████████

Will have a closer look and let you know but finger in the air will be new form design and probably changing field names in agents

There is likely to be some work required in the agents/actions in the BDB/File Counts db as well 🌐

Subject: New BDB document design and Holding and ERMS Management Dbs

████████,

We had a meeting the other day just to start thinking about how we're going to implement the changes 📄.

One of the things that came out in the discussion is how would this affect the Holding Db and the ERMS Management Db . As they hold BDB documents it looks like we will need to apply changes to these databases.

Could you have a look at these databases and see what might be involved? I just need an idea at the moment to try and plan the work.
Give me a ring if this isn't clear.

Thanks,

████████
