person, Sex, Social grade, and Unemployed. Below that are 'Unit filter options' with 'Persons' and 'Households' (checked). The main area is titled 'Census 2001 Tables' and shows a search bar and a level selector set to 'National (all tables)'. Four search results are listed, each with a title and table population. The first result is 'Age of household reference person (HRP) and dependent children by approximated social grade [ST067]' with a population of 'All households'. The second is 'Sex and approximated social grade by age [ST066]' with a population of 'All people aged 16 and over in households'. The third is 'Age of Household Reference Person (HRP) and dependent children by approximated social grade [CS067]' with a population of 'All households'. The fourth is 'Sex and approximated social grade by age [CS066]' with a population of 'All people aged 16 and over in households'.

If you hover in the box of a table, you'll see options appear to the right saying **info** or **select**

If you click on **info**, it will give you more detailed information about the table, including the full list of variable groupings

The screenshot shows the detailed information page for the table 'Age of household reference person (HRP) and dependent children by approximated social grade [ST067]'. The table population is 'All households'. On the right side, there are two buttons: 'Info...' (circled in red) and 'Select'. The page is divided into sections: 'Units' (Households), 'Description' (This dataset provides 2001 Census estimates that classify households in England and Wales by age of household reference person (HRP) and dependent children by approximated social grade. The estimates are as at census day, 29 April 2001. A dependent child is a person in a household aged 0 to 15 (whether or not in a family) or a person aged 16 to 18 who is a full-time student in a family with parent(s). Social Grade is the socio-economic classification used by the Market Research and Marketing Industries, most often in the analysis of spending habits and consumer attitudes. Although it is not possible to allocate Social Grade precisely from information collected by the 2001 Census, the Market Research Society has developed a method for using Census information to provide a good approximation of Social Grade.), 'Variables' (Age of Household Reference Person 5, All categories: Age of HRP (default), Age of HRP under 25, Age of HRP 25 to 34, Age of HRP 35 to 49, Age of HRP 50 and over; Dependent children 5, Total (default), Youngest dependent child aged 0 to 4, Youngest dependent child aged 5 to 11, Youngest dependent child aged 12 to 18, No dependent children; Social Grade 6).

You can then select which table you'd prefer to look at, by clicking on the **Select** button

On the left hand side, click on the blue button that says **Query data**

Age of household reference person (HRP) and dependent children by approximated social grade

Table population All households

This dataset provides 2001 Census estimates that classify households in England and Wales by age of household reference person (HRP) and dependent children by approximated social grade. The estimates are as at census day, 29 April 2001.

A dependent child is a person in a household aged 0 to 15 (whether or not in a family) or a person aged 16 to 18 who is a full-time student in a family with parent(s).

Social Grade is the socio-economic classification used by the Market Research and Marketing Industries, most often in the analysis of spending habits and consumer attitudes. Although it is not possible to allocate Social Grade precisely from information collected by the 2001 Census, the Market Research Society has developed a method for using Census information to provide a good approximation of Social Grade.

To explore 1991 census data

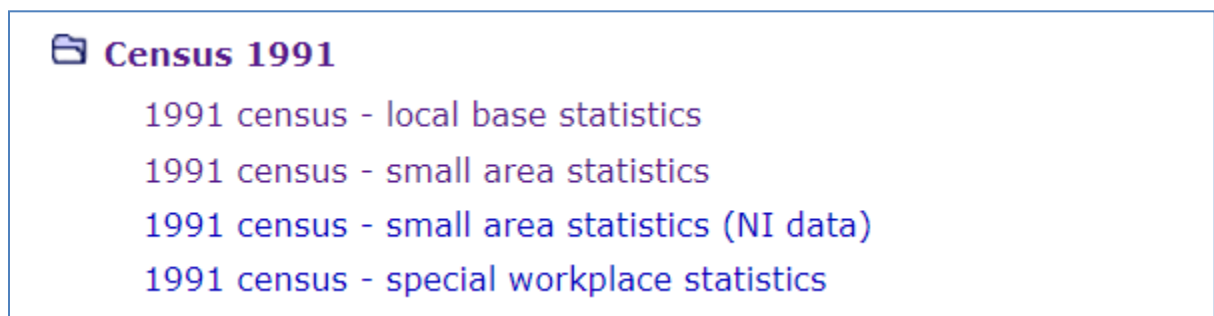

From the link above, hover over the Census link in the black bar across the top of the page

You can then select **1991 Census** from the dropdown menu

You need to choose which table type you want to explore.

