

Area Profile for: Coventry Council

Introduction

This area profile provides an overview of the demography of Coventry, with straightforward statistical charts and tables to support this. We provide the information for local authorities to support their work with ONS field staff, such as census engagement managers (CEMs) and community advisers (CAs). The data will help field staff develop their understanding of the area they'll be working in during Census 2021, especially 'hard-to-count' communities. We took the information from 2018 mid-year population estimates and responses from the 2011 Census.

1. Population

Here is an estimated overview of the entire population of Coventry, as well as an estimate of the non-White British/Irish population in Coventry.

- The 2018 mid-year population estimate is: **366,785**
- The 2011 Census non-White British/Irish population estimate is: **98,467 - (31% of the 2011 population)**

2. Hard to Count (HtC) breakdown

The hard-to-count (HtC) index is a measure of the likelihood of residents in Coventry taking part in Census 2021. There are two domains in the hard-to-count index. The 'willingness' domain measures the likelihood of residents completing their questionnaires without intervention (that is, without the need for field follow-up visits or reminder letters). We primarily based this on response patterns to the 2011 Census and then used administrative data sources to update the characteristics of an area that determine the index. The 'digital' domain measures the likelihood of residents completing their Census 2021 questionnaire online. We measure this domain using information about driving licence applications (online or on paper), broadband uptake and median age group.

Every Lower Super Output Area (LSOA) in England and Wales is assigned a separate score for the 'willingness' and 'digital' domains of the HtC index based on model outcomes. LSOAs are then ranked according to their scores. As the final line in the table shows, the:

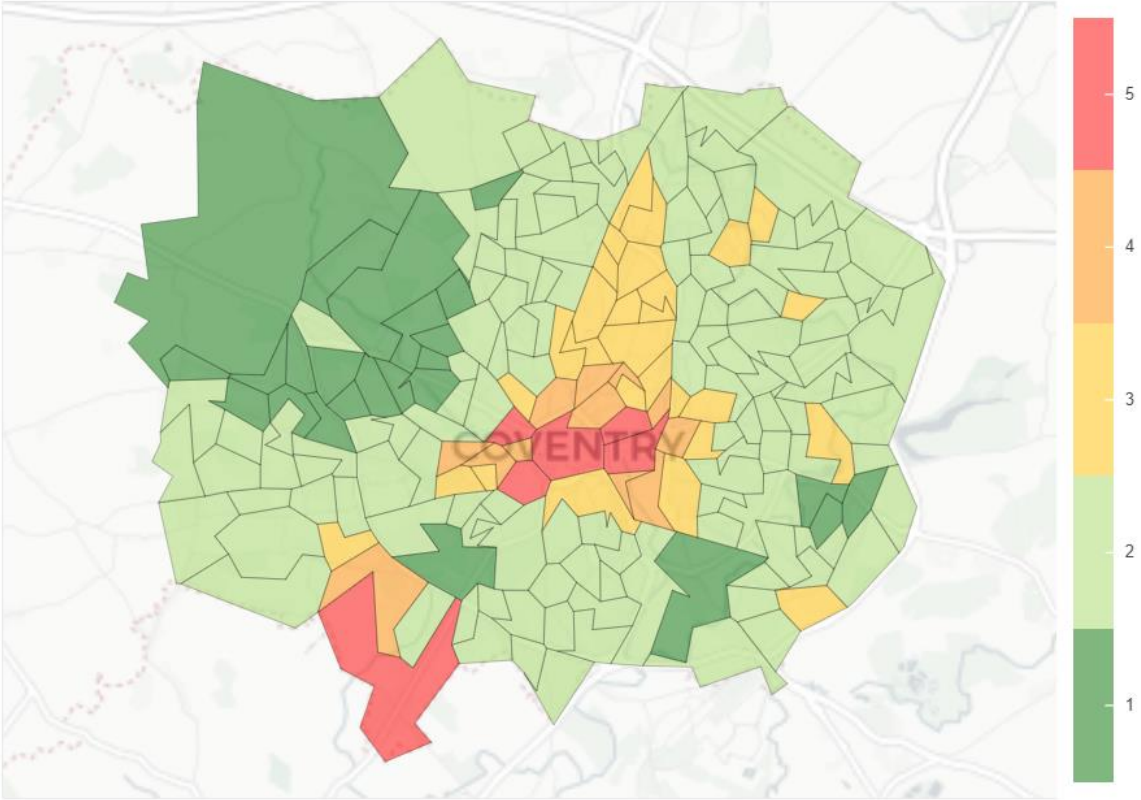

- top 40% of LSOAs in England and Wales are categorised as HtC 1 (easiest-to-count areas)
- next 40% are categorised as HtC 2
- following 10% are categorised as HtC 3
- next 8% as HtC group 4
- final 2% as HtC group 5 (the hardest-to-count areas)

The maps below show the separate LSOAs in Coventry and how they are individually represented in the 'willingness' and 'digital' domains. Dark green areas represent wards that are HtC 1, while red areas are LSOAs identified as being HtC 5.

| Coventry | HtC 1 | HtC 2 | HtC 3 | HtC 4 | HtC 5 |
|----------------------------|--------------|--------------|--------------|--------------|--------------|
| Willingness | 12% | 64% | 14% | 6% | 3% |
| Digital | 3% | 40% | 19% | 30% | 8% |
| England & Wales | 40% | 40% | 10% | 8% | 2% |
