Subject : [Estimate for ERMS Specification](#)

I've put together an estimate for building an ERMS from scratch based on our BDB.

[REDACTED] has put together a design estimate which he has documented -> . I've summarised this estimate in the Work Request.

I've used our Front Door work request and completed the areas that are relevant for this exercise 

I have consulted with [REDACTED] to validate this request.

I will put together some details regarding another development that was a similar piece of work.

Please let me know if you have any further questions.

Thanks,

[REDACTED]