The 1991 Census Local Base Statistics have around 20,000 statistical counts as opposed to the Census Small Area Statistics 10,000 counts. Local Base Statistics are available to a lowest geography level of ward, and Small Area Statistics are available to enumeration district level.

This means that the Local Base Statistics tables are more detailed, while Small Area Statistics tables will have some condensed variable groupings. The table lists are very similar; however the following tables are only available from Local Base Statistics:

- **Table L45** Migrant Household Heads
- **Table L52** Language Indicators
- **Table L64** Tenure of dwellings and household spaces
- **Table L65** Occupancy of dwellings and household spaces
- **Table S72** Economic and employment status (10% sample)
- **Table S85** Ethnic group of qualified manpower (10% sample)
- **Table S88** Concealed families
- **Table S93** SEG and economic position (10% sample)
- **Table S96** Armed forces (10% sample)
- **Table S97** Armed forces; households (10% sample)
- **Table S98** Occupation orders; 1980 classification (10% sample)
- **Table S99** Occupational Standard Occupational Classification (10% sample)

Make sure that a tick is in the **Guide my step-by-step** box to the left which will provide you with instructions

Start by selecting the Geography level you require. Data is available at the following Geography levels:

- Enumeration District (Small Area Statistics tables only)
- 1991 frozen wards (Wards as at the time of the census in 1991)
- Countries
- Local authorities: county/unitary (prior to April 2015)
- Local authorities: district/unitary (prior to April 2015)
- Pre-1996 local authority districts
- Pre-2009 local authorities: county/unitary
- Pre-2009 local authorities: district/unitary
- Pre-1996 counties/Scottish regions
- Regions
- Parliamentary constituencies 1983 revision
- Parliamentary constituencies 1995 revision
- Scottish census postcode sectors
- Travel to work areas 1998 revision
- Travel to work areas 1984 revision
- Standard statistical regions

- Nuts 2003 Levels 1, 2 or 3 (Created by the European Office for Statistics (Eurostat) as a single hierarchical classification, used across the EU)
- Scottish local enterprise companies
- Tecs (Training and Enterprise Council)/Lecs (Local Enterprise Council – Scotland only)
- ELWas (Education and Learning Wales)

To look at a specific area, you can search for it by postcode or place name with the **Search** selection method.

You can also use the **map** method to identify what area you can drill down to

Step 1 of 4 - geography selection

Choose your geography then continue to the next step.

Geography

Make sure that a tick is in the **Guide me step-by-step** box to the left which will provide you with instructions

To look at a specific area, you can search for it by postcode or place name with the **Search** selection method.

You can also use the **map** method to identify what area you can drill down to

Step 1 of 4 - geography selection

Choose your geography then continue to the next step.

Geography [select using list](#) [map](#) [select areas within](#) [load / save selections](#) [user defined](#)

Once you have selected the geography you require, you can see the tables available.

Step 2 of 4 - cell selection

First choose a table to display an outline of that table. Then select the cells you require from that table.

Cell

Show tables containing

To expand a table category click the corresponding  icon. The category will be expanded and its tables will be shown.

-  Tables 1 to 32: Great Britain [100%]
-  Tables 33 to 38: England and Wales [100%]
-  Tables 39 to 39: Wales only [100%]
-  Tables 40 to 43: Scotland only [100%]
-  Tables 44 to 53: Great Britain [10%]

Click on **+ icon** to see all the tables within a category

Select the table you would like to explore

This will display an outline of the table, and you can then select which cells you require for the table.

You can also select to display all of the cells using the **tick all** option

Once you've selected the cells that you require, you can choose the format for your data and then click **Download**
