PARTICIPANT INFORMATION SHEET FOR CHILDREN 5-9 YEARS

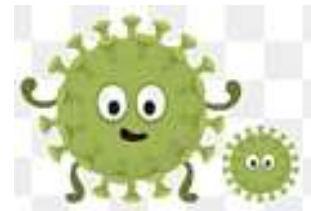

COVID-19 Infection Survey

We would like to take a sample from you today to help find out who has the new coronavirus.

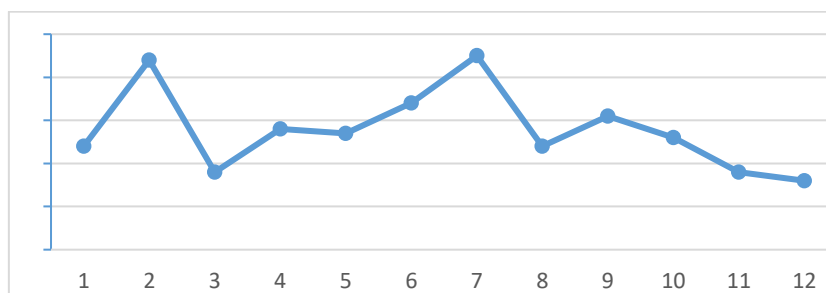

We are asking everyone in your home if they would like to take part in our study.

Someone who looks after you will take a sample from your nose and throat. We will test it to look for the new coronavirus.

We would like to do this again later on, if you agree. We want to see how many different people may have the virus at different times.

You can say no if you do not want to do this.

Thank you for thinking about helping us.
