Subject : A heads up - redevelopment of BDB

Hello all,
just to let you know that we are carrying out a pretty major change to the way we declare documents and manage records and so the design of the BDB.

I wanted to make you aware of this because:
- at some point it's likely we'll want to stop creating BDBs using the current design - currently under discussion
- we're going to have to apply the changes to all the existing BDBs which is going be a considerable task over a number of weeks - currently planning.

At the moment the plan is that the development should be complete by mid-May and we'll start to roll out the new design.

The planning of the implementation is still in early stages so once we've got a better idea of how we need to do this I will arrange a meeting to see what other things we need to consider from the point of view of server tasks, timing etc.

Thanks,
██████
