Re: Fw: ███████ v Office for National Statistics - Mediation 📄

27/01/2015 12:44

████ ,

If we had to make room for it then we could.

I put together this front door request as part of the last correspondence 📄.
The estimate is 56 - 107 days at a cost of £21000 - £41200.
The difference caused by whether in-house or contract resource are used (comes down to experience of the work area and the requirement)

My only caution with purchasing a solution is that this is where we started with ██████ .
My understanding of the reasons we ended this contract were the costs of support, and the cost and poor quality of the enhancement and remedial work that █████ provided.

Whatever direction is taken bear in mind:
- how the existing data will be managed and the need for continuity.
- No matter how good systems appear there will always be work required to integrate with existing ones.
- the security level of the data stored
- where the data is stored.
- the cost of support and enhancements

Thanks,
██████
